REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT MANYARA REGION
FORM FOUR MOCK EXAMININATION 2026

GEOGRAPHY

TIME: 3:00 HOURS **YEAR: 2026**

INSTRUCTIONS

wazaelimu.com

- This paper consists of sections **A**, B and **C** with a total of 11 questions.
- Answer all questions from section A and B and **only two (2)** questions from section C.
- Section A carries 16 marks, Section B carries 54 marks, and Section C carries 30 marks.
- All writings must be in answer Sheet provided.
- Write your examination number on every page of your answer sheet provided.

SECTION A (16 Marks)

Answer **all** questions in this section.

1. For each of the items (1) – (x) choose the correct answer from the given alternatives and write its letter in the answer sheet provided.

i. Deflation of winds and ocean currents is the result of;

A. Revolution of the earth.
B. Lunar eclipse.
C. Earth's rotation.
D. Tides.

ii. Formed when air masses of deferent characteristics meets and the air mixes;

A. Relief rainfall C. convection rainfall
B. Cyclonic rainfall D. Evaporation

iii. Which of the following instruments used to measure wind

A. Rain gauge
B. Thermometer.
C. Anemometer.
D. Wind vane
E. Wind rose

Iv. If it is 9.00am at Musoma 30^0ES^{0}S, what will be the time at Lind 40^0E10^0 S?

A. 9.40 A.M C. 3.00 A.M
B. 9.00 A.M D8.40 A.M
C. 8.20 A.M

v. Madam Mwanaidi once said that, All countries in the world can be presented on a piece of paper by using a scale. Which type of map scale is used to produce this type of map?

A. Small scale C. Medium scale
B. Large scale D. Linear scale.

vi. If Mwanza has a temperature of 30^0C and it is situated at sea level. What will be the temperature in Mbeya city 3000M above sea level?

A. 19.5^0C
B. 18^0C
C. 48^0C
D. 6.5^0C
E. 12^0C

vii. An elongated trough with steep sides produced by faulting

A. Plateaus
B. Plain surface area
C. Rock basin
D. Rift valley

viii. A feature formed when magma solidify along the bedding plane

A. Dykes
B. Phacolith
C. Batholith
D. Crater
E. Volcanic plug

ix. The core is also known as;

A. Atmosphere
B. Hydrosphere
C. Barrysphere
D. The mantle

x. The layer which separate mantle and the core is called……..

A. Gutenberg discontinuity
B. Conrad discontinuity
C. Asthenosphere
D. Upper mantle

2. Read carefully list of items in A and B, then match the items in **list A** with response in **list B** by writing the letter of correct response in the answer sheet provided. .

LIST A		**LIST B**
i.	A wall like feature formed when magma cuts across a bedding plane.	A. Crater B. Dykes
ii.	A dome shaped feature formed when magma push up the overlying layers	C. Shield volcano D. Ash and cinder cone
iii.	A mass of magma which has emerged on the earth's surface.	E. Solfatara F. Sill
iv.	A depression formed on the summit of the cone after the plug has been blown off the top of the cone.	G. Volcano H. Caldera I. Earthquakes
v.	Force full emission of hot water from the ground to high levels in the atmosphere.	J. Hot springs K. Batholith
vi.	Formed when magma solidify horizontally along the bedding plane.	L Laccolith M Volcanic plug

SECTION B (54 Marks)

Answer **all** questions from this section.

3. Carefully study the map extract of MKOMAZI (Sheet 109/1) and answer the questions that follow:

a) By using the given RF scale (1:50,000), measure the distance of River Pangani in kilometer from grid reference 910771 to 910826.
b) Describe relief of the maped area.
c) With reasons, identify two types of rocks found on the map.
d) Name the major way used to show height of the land in the maped area.
e) Calculate the bearing and direction from grid reference 960820 to 910880.
f) With reference from the map, name three possible economic activities.

4. Rose and Othman are selling mathematical sets. Most of the time they keep records in their notebook. One day the geography teacher told the about the simplest way of presenting data for a simple variable over time. The following table indicates mathematical sets sold from 2020 to 2026.

Year	2020	2021	2022	2023	2024	2025	2026
Mathematical Sets	90	100	40	50	20	70	120

a) Name the simplest way of presenting the data
b) Mention five (5) advantages of the method mentioned in (a) above.
c) Present the given statistical information by using any appropriate graph.

5. Following "Elephant crisis" from 2009 to 2014, Dr. Paul was very interested and attempted to conduct a research to seek a solution to the existing problem. He consulted and

selected some officers and other members of wildlife conservation from the ministry of national resource and tourism (MNRT) so as to collect relevant information.

a) What is the type of research is this?
b) Propose the best sampling technique used.
c) Give the appropriate two (2) research topic tools might be applied.
d) Name three (3) sources of research topic identified above.

6. When doing land survey, chain or tape survey method can be applied. This involves measuring of series of short straight lines on the ground with a chain or tape measure, to locate points with reference to the line of traverse by using tie lines or offset method.

a) What do understand by the following terms:
   i. Tie lines
   ii. Offsets
   iii. Line of traverse

b). Name three members involved in chain survey team and identify the tasks of each person.

c). name at least four (4) equipment used in chain survey.

7. Study the photograph bellow and then answer the questions that follow:

a. Name the crop shown on the photograph
b. List three benefits of the crop you have named in (a) above.
c. Under what scale is the type of farming practiced? Why?
d. Suggest climate condition suitable for the growth of the cop mentioned in (a) above

8. Geography as a body of knowledge has different geographical terms as applied in geomorphological processes. Distinguish between the following terms;

a) Caldera and Crater
b) Fissures and Vents
c) Igneous and Sedimentary rocks

SECTION C (30 Marks)

Answer only **two** (2)

9. With example, Explain in detail six (6) economic importance of rocks.
10. Cash crop production is among the large scale agricultural investment in developing countries. Discus six (6) contributions of cash crop production to the economy of Tanzania.
11. Jocelyn and his friend Ana were arguing about the shape of the earth and concluded each other that the earth's shape is flat like a table. Using six (6) points, prove them wrong by giving evidence that the earth is spherical in shape.
