THE PRESIDENT'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
LONGIDO DISTRICT

FORM ONE TERMINAL EXAMINATION
COMPUTER SCIENCE

Time: 2½ Hours **Thursday, 29th May 2025 a.m.**

Instructions

1. This paper consists of sections **A, B and C** with a total of **ten (10)** questions.
2. Answer **all** questions.
3. **Write your** answer in the spaces provided.
4. All answers must be written **in black or blue ink.**
5. Cellular phones, calculators and any unauthorized materials are not allowed in the **Assessment Room.**
6. Write for **Assessment Number** at the top right corner of every page.

SECTION A (15 MARKS)

1. For each of the following items (i-x), choose the best answer from among the given alternatives and write its letter in the space given below.

   i. Which of the following best describes a **supercomputer**?
   - A. A portable computer for basic tasks
   - B. A computer used in homes and offices
   - C. A powerful computer used for scientific research
   - D. A small device with touch screen features

   ii. Which generation of computers introduced the **microprocessor**?
   - A. First generation
   - B. Second generation
   - C. Third generation
   - D. Fourth generation

   iii. Which of the following options describe why software is important in a computer system:
   - A. It powers the CPU directly
   - B. It provides electricity to the system
   - C. It enables the hardware to perform specific tasks
   - D. It cools the internal parts

   iv. Which part of the computer holds data temporarily for quick access by the CPU?:
   - A. Hard disk
   - B. ROM
   - C. RAM
   - D. Monitor

   v. What is the main difference between **hardware** and **software**?
   - A. Hardware is downloaded, software is physical
   - B. Hardware is internal, software is external
   - C. Hardware is touchable, software is intangible
   - D. Hardware performs tasks, software stores data

   vi. In the evolution of computers, the **second generation** used:
   - A. Vacuum tubes
   - B. Transistors
   - C. Integrated circuits
   - D. Artificial intelligence

   vii. A **computer system** consists of:
   - A. Only hardware
   - B. Only software
   - C. Hardware and people
   - D. Hardware, software, data, and users

   viii. Which of the following is a **characteristic of mini computers**?
   - A. Smallest in size
   - B. Highest processing power
   - C. Supports multiple users
   - D. Used only in mobile devices

ix. The study of **Computer Science** is mainly important because:

A. It teaches how to watch videos
B. It improves musical skills
C. It enables solving problems using technology
D. It increases physical strength

x. The **input** component of a computer system includes:

A. Monitor and speakers
B. CPU and memory
C. Keyboard and mouse
D. Printer and projector

Answers

i	ii	iii	iv	v	vi	vii	viii	ix	x

2. Match the following computer generation in **LIST A** with its associated technology in **LIST B**

LIST A	LIST B
i. Second generation computers	A. Very Large- scale Technology
ii. Fifth generation computers	B. Vacuum Tube Technology
iii. Fourth generation computers	C. Transistor Technology
iv. First generation computers	D. Microprocessor design Technology
v. Third generation computers	E. Integrated circuit technology
	F. Designed for complex simulations
	G. Microcomputer

Answers

LIST A	i	ii	iii	iv	v
LIST B					

SECTION B (70 MARKS)

3. (a) Describe five types of computer classifications based on size. Give one example of each.

i. ……..
ii. ……..
iii. …….
iv. ……..
v. ……..

(b) By referring to question 3(a) above, arrange them to the order of increasing power of processing.

i. ……

ii. ……

iii. ……

iv. ……

4. State the long form and one function in each of the following abbreviations as used in computer science

i. HDD……
……

ii. SSD……
……

iii. PSU……
……...

iv. CPU……
……..

v. ALU……
……

vi. RAM……
……

vii. ROM……
……

viii. VGA……
……

ix. CAD……
……

x. CAM……
……

5. Imagine that a school with a tight budget is planning to buy computers for its computer laboratory. As an advisor, recommend suitable computers they should buy and give reasons to explain your selections.

……

……

……

……

……

……

……

6. Explain why the development of microprocessors was a major development in computer technology. Give five points

   i. ……

   ii. ……

   iii. ……

   iv. ……

   v. ……

7. How can you differentiate System software from Application software? Give five points

   i. ……

   ……

   ii. ……

   ……

   iii. ……

   ……

   iv. ……

   ……

   v. ……

   ……

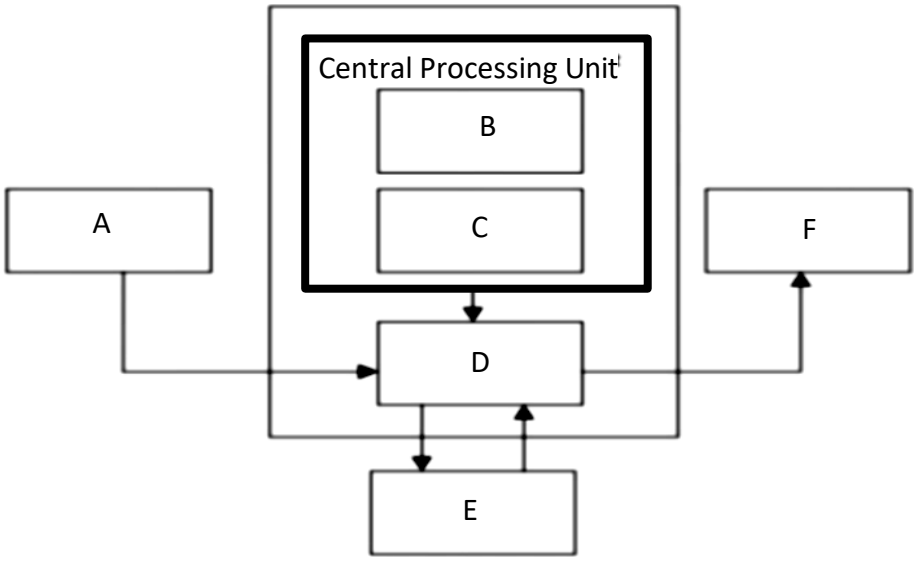

8. (a) Librarian at a Seypalm Secondary School uses computer system to manage book borrows and book returns. Outline **three (3)** advantages of using a computer rather than doing this job manually.

   i. .....

   ii. .....

   iii. .....

   (b) i. The diagram below shows a simple computer system with its data flow. Identify the **six** components marked as A,B,C, D, E and F.

A. .....

B. .....

C. .....

D. .....

E. .....

F ..... ……

ii. List **two** functions of Central Processing Unit.

a) .....

b) .....

iii. Give any **four** devices which act as part A above. **(02 marks)**

a) ……

b) ……

c) ……

9. Explain how Robotics are used in manufacturing industries is important. Use five points

i. ……

……

ii. ……

……

iii. ……

……

iv. ……

……

SECTION C (15 MARKS)

10. Using the knowledge of Computer Science, explain how Computer Science improves teaching and learning and give examples of software or platforms that support education delivery.

……

……

……

……

……

……

……

……

……

……

……

……

……
