Student's Full Name: ……

THE CATHOLIC DIOCESE OF SAME
KINDOROKO GIRLS' SECONDARY SCHOOL
FORM ONE SECOND CONTINUOUS ASSESSMENT TEST

033 **BIOLOGY**

Time: 2:00 Hours **Year: 2025**

Instructions

1. This paper consists of sections A, B and C with a total of **ten (10)** questions.
2. Answer **all** questions in the spaces provided.
3. Section A and C carry **fifteen (15)** marks each and section B carries **seventy (70)** marks.
4. Except for drawings which must be drawn in pencil, all writings must be in **blue** or **black** ink.
5. Cellular phones, calculators and any unauthorized materials are **not** allowed in the assessment room.
6. Write your **Name in Full** on the top right hand corner of every page.

KINDOROKO F1 CAT 2 - 2025

Student's Full Name: ……

SECTION A (15 Marks)

Answer **all** questions in this section

1. For each of the items (i) – (x), choose the correct answer from among the given alternatives and write its letter besides the item number in the space provided.

(i) Subjects that form natural science include:

A Chemistry and Geography B Physics and History
C Biology and Physics D English and Chemistry

(ii) The scientific study of viruses is called:

A Microbiology B Bacteriology
C Cytology D Virology

(iii) The following fields are highly related to biology, **EXCEPT:**

A Agriculture and Nursing B Bios and Pharmacy
C Nutrition and Medicine D Forestry and Veterinary

(iv) We are **not** supposed to put petrol near the burning flames. This is because:

A Petrol catches fire easily
B Flame is a region of burning fire
C Flames can be luminous or non-luminous
D Petrol is not cold like water

(v) You can measure three liters of cooking oil by using:

A A measuring cylinder B A pair of tongs
C A stopwatch D A frying pan

(vi) If you have been given meat that you cannot cook and eat at once, and you need to keep it until three days later, what can you do to the meat?

A Eat it all B Put it in the dustbin
C Keep it in the refrigerator D Keep it in a bucket of water

(vii) When a bread is left for three weeks in a wet place, the certain greyish structures grow on it. These structures are known as**:**

A Mushrooms B Moss plants
C Yeast D Bread molds

(viii) Which of the following is an indicator of good manners?

A Talking while eating B Tearing books of your fellow student
C Wearing wet pants D Greeting people

(ix) Some bacteria can live in absence of oxygen and in hostile environment such as in rust. Which of the following is a rust-borne bacteria and it causes of tetanus?

A *Streptococcus pneumoniae* B *Clostridium tetani*
C *Yersinia pestis* D *Mycobacterium tuberculosis*

(x) Which of the following is **correct** about the leaf of hibiscus plant?

A It is short and broad
B It is thin and long
C It has parallel veins
D It is yellow in colour

ANSWERS

QUESTION	(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)	(viii)	(ix)	(x)
ANSWER										

2. Match each of the sets in **List A** with the branches of biology in which they are studied in **List B** by writing its letter below the corresponding item number in the space provided.

LIST A	**LIST B**
(i) Maize, mosses, baobabs, sunflowers, ferns	A Mycology
(ii) Yeast, bread mould, mushroom, mucor	B Entomology
(iii) Amoeba, bacteria, virus, plasmodium	C Virology
(iv) Housefly, mosquito, grasshopper, bee	D Botany
(v) Plant cell, animal cell, bacteria cell	E Cytology
	F Microbiology
	G Bacteriology

ANSWERS

LIST A	(i)	(ii)	(iii)	(iv)	(v)
LIST B					

SECTION B (70 Marks)

Answer **all** questions in this section

3. (a) What is taxonomy? ……...…..……...

……...……

(b) Living things are placed into five major groups called Kingdoms. Analyze any four Kingdoms and give two examples for each.

(i) ..……

..……

(ii) ..……

..……

(iii) ..……

..……

(iv) ..……

..……

4. (a) What is the laboratory? ……

……...……

……...……

(b) What should you do so as to avoid accidents when working in the biology laboratory? Provide four points.

(i) ……..

(ii) ……..

(iii) ……..

(iv) ……..

(c) Malaria is caused by plasmodium which is spread from one person to another by mosquitoes. How can you prevent yourself from getting malaria? Give three points.

(i) ……..

(ii) ……..

(iii) ……..

5. (a) What is the importance of using SI-Units during scientific activities? Give two points.

(i) ……..

(ii) ……..

(b) By using four points, briefly explain how you will use sense organs to make observations.

(i) ……..

(ii) ……..

(iii) ……..

(iv) ……..

(c) Convert the following units as instructed:

(i) 793 grams into kilograms

(ii) 4.1 meters into centimeters

6. (a) When conducting a scientific study, there are steps to be followed. The first one is ***Problem Identification*** and the second is ***Hypothesis Formulation***. Outline the next three steps.

   (i) ……..

   (ii) ……..

   (iii) ……..

   (b) (i) What is a hypothesis? ..……

   ……..

   (ii) What is the purpose of conducting an experiment?

   ……..

   ……..

   (c) State any problem that you have observed in your environment and formulate one hypothesis to that problem.

   Problem: ……..

   ……..

   Hypothesis: ……..

   ……..

   (d) The headmaster of Kaloleni Secondary School wanted to find out the solution for "***Why form two students fail Mathematics***". He wanted to test if the teacher was incompetent. He brought three different teachers and ordered them to teach by using the same book. From this information, state the type of variables shown by the following:

   (i) Changing the teacher: ……..……..

   (ii) Keeping the teaching book constant: ……..……..

   (iii) Testing if the teacher was incompetent: ……..……..

7. Identify five scientific fields and state two ways in which biology is applied in each field.

   (i) ……...……

   ……...……

   (ii) ……...……

   ……...……

   (iii) ……...……

   ……...……

   (iv) ……...……

   ……...……

   (v) ……...……

   ……...……

8. (a) (i) In which place can you find moss plants? ……...

(ii) Which apparatus can you use to catch butterflies? ……..

(iii) Why are we supposed to boil drinking water? ……

..……

(iv) Why is the cell called the basic unit of life? ……....

..……

(v) Which branch of science is concerned with the study of life? ……

(vi) What is the SI-Unit of temperature? …….....

(b) Draw a neat diagram of mushroom and label any three parts.

9. (a) Differentiate between the following pairs of biological terminologies:

(i) Bios and Logos

..……

..……

..……

(ii) Cage and Aquarium

..……

..……

..……

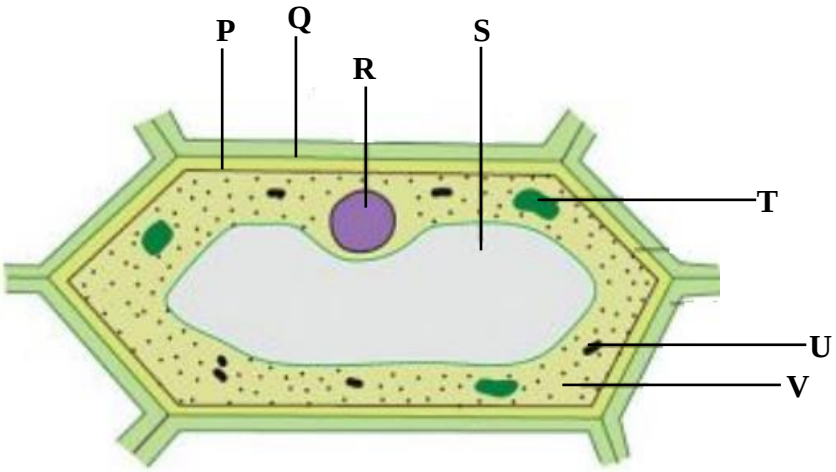

(b) Observe carefully the pictures below and identify the characteristics of living things that is being demonstrated in each picture.

PICTURE	CHARACTERISTIC OF LIVING THINGS
	
	
	
	

SECTION C (15 Marks)

Answer the question **ten (10)** below

10. (a) Carefully observe the cell below and then answer the questions that follow:

(i) State the name of the cell above. …….

(ii) What type of cell is illustrated by the diagram above? ……...

(iii) Give the reason for your answer in (ii) above. ……

……..

(iv) Name the parts labeled **P, Q, R, S, T, U** and **V**.

P ……..

Q ……..

R ……..

S ……..

T ……..

U ……..

V ……..

(v) Which parts of the cell above are **NOT** found on the cell of cockroach? Give two parts.

……..

……..

(b) Scientists have their own belief on cells which is clearly described as the cell theory. Identify four main ideas of the cell theory.

(i) ……..

(ii) ……..

(iii) ……..

(iv) ……..
