THE UNITED REPUBLIC OF TANZANIA
THE PRESIDENT'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
LONGIDO DISTRICT
ANNUAL JOINT EXAMINATION
FORM ONE

036 INFORMATION AND COMPUTER STUDIES
MARKING SCHEME NOVEMBER 2024

SECTION A: 15 Marks

1. **@1 Marks=10MARKS**

i	ii	iii	iv	v	vi	vii	viii	ix	x
C	E	B	C	B	D	E	B	E	A

2. **@1 Marks=05MARKS**

i	ii	iii	iv	v
C	A	B	D	E

SECTION B: @10 Marks=70Marks

3. (a) **@1marks=05MARKS**

1	2	3	4	5
E	C	B	D	A

(b) Any five (5) points @1marks=05marks

- -Teachers and students use connected computers to assist them in teaching and learning.
- Customer can order and pay for products and services using computers connected to the Internet.
- Design and print big banners/advertisements along streets to digital ones on big screens.
- Presenting different presentations such as report using a computer.
- Computers support banking operations such as data recording and processing.
- Computers are used to analyse phenomena such as predicting weather conditions, which need high computing power.
- Computers in health facilities are used to capture, process, transmit and keep patients' records to facilitate the diagnosis of their conditions and treating them.
- Computers are used creatively to produce, share and play music.

4. **(a) 02marks**

Computer software is a set of instructions that a computer requires to perform various tasks.

(b) Any four points **@02marks=08marks**

Four functions of operating system

- File management
- Task management
- Hardware management
- Interrupt management
- Error handling

5. **@02marks=10marks**

(a) Printing is the process of produces text and graphics on a physical medium such as paper **while** scanning is the process of converting a printed format into a digital format.

(b) Data are raw facts and figures before being processed **while** information is the processed data or knowledge acquired through study, experience or instruction.

(c) Random Access Memory (RAM) is a working memory(temporary volatile) when the computer is turned off, loses its data **while** Read Only Memory is a permanent non-volatile memory, stored information remains even if the power is lost.

(d) Sleep mode and shutdown computer

Shutting down completely powers (software, CPU and battery) off the computer **while Sleep** just suspends the operating system to RAM and puts the CPU in a low power state.

(e) System software is a set of instructions that controls and manages computer operations **while** Application software is a set of programs that carry out operations for a specific task.

6. Any four points **@02marks=08marks**

(a) Computer laboratory rules and regulations

- Do not enter the laboratory without the permission or presence of the teacher or computer technician.
- Keep the windows open for proper ventilation.
- Master the location of all exits.
- If you do not understand something, ask your teacher/technician before proceeding.
- Do not eat, drink, smoke, play or run in the laboratory.
- Turn off computer, printer, scanner and electricity source after use.
- Strictly Do not take out anything away from laboratory

(b) Any two accidents **@01marks=02marks**

Computer lab accidents may occur

- Electrical surge
- Software damage
- Spreading of virus through network
- Theft of removable of accessories like HD,RAM,WI-FI mouse, NIC/network card

7. (a) Two storage device **@01marks=02marks**

i. OS &Primary software(C :)
ii. Secondary software (F :)

(b) Storage capacities **@01marks=02marks**

i. OS &Primary software(C :)=223GB
ii. Secondary software (F :)=111GB

(C) Conversion total capacity=0**3Marks**

Solution

Total storage capacity=Drive(C :) + Drive (F:)223GB+111GB=334GB

Change 334GB into MB

1GB=1024MB
334GB=?
= (1024MBX334GB)/1GB
=

(d) Any two advantages of storage devices **@01marks=02marks**

- Store data or information for future use
- Transfer information between devices
- Some are readable and rewritable.
- Used for backup and archiving data and information.

8.(a) **02marks**

Computer system is connection of computer peripherals and parts to system unit and software for computer to function properly.

(b) Four (4) components of computer system **@02marks=08marks**

i. Input component, **example**; keyboard,mouse,microphone,scanner.
ii. Processing component, **example**; Central processing unit (processor)
iii. Output component, **example**; monitor,speaker,printer,projector
iv. Storage Component, **example**; Hard disk, RAM,ROM,CD,DVD,flash disk

9.**(a) @02marks=08marks**

Traditional way	**Modern way**
i. Media or pieces of equipment are manual	i. Most of the media or pieces of equipment use advanced digital technologies.
ii. It may take a long time for information to reach the receiver	ii. Messages can be sent and received by the receiver within a short time
iii. Information is delivered to a small area or group of people at a time.	iii. Information can be delivered to a large area and reach many people at a time.
iv. Information can easily be distorted or changed before reaching the audience.	iv. Information cannot be easily distorted before reaching the audience.

(b) Any two for each way **@0.5 marks=02marks**

Traditional way example	**Modern way example**
Meetings, Storytelling, Drum beating, Horn blowing	Television, Radio, Newspapers, Books, Journals, Brochures

SECTION C: 15 Marks

10. Any five points

- To simulate experiments in Chemistry, Physics, Biology and other subjects.
- Used to communicate, create, disseminate, store and manage information.
- Making relevant decisions about different aspects of life such as development activities, providing social service, and doing business.
- It provide entertainment
- Searching material
- Drawing different diagrams and graphs
- Keeping information for long time references
