REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT

FORM ONE TERMINAL EXAMINATION, MAY - 2025

BIOLOGY

NAME……

TIME: 2hrs

INSTRUCTIONS

- This paper consists sections **A, B** and **C** with total of **10** questions
- Answer all questions
- Write your name in every paper of your answer sheets

SECTION A: 15 Marks

Answer all questions in this section

1. For each items (i-x) choose the most correct answer among the given alternative and write its letter in the box provided

(i) During Josiah's girl study tour to Serengeti the national parks, the form one students saw a moss plant but he failed to know its branch of biology. As a biology student, identify the branch of biology in which moss plant belongs

A. Zoology B.Entomology
C.Ecology D.Botany

(ii) ____ are conditions or factors that can change or be changed in an experiment

A. Hypothesis B. Variables
C. Problems D. Conclusion

(iii) A stage in scientific procedure, which can be used to compare the results and hypothesis is___

A. Conclusion B. Observation
C. Data collection D. Data analysis

(iv) If you are working in the field which deals the health of animals and treatment of their disease . you are a…

A. veterinarian B. forester
C.Agriculturalist D. pharmacist

(v)A person picks up a telephone after hearing it ringing. Which characteristics of living things is the person showing by this action?

A. Excretion and reproduction B. Respiration and nutrition
C. Irritability and movement D. Respiration and growth

(vi) Shany wanted to estimate population of a certain species on grasses at a particular place. The correct estimation can be obtained by using

A. Potter. B. Quadrant.
C. Hand lens. D. Microscope

(vii) If the eyepiece lens of microscope has magnification of 10x while its objective lens magnification is 20x. Work out for total magnification

A. 25X
B. 200X
C. 15X
D.0.2X

(viii) Scientists, engineering, doctors and geologists apply a method is solving scientific problems. This method is called_____

A. Project work B. Data recording

C. Scientific procedure D. Data collection

(ix).The statement that will summarize what a scientist has learnt from the experiment is called.

A. Data interpretation
B. Experimentation
C. Hypothesis
D. Conclusion

(x)A part of microscope which allow the observer to move the microscope body tube up and down so as to obtain the sharp focus of the specimen is

A. Rotating nosepiece
B. Fine adjustment knob
C. Eye piece lens
D. Course adjustment knob

2.Match the items in list A with the corresponding item in list B by writing the correct number beside the letter in the box provide.

.

LIST A	.LIST B
i) An apparatus for heating substance in the laboratory. ii) An apparatus used for storing test tubes so that they do not roll or break. iii)An apparatus used for measuring volume of liquids. iv)Apparatus used to magnify specimens. v) An apparatus used for keeping live aquatic animals in the laboratory.	A.Bunsen burner B.Aquarium C.Measuring cylinder D.Hand lens E.Spatula F. Test tube rack G.Filter funnel H.Test tube hold

ANSWERS

i	ii	iii	iv	V

SECTION B: (70MARKS)

Answer all questions in this section

3. (a) Biology is more that the study of Animals and plants. Explain these statements in three points

……

……

……

……

……..

(b) When form one students visited biology laboratory, they found out different equipment which were not familiar to them. As a form one student explain to them the role of the following equipment

(i) Pooter

……

……

(ii) Thermometer

……

……

……

(iii) Sweep net

……

……

4.(a).Differentiate between the following biological terms

(i) Biology laboratory and Laboratory

……

……

……

……

(ii) botany and zoology

……

……

……

……

……

(iii) Unicellular and multicellular organism

……

……

……

……

(b)If you are deliver to talk on the qualities of a good laboratory, what qualities you will Consider? (Give four points)

……

……

……

……

……

……

5.Form one students were asked to observe cells from the frog using a light microscope.

(a) Why was it necessary to use such an instrument?

……

……

……

(b) What is the name of other instrument used to magnify objects in the laboratory apart from microscope? _____

……

……

(c) Draw a light microscope and label the following parts: eyepiece, coarse adjustment, objectives, stage ,body tube and mirror.

6.(a) Fill the table below

Eye piece lens magnification	Objective lens magnification	Total magnification
6x	13x	……
……..	5x	35x
9x	……	72x
3.5x	1.5x	…….
……..	3x	24x

(b)A microscope need high care to use give four point s how you would take care the microscope .

……
……
……
……
……
……
……
……

7.(a)What is scientific procedures

……
……
……
……

(b)Outline three significances of solving a scientific problem by the use scientific procedures

……
……
……
……
……

(c) Outline scientific methods used by scientist to obtain scientific information.

……
……
……
……
……

……
……
……
……

8.(a) Fill the table below by using measurement,Si unit or instrument.

MEASUREMENT	SI-UNIT	INSTRUMENT
mass	……..	……..
……..	……	Thermometer
……	Metre(m)	…….

(b) Convert the following units

(i)10kg into g.	(ii) 40°C into ^{o}F.	(iii)20°C into K

9. Form One students in a certain secondary school were interested to know why it is necessary to study Biology. Assume you are a Biology teacher; educate these students on the importance of studying Biology by giving five points.

……
……
……
……
……
……
……..

SECTION C: 15 MARKS
Answer the following question .

10.Assume there is" **Eruption of malaria at Jangwani village**" as a young scientist who can apply scientific procedures

(i) Design the scientific question of your investigation

……
……

……
……..

(ii) state your hypothesis

……
……
……
……

(iii) Design a control and test experiment

……
……
……
……
……
……
……
……
……
……
……..

(iv) Identify dependant variable, independent variables and controlled variable

……
……
……
……
……
……
……
……
……
……
……
……
……
