   c) The Earth is between the Moon and the sun
   d) The sun is behind the moon and the Earth.

X. The Earth takes…….to spin around **1º**.
   a) 360º
   b) 24hrs
   c) 4 minutes
   d) 15º

QUESTIONS	I	II	III	IV	V	VI	VII	VIII	IX	X
ANSWERS										

2. Write **T** for the correct statements and **F** for the incorrect statements
   i. An approaching ship to the land usually do not appear all at once……..
   ii. The Earth is in motion all the time…….
   iii. A spherical body can cast a rectangular shadow……
   iv. When the sun is on the Equator, days are longer than the nights……..
   v. Summer solstice on the Northern Hemisphere is on 21st June……
   vi. On 22nd December the sun is overhead on the tropic of Cancer……
   vii. Summer is a cold season while winter is a hot season……..
   viii. Eclipse is the blockage of light of a heavenly body by another passing in front of it…….
   ix. In the Northern Hemisphere summer months are May, June and July……
   x. Rising of the sun over the Eastern horizon in the morning is an evidence for the Earth's rotation…….

3. Define the following terms;
   a) Solstice_____ _____
   _____
   b) Equinox……
   ……
   c) An axis_____
   _____
   d) Tide……
   ……
   e) Season _____
   _____

4. List down four significances of the Earth's rotation.
   i. ……
   ii. ……
   iii. ……
   iv. ……

5. Why a meteoroid become hot and burnt while falling on the Earth?_____
   _____
   _____

6. Why the sun is closer to the Earth at one period of the year than at another?
   _____
   _____

7. Why PLUTO is no longer a planet? Because _____
   _____
   _____

8. When the students of Lamiriam Secondary school takes their breakfast at 10am, usually it is 2am in New York, meanwhile, in Beijing it is usually 3pm. What causes this differences in time?
   _____
   _____

9. Draw a well-labeled diagram showing the occurrence of day and night.

10. Differentiate the following geographical terms as used in Solar system;
    a. Revolution from rotation
    ……
    ……
    ……
    ……
    b. Perihelion from Perigee
    ……
    ……
    ……
    ……
    c. Aphelion from Apogee
    ……
    ……
    ……
    ……
    d. An axis from An orbit
    ……
    ……
    ……
    ……

11. List down six proofs for the Earth's spherical shape
    i. ……
    ii. ……
    iii. ……
    iv. ……
    v. ……
    vi. ……
