SECTION A (11 marks)

Answer all questions in this section.

1. For each of the items (i) to (x), choose the correct answer from among the given alternatives.

i. Maliki prefers to use environmentally friendly energy resources for cooking in his restaurant. Which type of energy resource is Halisafi using?
A. Fuel wood B. Petroleum C. Natural gas D. Nuclear

ii. Paul was travelling by air across the Sahara Desert and observed crescent shaped features in groups developed by obstruction such as rocks. What could be the features she observed?
A. Seif dunes B. Barchans C. Loess D. Zeugens

iii. The rocks that are folded with one side of the limb being steeper than the other side depending on the intensity of force involved are called:
A. Simple fold B. Over fold C. Asymmetrical fold D. Overthrust fold

iv. Which one among the following is not the cause of environmental degradation in Tanzania?
A. Deforestation B. Use of inorganic fertilizers
C. Disposal of industrial chemicals C. Afforestation

v. The local time at Greenwich Meridian is 10:30 am on Thursday. What will be the time at longitude 180°E?
A.10:30 pm on Thursday B.10:30 am on Wednesday
C.12:30 am on Wednesday D. 11:00 am on Friday

vi. Suppose you were walking along river Rufiji and you had a chance to observe the drainage pattern with uniform rock structure and rock resistance, suggest the name of that drainage pattern.
A. Dendritic B. Trellis C. Radial D. Parallel

vii. Jamila and his young brother Hamid like to play with wet soil around their home. They enjoy observing quick percolation of water in the soil. What type of soil were they playing with?

A. Clay B. Silt C. Loam D. Sand

viii. Sometimes people living in the Central part of Tanzania experience sudden vibrations of the Earth's surface caused by movement of the molten rocks below or within the crust. Identify the instrument to be used to measure the magnitude of such vibrations.
A Hygrometer B. Richter Scale B Thermometer C Wind vane

ix. Gold deposits which are near to the surface have been discovered at Mtakuja village. What could be the suitable method in extracting them?
A. Shaft mining B. Underground mining C. Open cast mining D. Alluvial mining

x. Why are Japanese ship building industries located along the coast?
A Government policy B Presence of skilled labour
C Availability of capital D Presence of natural harbours

2. Match the description of time zone in List A with its respective name in List B.

LIST A	LIST B
i. A state in which an area experiences prolonged dry period.	A. Desertification
ii. Addition of unwanted substances into the environment.	B. Deforestation
iii. Deterioration of the quality of the land through loss of soil fertility.	C. Loss of biodiversity
iv. Gradual changes of rainfall and temperature in a place.	D. Drought
v. Processes that lead to the perish of plant and animal species in an area.	E. Soil erosion
vi. Process through which fertile land become dry, waterless and without vegetation	F. Land degradation
	G. Climate change
	H. Pollution

SECTION B (54 Marks)

Answer all questions in this section.

3. (a) Name four physical features found on the given map.
(b) Calculate the area covered by the map in km².
(c) What is the general direction of flow of the river from grid reference 215785 to 267720?
(d) What is the main possible factor that controls the direction of the river in (c)? Relief or slope of the land.

4. The following fluctuation of water volume in millimeters was noted in rivers RUVU, RUAHA,and KILOMBEROfrom 2010 to2012 as shown below.

YEARS	RUVU	RUAHA	KILOMBERO
2010	50	25	70
2011	70	60	40
2012	70	50	75

(a) Present the data by a percentage compound bar graph.

(b) With examples describe two reasons for the fluctuation of water volume in the rivers.

(c) Provide two advantages of the method used to present the data

5. The Gamboshi district is planning to invite a survey team to help it determine the length of the Nyashimo to Ngasamo road.

(a) What survey technique does the team decide to use?

(b) Draw three (3) equipment the team can use in the survey.

(c) List five (5) objectives of land survey

6. Suppose you want to conduct research on the effect of flood which is caused by heavy rainfall in most parts of Tanzania. You are interested in getting information by looking at the phenomena and record what you see.

a) Name the method you will use in getting the information.

b) Explain four types of the method suggested in (a) above.

c) Analyze three advantages of the method of data collection used.

7. On Feb.6, 2023, a magnitude 7.8 earthquake occurred in southern Turkey and Syria. It was among the most devastating earthquakes to occur in the world. As a Geography student;

a) Analyze three factors that lead to the occurrence of earthquake.

b) Name the scale used to determine the magnitude of earthquake.

c) Mention with examples two belts in Tanzania where earthquakes can occur.

d) Suggest three safety ways of minimizing the effects of earthquakes.

8. Study carefully the following photograph and answer the questions that follow

(a) With reason identify type of settlement is represented in the image above

(b) Identify two(2) economic activities which are likely to be practiced by the people in the area shown on the photos

(c) What are the three (3) possible environmental challenges this settlement might face?

(d) What type of river feature is visible in the image, and what is its importance to the settlement?

SECTION C (30 Marks)

Answer two questions

9. Suppose you have enough capital and you want to invest in large scale mining in Tanzania, describe six necessary factors to be considered before starting the project.
10. Form four students were given assignment of visiting rural areas of their ancestors to learn different matters relating to socio-economic and cultural values of society of their origin. Among the surprising fact they discovered was the presence of high birth rate in rural areas as compared to urban areas, where fertility rate is low. Present the findings by stating six (6) reasons for the situation in rural areas.
11. Defoe was travelling from Tanga to Arusha. On his way, he experienced gradual increase of cold. In six points, analysis the causes of such situation.
