THE PRESIDENT'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
LONGIDO DISTRICT

FORM ONE ANNUAL EXAMINATION
033 BIOLOGY

Time: 2½ Hours **November 2025**

Instructions

1. This paper consists of **three** sections **A**, **B**, and **C** with a total of **ten** questions.
2. Attempt **all** questions.
3. All answers must be written in the spaces provided.
4. Write your examination number on every page in this question paper.
5. All writing must be in blue/black ink. Diagrams must be drawn in pencil and labeled in ink.
6. Cell phones and calculators are not allowed in the examination room

QUESTIONS	MARKS	INITIAL

10.		
TOTAL		

SECTION A (15 MARKS)

1. Choose the correct answer for each item and write its letter in the box provided.

(i) The basic functional and structural unit of all living organisms is the:

A. Tissue.
B. Cell.
C. Organ.
D. System.

(ii) Which of the following is not a characteristic of living things?

A. Locomotion.
B. Photosynthesis.
C. Respiration.
D. Excretion.

(iii) The instrument used to observe tiny living organisms is a:

A. Telescope.
B. Microscope.
C. Periscope.
D. Thermometer.

(iv) Virus that infects and multiplies within bacteria is called

A. Prokaryote
B. Bacteriophage
C. Microorganism
D. Eukaryotes

(v) What happens during photosynthesis leading to the production of carbohydrate?

A. The oxygen from photolysis of water is combined with the carbon dioxide from the atmosphere
B. The hydrogen from photolysis of water is combined with the carbon dioxide from the atmosphere
C. The chlorophyll in the chloroplast is combined with the carbon dioxide from the atmosphere
D. The carbon from carbon dioxide is dissolved in the absorbed water

(vi) The process by which plants use sunlight to manufacture their own food is called:

A. Respiration.
B. Osmosis.
C. Photosynthesis.
D. Transpiration.

(vii) Which of the following distingushes mushrooms from coconut trees?

A. Mushrooms store carbohydrates in form of starch
B. Mushrooms store carbohydrates in form of glycogen
C. Mushrooms do not store carbohydrates
D. Mushrooms do not have cell walls

(viii) During a laboratory experiment, a student observed a cell with a nucleus that was not enclosed by a membrane. Based on this observation, from which type of organism was the cell most likely taken?

A. Human being
B. Maize
C. Bacterium
D. Virus

(ix) Why are bryophytes the most primitive plants on earth?

A. They grow on wet area they do not produce seed
B. They reproduce asexually and sexually
C. They lack vascular tissue
D. They lack Vascular tissue

(x) The simplest form of classifying living things is known as the:

A. Artificial system of classification.
B. Natural system of classification.
C. Phylogenetic system of classification.
D. Kingdom classification.

(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)	(viii)	(ix)	(x)

2. Match the items in **List A** with their corresponding descriptions in **List B**.

List A	**List B**
(i) Prokaryotic (ii) Cell membrane (iii) Photosynthesis (iv) Ribosomes (v) Cork cell	A. Controls the entry and exit of substances in an animal cell. B. Has membrane bound organelles, for example, amoeba C. The first living cell seen by Robert Hooke. D. Prevents diseases by inducing immunity. E. A process in which plants make their own food. F. Spherical bodies found in the nucleus and in the cytoplasm responsible for protein synthesis. G. Lacks membrane bound organelles, example; bacteria H. Oval-shaped organelles with double membranes responsible for production of energy

LIST A	(i)	(ii)	(iii)	(iv)	(v)
LIST B					

SECTION B (70 MARKS)

3. (a) Define the term Biology.

……

……

(b) Even if taking Biology may not be compulsory, students are strongly advised to study it. In four points, explain why the students are given such advice.

(i) ……

……

(ii) ……

……

(iii)……

……..

(iv)……

……

4. (a) Plants and animal cells do basically share a lot of features in common. Outline three similarities between those two types of cells.

(i) ……

……..

(ii) ……

……..

(iii)……

……..

(b) Draw a well-labelled diagram of a plant cell as seen under a light microscope.

5. (a) Explain the term binomial nomenclature.

……

……

(b) Give four characteristics of the kingdom Monera.

(i) ……

……

(ii) ……

……

(iii)……

……

(iv)……

……

6. (a) Mushrooms, yeasts, and mucor or the bread mould are assigned different phyla, but also possess some common features that keep them under the same kingdom. State the phylum of each one of them and one main feature they all share in common.

……

……

……

……

(b) Outline four advantages of the kingdom to which the mushroom, yeasts, and mucor belong.

(i) ……

……

(ii) ……

……

(iii)……

……

(iv)……

……

7. Briefly explain the following branches of Biology:

(i) Anatomy:

……

……

……

(ii) Histology:

……

……
…….

(iii)Microbiology:

……
……
……

(iv)Bacteriology:

……
……
…….

(v) Virology

……
……

8. (a) (i) What is photosynthesis?

……
……

(ii) Outline the way green plants utilizes the necessary conditions and raw materials for photosynthesis.

……
……
……

(b)Why is photosynthesis a vital process for all living organism? Give four reasons.

(i) ……
……

(ii) ……
……

(iii)……
……

9. Seypalm Secondary School is building a Biology laboratory. As one of the brightest Biology students, advise them in ten points on the qualities the laboratory should have in order to be the best Biology laboratory in Tanzania.

(i) ……
……

(ii) ……
……

(iii)……
……

(iv)…….

……

(v) ……

……

(vi)…….

……

(vii) ……..

…….

(viii) ……

……

(ix)……

……..

(x) ……

……

SECTION C (15 MARKS)

10. Suppose you are invited to take part in the debate with the motion which states that "Scientists should find a way to get rid of all bacteria". Oppose the motion by giving six reasons.

……

……

……

……

……

……

……

……

……

……

……

……

……
