PRESIDENT'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
LONGIDO DISTRICT JOINT EXAMINATION
FORM ONE BIOLOGY

TIME 2:30hrs
INSTRUCTIONS

1.This paper consist of section A and B
2.Answer all questions in all sections
3.Write your name on every page of your answer paper
4.Use pencil for drawing

SECTION A (30 MARKS)

1.Select the correct answer in each of the following items and write its letter in the space provided

(i)Animal cell contain all structure except (a)Cytoplasm (b)Chloroplast (c)Nuclear (d)Cell membrane

(ii)All are the characteristics of living things except (a)Evolution (b)Movement (c)Growth (d)Nutrition

(iii)Zoology and Botany both refer as a study of (a) Live (b)Plant (c)Living thing (d)Animals

(iv)Chemical substance that can catch fire easily (a) corrosive (b)flammable (c)toxic (d)irritant

(v)The aim of experiment is to test (a)conclusion (b)hypothesis (c)data collection (d) observation

(vi)Which of the following is a viral disease? (a)HIV/AIDs (b) typhoid (c) malaria (d) cholera

(vii)Used as a source of heat in the laboratory (a) microscope (b)test tube (c) Bunsen burner (d)dropper

(viii)substance that emit radiations are (a)irritant (b)explosive (c)radioactive (d)caution

(ix) Which of the following arrangement show cell organization in the correct of increasing complexity (a)organ, cell, tissue, system, organism

(b)cell, organ, system, tissues, organism

(c)cell, tissue, organ, system, organism

(d)tissue, organ, cell, organism, cell

(x)Which of the following is expected to happen if blood supply to the brain is reduced?

(a)Nausea (b)Fainting (c)Shivering (d) Shiver

2.Match the item in list A with the correct item in list B

LIST A	LIST B
(i)contain first aid items	(a)cytoplasm
(ii)Place of doing experiment (iii)Instrument for doing experiment (iv)Have a definite shape (v)Absorb sun light used for photosynthesis	(b)cell sap (c)biology (d)mitochondria (e)guard cell

(vi)Fluid found in vacuole (vii)Power house of the cell (viii)Study o life (ix)Control open and close of stomata (x)Protect the body against disease	(f)chlorophyll (g)apparatus (h)first aid kit (i)plant cell (j)laboratory (k)laborate (l)white blood cell (m)red blood cell

3.Write T for the TRUE statement and F for the FALSE statement.
(i)A person who study biology is called scientist
(ii)Good manner help in person appearance
(iii)Biodegradable are waste from living things.
(iv) Oxygen gas is not important to plant life.
(v)Living organisms are usually sensitive to changes in the environment.
(vi)Leaves used to absorb water and mineral salt in the soil.
(vii)Mortar is small heavy tool for crushing things.
(viii) A help given to a sick or injured person before taken to the hospital is called first aid kit
(ix)Multicellular organisms are made up of single cell.
(x)Animal cells have small temporary vacuole.

SECTION B (70 MARKS)

4.(a) Define the following terms (i) Waste disposal (ii))Waste (iii)Incinerating
(b) Outline three principles of waste disposal
5(a)Give the meaning of the following words
(i)Cell specialization (ii)tissue (iii)cell (iv)unicellular organism (v)organ
(b) Give five differences between plant cell and animal cell
(c) Drawn a well labeled diagram of animal cell
6(a) What is disease?
(b) Define two types of disease
(c)Give the causative agent for the following diseases
(i) Malaria (ii) Typhoid (iii)AID's (iv) Gonorrhoea (v)Tuberculosis
7. (a)Define the following terms
(i)Puberty (ii) Adolescence (iii) Personal hygiene
(b)Outline five secondary sexual characteristics in girls
8(a)What is biology apparatus?
(b)Outline five features that distinguish biology laboratory from other school facilities
(c)Give four qualities of good laboratory
9.(a)What is biology?
(b)What are the reasons for studying biology (five reasons).
10.(a) What is First Aid?
(b)Explain how you can give first aid to a person who has been poisoned
