SECTION A (15 MARKS)

1. Select the most correct answer in each item and write its letter beside its corresponding item number.

(i) The next step after hypothesis formulation in the scientific procedure is known as
- (A) Data collection
- (B) Experimentation
- (C) Data analysis and interpretation
- (D) Asking questions

(ii) One of the following is the most proper way of disposing waste:
- (A) Burying
- (B) Burning
- (C) Sanitary landfill
- (D) Open dumps

(iii) One of the following is an example of an epidemic disease
- (A) Malaria
- (B) Cancer
- (C) Cholera
- (D) Heat attack

(iv) When viewing objects under the microscope, a student at Seypalm Secondary school used X15 eye piece lens and X5 objective lenses. Find the total magnification.
- (A) X3
- (B) X75
- (C) X20
- (D) 150

(v) Which of the following would be the first step in scientific research procedure?
- (A) Conclusion
- (B) Experimentation
- (C) Hypothesis formulation
- (D) Identification of the problem

(vi) Which among the following is a set of sexual transmitted disease?
- (A) HIV/AIDS, Cancer and gonorrhea
- (B) Syphilis, HIV/AIDS and gonorrhea
- (C) Tuberculosis, HIV/AIDS and Syphilis
- (D) Cancer, gonorrhea and syphilis

(vii) Which of the following would be the first line of defense as far as immunity is concerned?
- (A) White blood cells
- (B) Skin
- (C) Red blood cells
- (D) Tears

Candidate's Name/Index Number……..

(viii) A condition in which a person has a difficult in breathing due to swallowing excess water is called:
- (A) Choking
- (B) Drowning
- (C) Fainting
- (D) Dying

(ix) Which of the following component of the first aid kit would you use in case of suffering a minor cut on your finger?
- (A) Elastic bandage
- (B) Liniment
- (C) Methylated spirit
- (D) Petroleum jelly

(x) What does one of the two main branches of Biology resents?
- (A) Scientific study of animals
- (B) Scientific study of matter in relation to energy
- (C) Scientific study of composition of matter
- (D) Scientific study of medicine

Answers:

i	ii	iii	iv	v	vi	vii	viii	ix	x

2. Match the phrase or term in list A with that in list B by writing its letter against the number of item in list A.

LIST A	LIST B
(i) It is located at the top of the body tube and it is used to magnify specimen after having been magnified by the objective lens. (ii) A hollow tube that support the eyepiece and the revolving nose piece. (iii) The place where the slide with specimen to be observed is placed. (iv) It is located below the stage and is used to concentrate light on the specimen. (v) It is used to regulate the amount of light passing through the condenser.	A. Stage B. Mirror C. Ocular lens D. Coarse adjustment knob E. Condenser F. Fine adjustment knob G. Diaphragm H. Body tube

i	ii	iii	iv	v

Candidate's Name/Index Number……..

SECTION B (70 Marks)

Answer ALL questions from this section

3. When form one students were observing the environment with their biology teacher, they saw a lizard on a stone. Briefly explain any five characteristics that are observed in the lizard but are not observed in the stone.
