SECTION A (15 Marks)

Answer **all** in questions in this section.

1. For each of the items (i) - (x), choose the correct answer from the given alternatives and write its letter beside the item number in the answer sheet provided.

(i) Which hardware is called brain of computer?

A Monitor B Read access memory C Central processing unit
D Motherboard E Register

(ii) The function keys or F-keys on a computer keyboard, labeled F1 through F12, means

A Typing document B Have a normal function defined by the operating system
C Copying document D Have many functions defined by the operating system
E Have a special function defined by the operating system

(iii) The term computer may be defined as:

A. A set of instructions that manipulate text based document.
B. A programmable machine that accepts user input, process, store and give the output.
C. A programmable machine that run user input, discard output, process and give the output.
D. A programmable machine that accept information, process, store data and give output.
E. A Set instruction that manage all hardware resources only.

(iv) Which one of the following statements regarding secondary memory is false?

A. Secondary memory is non-volatile.
B. Data on secondary memory is often stored magnetically or optically.
C. The typical access time of secondary memory is faster than that of RAM.
D. Secondary memory is cheaper than primary memory in terms of units costs.
E. Data on secondary memory is often stored internally or externally.

(v) Programs stored in ROM are called

A Hardware B Firmware C Malware D Software E Freeware

(vi) The largest printed circuit hardware in a computer's chassis.

A Processor B Monitor C Hard disk D Motherboard E RAM

(vii) BIOS are built-in computer's essential set of instructions which perform the following.

A Processing data B Power on Self-Test C Display errors D Play audios
E Starts computer

(viii) Maua yesterday sent message to her daughter Yahra and Najituma through mobile phone. How many components of communicating message Maua used?

A 4 B 3 C 2 D 1 E 5

(ix) The following are examples of print media except

A Brochures, Newspapers and Newsletters,
B Magazines, Reports, Books, and Business card

C Certificates, Handouts, Calendars and Newspapers
D Periods, Brochures, Posters and letters
E Greeting cards, Scanners, Books and Magazines

(x) **Seypalm** uses microphone and speaker when presenting morning speech assemble, Microphone used as:
A Input device B Output device C Processing device
D Memory device E Pointing device

ITEMS	i.	ii.	iii.	iv.	v.	vi.	vii.	viii.	ix.	x.
ANSWER										

2. Match the computer generations in **List A** and corresponding technologies used in **List B** by writing the letter of the correct response beside the item number in the answer sheet provided.

List A	List B
i. Second generation computers	A. Artificial intelligence
ii. Fifth generation computers	B. Very Large Scale Integration technology
iii. Fourth generation computers	C. Transistor technology
iv. First generation computers	D. Vacuum tube technology
v. Third generation computers	E. Semi-conductor technology
	F. LED technology

LIST A	i.	ii.	iii.	iv.	v.
ANSWER					

SECTION B (70 Marks)

Answer **all** in questions in this section.

3. (a) The following are steps for switching on computer. Study the steps carefully and arrange them in a correct order beginning with the first step to the last step and write the letter of each step in the answer sheet provided.
A Press the enter key on keyboard.
B Wait a while, the computer booting.
C If the monitor is not turned on, press the Power button on the monitor.
D Dialogue box will ask for a username and password
E Press the computer's Power button.

LETTER					

(b) Which are five applications of computer in daily life?

_____
_____
_____
_____

4. (a) Define computer software

(b) Give four functions of operating system.

5. Briefly, explain the difference between following terms
   (a) Printing and scanning

   (b) Data and information

   (c) Random Access Memory and Read Only Memory

   (d) Sleep and shut down computer

   (e) System and Application software

6. (a) Head master of Seypalm secondary School plans to establish a computer laboratory. Unfortunately, he is not knowledgeable on computer laboratory rules and regulations. As Information and Computer Studies student note four rules of computer laboratory.

_____

_____

_____

_____

_____

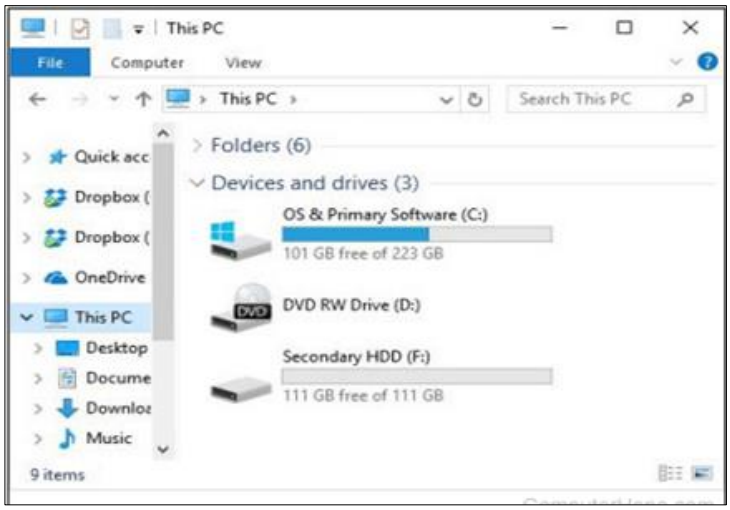

(b) Give two accidents may occur on the computer laboratory if rules and regulations are not considered.

_____

_____

_____

7. Study snapshot carefully and answer questions that follow:

(a) Mention two storage device names from snapshot above

_____

_____

_____

(b) Give storage capacities of each device in 7(a) above.

_____

_____

(c) Convert total storage capacity of This PC into Megabytes (MB)

_____

_____

_____

_____

_____

(d) Which two advantages of using storage devices in daily life?

_____
_____
_____

8.(a) What is computer system?

_____
_____
_____

(b)With accessory example for each, outline four (4) components of computer system.

_____
_____
_____
_____
_____

9. (a) As technology increase enhances the emergence of new means of communication, it simplifies communication for spreading information in the society. Differentiate the main two means of spreading information by giving four points.

(b) Give two examples each means you differentiated at **9(a)** above.

SECTION C (15 Marks)

Answer question in this section.

10. We are living in the information age in which information and computer are working tools in almost all fields such as agriculture, business, education and health. With five points, explain why studying ICS is important.

_____
_____
_____
_____
_____
_____
