PRIME MINISTER'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
ARUSHA REGION

FORM ONE TERMINAL EXAMINATION
BIOLOGY

CODE: 033
TIME: 2: 30 HRS **28th May, 2026**

INSTRUCTIONS

1. This Paper Consists of Section A, B and C with total of ten (10) questions.
2. Answer All Questions in all sections
3. Use blue or black ink to write, and HB pencil for drawings.
4. Unauthorized materials are not allowed in an examination room.
5. Write your name on **every page** of your examination.

SECTION A (15 MARKS)
Answer all questions in this section.

1. Choose the correct answer then write its letter in the space provided.

(i) _____ is an organelle found in eukaryotic cells, that plays an important role of generating energy.

A. Ribosome
B. Mitochondrion
C. Plasma membrane
D. Golgi apparatus

(ii) My uncle works at Mhimbili hospital in the career that deals with microbes such as bacteria, virus and parasites. How do we call my uncle?

A. Cytologist
B. Bacteriologist
C. Microbiologist
D. Mycology

(iii) When Jesca was sick the doctor asked stool and urine for diagnosis. Which instrument did he use to confirm the presence or absence of microorganisms in stool and urine?

A. Microscope
B. Clinical thermometer
C. Hand lens
D. Thermal detector

(iv) Which field joins with Biology in developing varieties of fast-growing trees?

A. Sociology
B. Agriculture
C. Anthropology
D. Forestry

(v) Anania wants to do scientific investigation, which right place do you advise him to conduct his activities for better results and safety insurance?

A. Hospital
B. Laboratory
C. School
D. Classroom

(vi) Which instrument can be used for picking up small organisms without hurting them?

A. Scoop net
B. Specimen bottles

REGIONAL TERMINAL EXAMINATION

C. Pooter
D. Quadrat

(vii) Which reason plains one disadvantage of using sense organs in observation?
A. It consumes time
B. It needs a competent student
C. It needs more money
D. It is based on personal interest

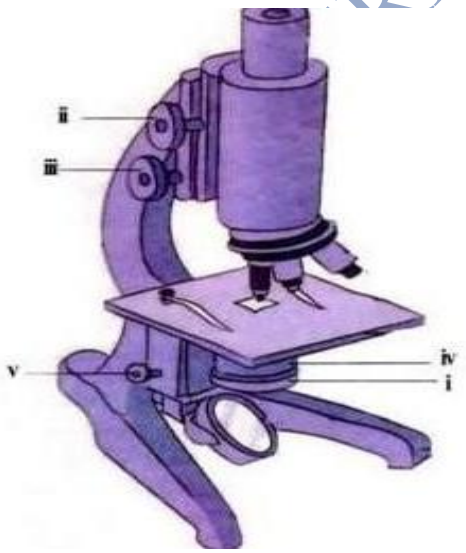

(viii) Biology students were assigned to observe the external features of variety of preserved specimen. Which sense organ would they use to observe?
A. Ears
B. Eyes
C. Tongue
D. Skin

(ix) Life of all living organisms are carried in the smallest part which cannot be seen by naked eye. How do we call that part?
A. Cell
B. Heart
C. Blood
D. Sense organ

(x) The word biology originates from Greek terms **'bios'** and **'logos'**. What do the word logos means?
A. Life
B. Study
C. Things
D. Microbes

Question	(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)	(viii)	(ix)	(x)
Answer										

2. Match the phrase in **LIST A** with responses in **LIST B** by writing the letter of the correct response in a table provided

LIST A	LIST B
	A. It provides firm support for the microscope B. Concentrates light onto the specimen that is placed on the stage. C. Rises or lower the body tube in order to bring the image into focus. D. Support the objective lenses. E. Rises or lowers body tube in order to bring the image into sharp focus. F. Rises and lowers the stage to keep the specimen in the right position for observation G. Regulates the amount of light passing from the mirror to the condenser

LIST A	(i)	(ii)	(iii)	(iv)	(v)
LIST B					

SECTION B (70 MARKS)

RE TERMINAL EXAMINATION

Answer all questions in this section

3. (a) What is Biology laboratory?

……
……
……
……

(b) Biology laboratory is equipped to meet the needs of laboratory users especially during conducting scientific investigation. Give five qualities of a biology laboratory.

……
……
……
……
……
……
……

4. (a) Life is the state that distinguishes living from non-living things, which characteristics that distinguish living from nonliving things?

……
……
……
……
……
……
……

(b) Biology is more than a study of animals and plants. Explain

……
……
……
……

5. How can you compare the following terms?

(a) Anatomy from Physiology

……
……
……

(b) Cytology from Microbiology

……
……
……

(c) Botany from zoology

……
……
……

(d) Unicellular from multicellular organisms

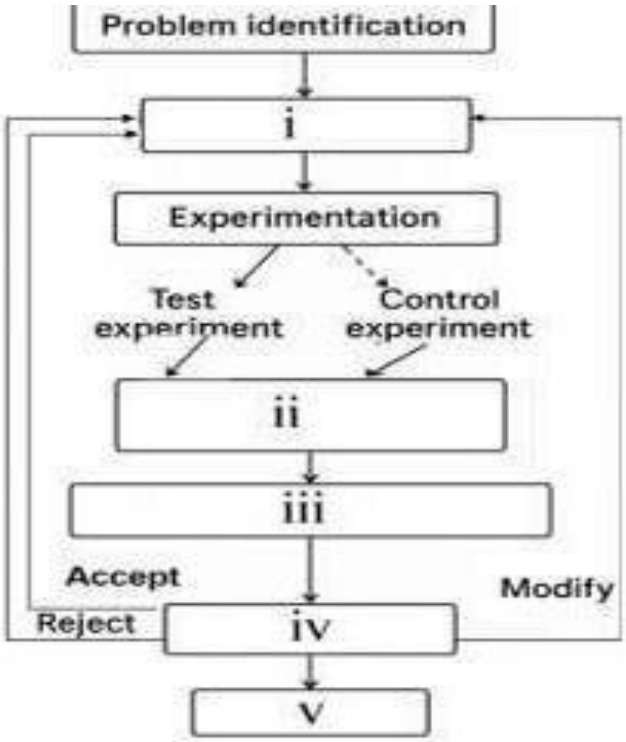

……
……

(e) Prokaryotic from eukaryotic cell

……
……

REGIONAL TERMINAL EXAMINATION

6. (a) Scientific research is a never-ending process, as shown in figure below. Complete the missing procedures

(i)_____
(ii)_____
(iii)_____
(iv)_____
(v)_____
(vi)_____

(b) If your results do not support the hypothesis, what will you do?

……
……
……

7. (a) Draw a large and well labelled diagram of a plant cell. (label at least five parts)

8. a) what do you understand about classification?

……

……

(b) Why do you think most of scientists do not prefer the use of artificial classification system? (give five reasons)

.....

.....

.....

.....

.....

9. (a) Name the instrument you would use to measure the following and state the corresponding SI units.

(i) Mass……

……

(ii) Time……

……

(iii) Time……

……..

(iv) Temperature

……

……

(v)Length

……

……..

(b) During an experiment, a scientist noticed that some of the factors can be manipulated. What is general term used to refer to such factor?

……

……

SECTION C (15MARKS)
Answer the following question

10. Biology as among the fundamental branch of science has been involved directly in solving different problems in the society. As biologist, support this statement by explaining the usefulness of studying biology.

……

……

……

……

……

……

……

……

……

……
