SECTION A (15 MARKS)

1. Choose the most correct answer and write its **letter** in the space provided.

(i) A computer is best described as:
- A. cooking device
- B. An electronic device for processing data
- C. Drawing tool
- D. communication app

(ii) The part of the computer that performs calculations is:
- A. Monitor
- B. RAM
- C. CPU
- D. Printer

(iii) Which one of the following is an input device?
- A. Printer
- B. Speaker
- C. Keyboard
- D. Monitor

(iv) An example of application software is:
- A. Windows
- B. MS Word
- C. BIOS
- D. Linux

(v) The **permanent memory** in a computer is called:
- A. RAM
- B. CPU
- C. ROM
- D. Hard disk

(vi) Which software helps in controlling computer hardware?
- A. Paint
- B. Operating System
- C. Calculator
- D. Excel

(vii) Which of the following stores data permanently?
- A. RAM
- B. Monitor
- C. Mouse
- D. Hard Disk

(viii) Which of these is a good practice in computer care?
- A. Eating near the keyboard
- B. Using a power stabilizer
- C. Placing magnets near the monitor
- D. Spilling water on the CPU

(ix) A set of related computers working together is called a:
- A. Keyboard
- B. Network
- C. Server
- D. Monitor

(x) A computer system is made up of:

A. Printer, Scanner only
B. Hardware, Software, and Users
C. Monitor and Keyboard
D. Software only

Answers

(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)	(viii)	(ix)	(x)

2. Match **List A** with the correct item from **List B**.

List A	List B
(i) CPU	A. Output device
(ii) Mouse	B. Example of application software
(iii)Monitor	C. Controls and processes data
(iv)MS Excel	D. Used to point, click, and drag
(v) Antivirus	E. Protects computer from malicious programs

Answers

(i)	(ii)	(iii)	(iv)	(v)

SECTION B (70 MARKS)

3. Define a computer system and list its three main components.

(a) Definition

……

……

(b) Components

(i) ……..

(ii) ……..

(iii)…….

(c) Draw and label the parts of a simple computer system.

4. State two differences between hardware and software.

Hardware	Software
(i) …… ……	(i) …… ……
(ii) …… ……	(iii) …… ……

5. Anna always turns off her computer by switching off the power socket without using the shutdown option.
   (i) Identify the poor practice Anna is doing.
   ……
   ……
   (ii) Mention two possible effects of this habit.
   ……
   ……
   (iii) Suggest two proper shutdown procedures.
   ……
   ……

6. Seypalm downloaded files from an unknown website. After that, his computer started behaving strangely.
   (i) What mistake did Seypalm make?
   ……
   ……
   (ii) What are the risks of such downloads?
   ……
   (iii) Suggest two safety practices he should follow.
   ……
   ……

7. In a school computer lab, students are allowed to drink water while using computers. The lab is cleaned only once a month.

   ……
   ……
   (ii) List two possible effects of the bad practice.
   ……
   ……
   ……
   (iii) Suggest one improvement.
   ……

8. A student was asked to explain the two main types of software.
   (i) Name the two types.
   ……
   ……
   (ii) Give one example of each.
   ……
   ……
   (iii) Why is system software important?
   ……
   ……
9. Computer can be classified according to physical size, purpose and functionality. Therefore, based on physical size, computer can be classified into four main groups. List them and explain any two groups.
   (a) Listing them:
      (i) ……
      (ii) ……
      (iii)…….
      (iv)…….
   (b) Describing any two groups.
      (i) ……
      ……
      ……..
      (ii) ……
      ……
      ……

SECTION C (15 MARKS)

10. Explain the importance of computer hardware and software working together, and how proper care improves computer performance."
    Your answer must include:
    - Definitions of hardware and software
    - Their relationship
    - Two examples of each
    - Good care practice
    - Conclusion

    ……
    ……
    ……
    ……
    ……
    ……
