REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
MPWAPWA DISTRICT COUNCIL

FORM TWO PRE MOCK II EXAMINATION
040 - MATHEMATICS

TIME: 2:00 HRS **MARCH 2026**

Instructions

LUSAELIMU.COM

1. This paper consists of ten (10) questions
2. Answer all questions showing clearly all the working and answers
3. Each questions carries ten (10) Marks
4. All writing must be blue or black ink, except drawings which must be in pencils
5. Non- Programmable calculators, geometrical instruments and graph papers may be used where necessary
6. Communications devices and any unauthorized materials are not allowed in the examination room.

1. (a) Change $0.8\dot{3}$ into fractions
   (b) Ntyuka secondary school has 120 staff members, where 30 are men and the rest are women. What is the ratio of men and women in the school?

2. a) Mwanaisha bought story books for 200 AUD (Australian Dollars). How much did she spent in Tanzanian shillings if the exchange rate was 1AUD to Tanzanian shillings 1809/-
   (b) If 8 men can assemble 16 Machines in 12 days, How long will it take 15 men of the same ability to assemble 80 machines?

3. (a) The population of three towns are 65,600, 13,400 and 29,700. Approximate the total population of three towns to the nearest thousands.
   (b) Rehema spent 1/8 of her salary on transport and ¼ on food. If she remained with sh. 80,000/- What was her salary?

4. (a) Mention two conditions for two polygons to be similar
   (b) If the rectangular metal sheets ABCD and WXYZ are similar, Calculate the length of XY when AB = 2cm, BC = 4cm and WX = 2.5cm

5. The sum of two numbers is 127. If the difference between the numbers is 7. Find the numbers.

6. (a) Solve for the value of y if $\frac{8}{3y-2} = 2$

   (b) The sum of a number and its 40% is 28. Find the number.

7. A straight line passes through the points P(-4,5) and Q(-2, 1). Find its:

   (a) Gradient (b) x and y- intercepts

8. If 5 is subtracted from twice a certain number, the result is less than 11. Find the number.

9. (a) If P Δ Q = 2P + 5Q. Find the value of 6 Δ 3.
   (b) The simple interest I, on principal P, for time T years and at the rate of R% per annum is given by the formula I = $\frac{PRT}{100}$ Make R the subject of the formula.

10. (a) Find the exact value of $60001^2 - 59999^2$
    (b) Solve for the value of P if $P^2 - 5P + 6P = 0$.
