PRESIDENT'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENTS
ILEMELA MUNICIPAL COUNCIL

FORM ONE DISTRICT JOINT EXAMINATION

CODE: 033 **BIOLOGY**

Time:2:30 **May, 2025**

Instructions

1. This paper consists of sections **A, B** and **C** with a total of ten **(10)** questions.
2. Answer **all** questions in the spaces provided.
3. Section **A** carries **fifteen (15)** marks, section **B seventy (70)** marks and section **C fifteen (15)** marks.
4. All writings must be in blue or black ink **except** diagrams which must be in pencil.
5. All communication devices, and any unauthorized materials are **not** allowed in the Mock Assessment room.
6. Write your **Name** at the top right corner of every page.

SECTION A (15 Marks)

Answer **all** questions in this section.

1. For each of the given items (i)-(x) choose the correct answer from among the given alternatives and write its letter in the table provided.

(i) Trees are important for the environment. Which of the following is not a way biology helps in forestry?

A. Growing plants in a nursery
B. Protecting forests from drying out.
C. Choosing trees that grow in dry areas
D. Buying trees from other countries

(ii) You need to measure the height of a small plant. Which tool will you use?

A. Ruler
B. Vernier caliper
C. Tape measure
D. Measuring cylinder

(iii) A doctor checks if a patient has a fever. Which tool should a doctor use?

A. Scale
B. Thermometer
C. Barometer
D. Hygrometer

(iv) Mr. Donald studies animal and plants. What is the best name for his job?

A. Zoologists
B. Botanist
C. Biologist
D. Cytologist

(v) All living things are made of small units. Which of these is the smallest unit of life?

A. Tissue
B. Amoeba
C. Cell
D. Organ

(vi) Living things grow, move, and reproduce. What do we call this state of being alive?

A. Biology
B. Life
C. Cell
D. Organism

(vii) The word "Biology" comes from Greek words *bios* and *logos*. What does *bios* mean?

A. Cell
B. Study
C. Life
D. Organism

(viii) Animals and plants interact with their surroundings in different ways. What do we call this relationship?

A. Ecology
B. Physiology
C. Genetics
D. Anatomy

(ix) You want to see tiny objects more clearly in a science laboratory. Which tool should you use?

A. Petri dish
B. Spatula
C. Hand lens
D. Crucible

(x) A microscope helps us see tiny things. Which of these is *not* a part of a microscope?

A. Stage
B. Coarse adjustment knob
C. Eyepiece
D. Light

2. Match the statements in List A with the correct item in List B by writing its letter below the numbers of the corresponding in the List A in the table provided.

List A	**List B**
(i) Cleaning and drying wounds	(i) Safety pins
(ii) Washing hands, wounds and equipment.	(ii) Pain killer
(iii) Blown to call for help	(iii) Thermometer
(iv) Reducing muscles pain.	(iv) Liniment
(v) They should be replaced regulary.	(v) Whistle
	(vi) Soap
	(vii) Cotton wool
	(viii) Petroleum jelly

Answers

List A	(i)	(ii)	(iii)	(iv)	(v)
List B

SECTION B (30 Marks)

Answer **both** questions in this section

3. **(a)** Identify the field and branch of Biology that you will use to solve the following problems.

   i. Helping a person with a broken leg

   _____

   _____

   ii. Protecting cattle from tsetse flies

   _____

   _____

   iii. Conserving village river from drying.

   _____

   _____

   (b) Ashura is a Form One student. She does not like Biology and thinks it is not useful. If you were her friend, how would you explain to her that Biology is important is important in life? Give **four (4)** reasons.

   (i) _____

   _____

   (ii) _____

   _____

   (iii) _____

   _____

   (iv) _____

   _____

4. (a) Khamis is doing a science experiment. He needs to use his sense organs to make observations. Which sense organs can he use and state the function of each sense organ.

   _____

   _____

   _____

   _____

   _____

   _____

(b) Scientists sometimes use tools like thermometers and rulers instead of their sense organs. Why do you think using tools can be better than using our senses.

_____

_____

_____

_____

(c) Your teacher asks you to measure different things in the laboratory. Write the correct SI-unit you would use for:

(i) The time it takes for a seed to grow._____

(ii) The mass of a stone _____

(iii) The length of your desk _____

(iv) The temperature of hot water_____

5. A person was involved in a bicycle accident and sustained serious injuries. You are the first person to arrive at the accident scene.

(a) Name the kind of assistance would you provide to the injured person immediately after the accident.

_____

(b) Why would you encourage others to offer similar assistance in such situations? Give **four (4)** reasons.

(i) _____

_____

(ii) _____

_____

(iii) _____

_____

(iv) _____

_____

(c) What **four (4)** precautions should be taken when providing the assistance mentioned in (a) above to a victim of a snake bite?

(i) _____

_____

(ii) _____

_____

(iii) _____

_____

(iv) _____

_____

6. **(a)** Imagine you are in the school laboratory, and your teacher asks you to define the term microscope. How would you define it correctly in simple words.

_____

_____

_____

(b) There are different types of microscopes used in science. Can you mention at least **two (2)** types?

(i) _____

(ii) _____

(c) Your teacher gives you a microscope to use in class. How would you explain the function of these parts?

(i) Base

_____

_____

(ii) Stage

_____

_____

(iii) Eyepiece lens

_____

_____

(d) In an experiment, a microscope has a total magnification of **x250**, and the eyepiece lens has a magnification of **x25**. Calculate the magnification of objective lens.

_____

_____

_____

_____

_____

7. **(a)** Why is a cow considered a living thing? Provide **five (5)** reasons to support your answer.

(i) _____

_____

(ii) _____

_____

(iii) _____

_____

(iv) _____

_____

(v) _____

_____

(b) In a biology laboratory, various apparatus and equipment are used for conducting experiments. Name the apparatus used for:

(i) Catching small insects : _____

(ii) Measuring the mass of a substance: _____

(iii) Washing a test tube: _____

(iv) Measuring the volume of a liquid: _____

(v) Adding liquid drop by drop: _____

8. **(a)** A laboratory is designed to be a safe place for experiments. Explain why it is important for a laboratory to have the following features:

(i) Doors that open outward

_____

_____

(ii) A good supply of fresh air

_____

_____

(iii) A reliable supply of water

_____

_____

(b) Imagine you are teaching a new student how to stay safe in the laboratory. Outline **four (4)** important rules that everyone should follow when working in the laboratory.

(i) _____

_____

(ii) _____

_____

(iii) _____

_____

(iv) _____

_____

9. Biology is an important subject that helps us understand different areas of life. Explain how biology is related to the following fields:

(i) Agriculture

_____

_____

(ii) Medicine

_____

_____

(iii) Nutrition

_____

_____

(iv) Pharmacy

_____

_____

Student's name: ……..

SECTION C (15 Marks)

Answer question **ten (10)**

10. Describe **five (5)** laboratory apparatus made of glass materials by naming each, describing it, explaining its function, and drawing a well-labeled diagram for each

Name of apparatus and its description	**Function**	**Diagram**
(i)		
(ii)		
(iii)		
(iv)		

(v)
