TOTAL			

SECTION A (15 Marks)

1. For each of the following items (i)-(x) choose the correct answer from the given alternative and write its latter.

i. Ahaggar Mountains in central Sahara and the Adamawa Mountains in Eastern Nigeria are examples of huge resistant rocks which remained after the erosion of weaker rocks around them. In which type of mountains does these examples fall:

A. Volcanic mountains.
C. Block Mountain
B. Fold mountains
D. Residual Mountains.

ii. A longitudinal division which crosses the earth with an approximate of width of about 15° of longitude is called

A. Great circle
C. Local mean time
B. Standard time
D. Time zone

iii. Deflection of wind and daily rising and falling of tides are among the effect of?

A. Earth's movement
C. Earth's revolution
B. Earth's rotation
D. Aphelion and perihelion

iv. A form one student was studying about continents; he read that one of the continents was crossed by both tropics, tropic of cancer and tropic of Capricorn. Which continent was that?

A. Africa
C. Europe
B. North America
D. Asia

v. Some people were transporting watermelon from Luana to lugoba town. An activity undertaken by those people may be well studied in which branch of geography?

A. Physical geography
C. Human geography
B. Practical geography
D. Trans-human geography

vi. Form one students were watching video. They saw asteroids orbiting the sun, but most of them seemed to between mars and Jupiter. What is the name of the section in which those objects found?

A. Planetoids
C. Bolide's
B. Kuiper belt
D. Asteroid belt

vii. When **Seypalm** was walking along the side of river Ruvu towards Indian Ocean, he saw a many channels of stream converging toward Ruvu river. Those converging channels are known as; -

A. Tributary
C. Water shed
B. River basin
D. Distributary

viii. Which of the following statement is true regarding satellites?

A. All satellites are bigger than the earth.
B. All planets have satellites.
C. Some planets have satellites, some do not.
D. The moon is a satellite that produces its own light.

ix. When the earth's shadow is cast over the moon's surface, the phenomenon is known as:

A. Lunar eclipse
C. Summer solstice
B. Solar eclipse
D. Day and night

x. What would be the local time and day of a place in Konfit (China) located at 138°E if it is noon (Monday), at the Berembu in Fosaka (U.S.A) located at 144°W?

A. 18:48 Hours on Monday
B. 5:12 p.m. on Sunday

C. 6:48 a.m. on Tuesday
D. 12:24 p.m. Monday.

i.	ii.	iii.	iv.	v.	vi.	vii.	viii.	ix.	x.

2. Match the items in **COLUMN A** which has ocean with those in **COLUMN B** which show the size of each ocean in km^2 by writing the latter of the correct answer against it corresponding item number in COLUMN A in the box provided below

LIST A	**LIST B**
i. Pacific Ocean ii. Atlantic Ocean iii. Indian Ocean iv. Southern Ocean v. Arctic Ocean	A. 166 **(Million Km2)** B. 70 **(Million Km2)** C. **84 (Million Km2)** D. 168.7 **(Million Km2)** E. 85.1 **(Million Km2)** F. 70.5 **(Million Km2)** G. 22.0 **(Million Km2)** H. 15.6 **(Million Km2)** I. 14 **(Million Km2)** J. 170 **(Million Km2)** K. 20 **(Million Km2)**

i.	ii.	iii.	iv.	v.

SECTION B (70 Marks)

Answer all questions in this section

3. Study the following data of climate M, then describe five distinctive characteristics of Natura region M

MONTH	**J**	**F**	**M**	**A**	**M**	**J**	**J**	**A**	**S**	**O**	**N**	**D**
TEMP ^0C	20	20	19	18	17	15	14	15	18	21	18	12
RAIN (MM)	16	13	21	44	94	110	98	90	58	43	30	96
