ARUSHA REGION TERMINAL EXAMINATION.

TEACHER'S MARKING SCHEME.

SUBJECT: GEOGRAPHY. CLASS: FORM ONE

SECTION A (30 Marks)

Qn 1. Multiple choice Questions

Questions	(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)	(viii)	(ix)	(x)
Answers.	B	C	A	C	B	B	D	C	B	B

1@ = 10 Marks

Qn 2. Matching items

LIST A	(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)	(viii)	(ix)	(x)
LIST B	D	I	N	B	J	C	G	A	H	L

1@ = 10 Marks

Qn 3

Questions	(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)	(viii)	(ix)	(x
Answers	F	F	T	T	T	F	T	T	F	T

1@ = 10 Marks

SECTION B: (40 Marks)

Qn 4 Definitions

(a) Equinox: Refers to equal days and nights.
or Equal lengths of days and nights.

(b) Solar system: The arrangement of planets and the sol objects in the space in relation to their position from the sun.

Scanned with CamScanner

(c) Solar eclipse: It occurs when the moon passes between the earth and the sun, thus casting its shadow over the earth.

(d) Earth's Revolution: Means the movement of the earth around the sun following an elliptical orbit.

(e) International dateline: Is an imaginary line where date is changed or calender day begins. (2@ = 10 Marks)

Qn 5 (a) Five (5) evidences that proves the earth is spherical.

(i) Ship visibility
(ii) Sun rise and sun set.
(iii) The Lunar eclipse.
(iv) The earth's curved horizon.
(v) Aerial photographs.
(vi) Circumnavigation of the earth.

(1@ = 5 Marks)

(b) Five major features of continents:

(i) Plains
(ii) Plateaeus
(iii) Mountains
(iv) Basins
(v) Valleys.

(1@ = 5 Marks)

6 (i) Rotation of the earth means the movement of the earth on its axis in anti-clockwise direction. While Revolution of the earth is the movement of the earth around the sun following an elliptical orbit.

(ii) Umbra :- Is the total or complete shadow formed during the solar eclipse. while
Penumbra is the part of the shadow which receives only some light during solar eclipse.

(iii) Earth is the only planet among the eight planets of the solar system known to support life. while
Earth's axis is an imaginary line joining the North and south poles through the center of the earth.

(iv) Altitude is the height above the sea level, while latitude is an angular distance of any point along a meridian North or South of the equator measured in degrees, minutes and seconds.

(v) Lake is a hollow or depression on the earth surface in which water collects, while
An ocean is the largest body of water that surrounds the land masses of the earth.

(2@ = 10 Marks)

SECTION C: (30 Marks)

7 Factors affecting temperature.
(i) Altitude
(ii) Latitude
(iii) Aspect
(iv) Ocean currents
(v) Wind
(vi) Distance from large water bodies.

1@ = (5 marks) 5 points

18. Outcomes of the earth movement around the sun.
(i) Seasons of the year./four seasons.
(ii) Aphelion and perihelion
(iii) Eclipses
(iv) Changes in the latitude of the overhead sun.
(v) Varying lengths of day and night at different times of the year.

1·5@ = 6 Marks
(four points)

Qn.9 Elements of Weather
(i) Sunshine
(ii) Temperature
(iii) Humidity
(iv) Precipitation
(v) Wind
(vi) Atmospheric pressure
(vii) Cloud cover.

1·5@ = 9 Marks
(6 points)

10 How the use of solar energy promote environmental conservation.

(i) The use of solar energy reduces the use of fossil fuels like petrol as a result it help to reduce environmental pollution caused by smoke.

(ii) The use of solar energy prevents further cutting down of trees for charcoal and firewood.

(iii) Plants use solar energy to manufacture their own food at the same time it provides us with the oxygen we need for survival.

(iv) Use of solar energy help to slow climate change.

(v) The use of solar energy in industries reduce production of chlorine that causes depletion of Ozone layer.

(2@ = 10 Marks)

5 points
