Student's Full Name: ……

THE CATHOLIC DIOCESE OF SAME
KINDOROKO GIRLS' SECONDARY SCHOOL
FORM ONE MARCH MID – TERM EXAMINATIONS

033 BIOLOGY

Time: 2:30 Hours **Year: 2025**

Instructions

1. This paper consists of sections A, B and C with a total of **ten (10)** questions.
2. Answer **all** questions in the spaces provided.
3. Section A and C carry **fifteen (15)** marks each and section B carries **seventy (70)** marks.
4. Except for drawings which must be drawn in pencil, all writings must be in **blue** or **black** ink.
5. Cellular phones, calculators and any unauthorized materials are **not** allowed in the examination room.
6. Write your **Name in Full** on the top right hand corner of every page.

KINDOROKO MID - TERM 2025

APR2025

Student's Full Name: ……

SECTION A (15 Marks)

Answer **all** questions in this section

1. For each of the items (i) – (x), choose the correct answer from among the given alternatives and write its letter besides the item number in the space provided.

(i) The process of enlarging very small things by using a hand lens or microscope so that they can be seen clearly is known as:

A Biological experiment B Scientific process
C Magnification D Measurement

(ii) A car can move and give out some waste products. Why is it termed as a non-living thing?

A Because it cannot feed and respire
B Because it can sense and reproduce
C Because it can breathe and die
D Because it can grow, sense, feed, respire and excrete

(iii) The knowledge of biology can help farmers to achieve high production in all of the following ways, **EXCEPT:**

A Making plant vaccines and hormones
B Making fertilizers and manures
C Understanding the signs of different plant diseases and how to treat them
D Preparing suitable food and diets so that the plants can eat

(iv) Which of the following is correct about measurements?

Answer	**Measurement**	**Instrument Used**	**SI Unit**
A	Mass	Beam balance	Kilogram (Kg)
B	Length	Tape measure	Centimetre (cm)
C	Temperature	Thermometer	Degrees Celcius (°C)
D	Time	Watch glass	Second (s)

(v) Which of the following is considered as the basic structural and functional unit of life?

A Microbes B Sense organs
C Life processes D Cell

(vi) Biology helps people to prepare proper diets so as to avoid different nutritional disorders. Which disorder occurs when a person consumes excess fats and oils?

A Marasmus B Kwashiorkor
C Obesity D Rickets

(vii) Biologists are interested to study all of the following things, **EXCEPT:**

A Mushroom, bacteria, mosses and kangaroo
B Flamingo, penguin, conifers and yeast
C Hibiscus, rocks, zebra and water
D Bacteria, cockroach, rat and ferns

(viii) Biology is simply **bios** and **logos**. This is to say that:

A It is the study and life
B It is the study of life
C It is the study and science
D It is the science and life

(ix) Rosegrace is planning to become a botanist in future. Therefore, she will mainly deal with:

A The study of animals
B The study of microorganisms
C The study of classification
D The study of plants

(x) Through studying biology, we come to understand many things about our bodies. From this point of view, what is the normal constant temperature of the human body?

A 28.6℃
B 39.6℃
C 36.9℃
D 31.8℃

ANSWERS

QUESTION	(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)	(viii)	(ix)	(x)
ANSWER										

2. Match the characteristics of living things in **List A** with their correct definitions in **List B** by writing its letter below the number of the corresponding item number in the space provided.

LIST A	**LIST B**
(i) Growth	A The act of changing position
(ii) Movement	B Removal of metabolic wastes from the body
(iii) Nutrition	C Permanent increase is size and dry mass of an organism
(iv) Excretion	D Breaking down of food in living cells to produce energy
(v) Respiration	E The process by which an organism obtains food from the environment necessary for its survival
	F The act of responding to the stimuli
	G Giving rise to new ones of the same kind

ANSWERS

LIST A	(i)	(ii)	(iii)	(iv)	(v)
LIST B					

SECTION B (70 Marks)

Answer **all** questions in this section

3. (a) Distinguish between micro-organisms and microbiology. ……

……...……

……...……

……...……

……...……

(b) Outline any three examples of microorganisms you know.

(i) ..……

(ii) ..……

(iii) ..……

(c) Briefly explain why it is important for students and other people to do physical exercises.

……...……

……...……

……...……

……...……

4. As a good student of form one, explain five reasons as to why it is important to study biology.

(i) ..……..

..……..

(ii) ..……..

..……..

(iii) ..……..

..……..

(iv) ..……..

..……..

(v) ..……..

..……..

5. Explain any five minor branches of biology and give examples where necessary.

(i) ..……..

..……..

(ii) ..……..

..……..

(iii) ..……..

..……..

(iv) ..……..

..……..

(v) ..……..

..……..

6. (a) Give the difference between botany and botanist. ….……...

……...……

……...……

……...……

(b) Maryclara plans to become a medical doctor in future. Explain briefly how she will apply the knowledge of biology in her future career.

……...……

……...……

(c) We are advised to plant trees in our environment and avoid cutting trees unnecessarily and burning bushes. What is the importance of trees and forests? Provide four points.

(i) ..……

(ii) ..……

(iii) ..……

(iv) ..……

7. (a) The table below shows some apparatii commonly used during biological studies. Complete it appropriately.

S/N	APPARATUS NAME	DIAGRAM	USES
(i)	Sweep net		
(ii)	Fish (Scoop) net		
(iii)	Mortar and pestle		

(b) The figure below shows a specimen which was magnified by using a hand lens. Using your ruler, measure the length of the specimen and that of its image and then the magnification of the specimen.

Specimen

Image of the Specimen

8. Dativa Kandatta and her sister Sharon Kandatta went to the school garden during class hours and without teacher's permission. In the garden, they saw a big mango tree where they picked and ate some mangoes without washing them. The mangoes were smooth and yellow in colour. They also had a good smell and sweet taste.

(a) Which sense organ did Dativa and Sharon use to discover that the mangoes:

(i) Were yellow in colour. ……..

(ii) Were smooth ……..

(iii) Had a good smell ……..

(iv) Were sweet? ……..

(b) What type of behaviour is shown by Dativa and Sharon in this case? …….

(c) Name three diseases that these students may contract by eating mangoes in the way they did.

(i) ..……

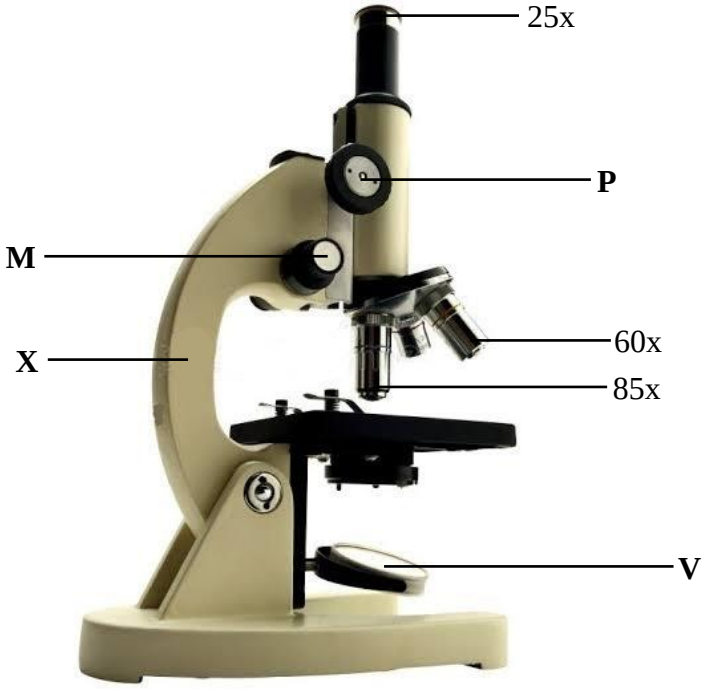

(ii) ..……

(iii) ..……

SECTION C (15 Marks)

Answer the question **ten (10)** below

9. Form one students at Kindoroko girls' secondary school conducted an experiment to observe the **cells of the onion bulb** using a light microscope. The diagrammatic setup of their microscope is shown in the figure below. Study it carefully and then answer the questions that follow.

(a) (i) Why was is necessary to use the light microscope in such experiment?

……

……

(ii) Which part of the light microscope did they use to obtain a clear focus of the specimen?

……

(b) What is the function of the parts labeled **V** and **X**?

V ……

X ……

(c) What was the total magnification of the specimen that was being observed?

……

……

……

……

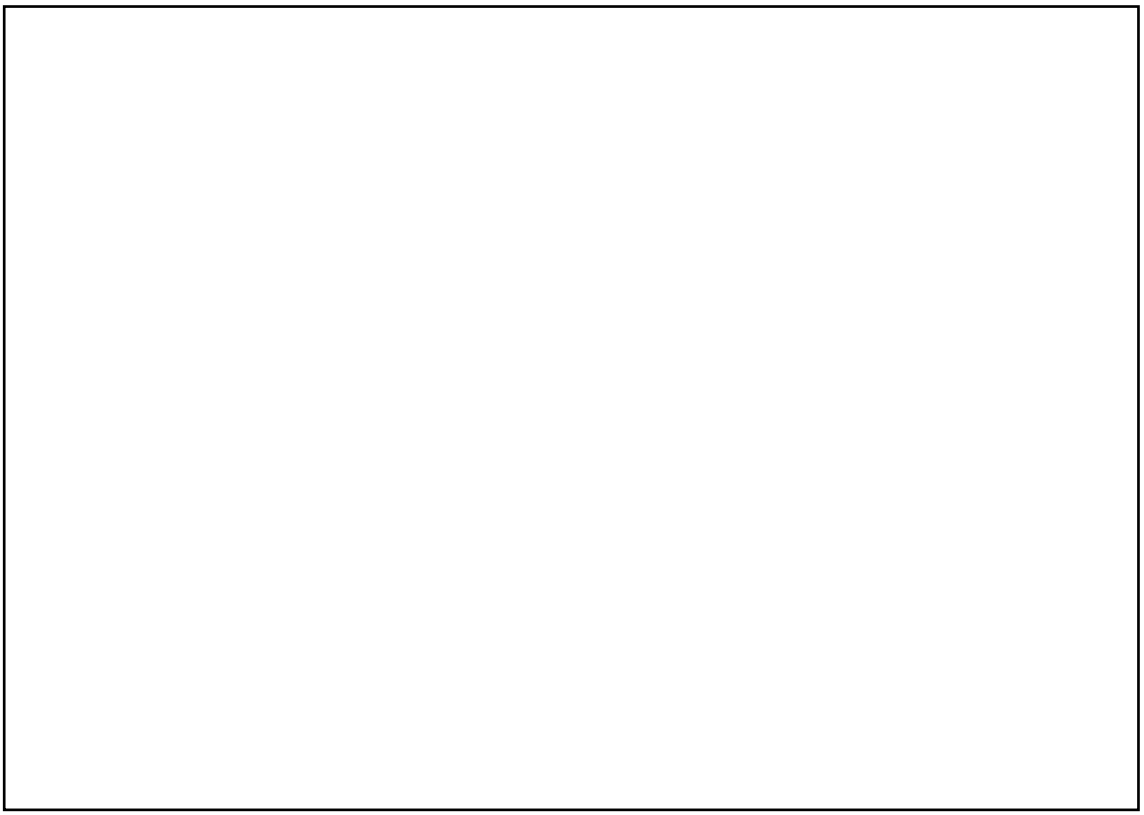

……

……

……

……

(d) Draw the diagram of a cell that was observed during this experiment and label five parts.

(e) Which precautions would you propose to the students on how to care for the microscope? Provide four points.

(i) ..……

(ii) ..……

(iii) ..……

(iv) ..……
