Student's Full Name: ……

THE CATHOLIC DIOCESE OF SAME
KINDOROKO GIRLS' SECONDARY SCHOOL
FORM TWO FIRST PRE–MOCK EXAMINATIONS

031 **BIOLOGY**

Time: 2:00 Hours **Year: 2025**

Instructions

1. This paper consists of sections A, B and C with a total of **ten (10)** questions.
2. Answer **all** questions in **all** sections.
3. Section A carries **fifteen (15)** marks, section B **seventy (70)** marks and section C carries **fifteen (15)** marks.
4. Except for drawings which must be drawn in pencil, all writings must be in **blue** or **black** ink.
5. Cellular phones and any unauthorized materials are **not** allowed in the assessment room.
6. Write your **Name in Full** on the top right hand corner of every page.

K.S.S BIO 1 PRE MOCK 1 2025

SECTION A (15 Marks)

Answer **all** questions in this section

1. For each of the items (i) – (x), choose the correct answer from among the given alternatives and write its letter beside the item number in the space provided.

(i) Which of the following is the correct classification of mushroom?
- A Kingdom plantae; phylum bryophyta
- B Kingdom fungi; phylum zygomycota
- C Kingdom fungi; phylum basidiomycota
- D Kingdom plantae; phylum ciliophora

(ii) Mercy is a botanist. This is to say that she is: -
- A Specialized in the study of living things
- B Specialized in the study of different plants
- C Specialized in the study of animals like goats
- D Specialized in the study of microorganisms

(iii) A boy has just started developing beards on his chin; hair under the armpits and producing sperms. What does this imply?
- A He has reached the age of puberty
- B He lacks enough proteins in the body
- C He is developing marasmus
- D He is not doing enough physical exercises

(iv) Njau was working in the laboratory. By accident she spilled unknown chemical on the floor which resulted into a permanent trace. Which of the following could be the most possible chemical that was unknown?
- A Liquified petroleum gas
- B Concentrated nitric acid
- C Gunpowder or dynamite
- D Dilute sodium hydroxide solution

(v) Tics are commonly found on the skin of cattle such as cows and suck blood from them. This means that:
- A Ticks are preys and cattle are predators
- B Ticks are ectoparasites and cattle are hosts
- C Ticks are ectoparasites and cattle are endoparasites
- D Ticks are heterotrophs and cattle are autotrophs

(vi) Penina and Juliana want to conduct an experiment to understand why the contents of an egg become solid when the egg is boiled. At this stage, which step would you recommend for them to begin with?
- A Identification of the problem
- B Experimentation
- C Observation and data recording
- D Hypothesis formulation

(vii) In the first aid procedure, which of the following items is used for removing thorns and stings left behind by bees?

A Tweezer B Liniment
C Gentian violet D Antiseptic

(viii) Substances going in and out of the cell are controlled by:

A Cytoplasm B Vacuole
C Cell membrane D Tonoplast

(ix) What are the monosaccharides that make up sucrose?

A Galactose and fructose B Fructose and galactose
C Glucose and fructose D Galactose and fructose

(x) In early 2020, the whole world suffered the incidence of COVID-19 and its worse outcomes. Which of the following identifies the disease?

A Endemic and Communicable
B Epidemic and Non-communicable
C Pandemic and Non-communicable
D Pandemic and Communicable

ANSWERS

QUESTION	(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)	(viii)	(ix)	(x)
ANSWER										

2. Match the items in **List A** with the responses in **List B** by writing the letter of the correct response besides the item number in the space provided.

LIST A	**LIST B**
(i) Used to conduct experiments that emit harmful gases or smoke	A Test tube rack
(ii) Used to observe small organisms	B Bunsen burner
(iii) Used to catch flying specimens like insects	C Dissecting kit
(iv) Used to store test tubes when they are not in use	D Light telescope
(v) A small container with tools and items used to dissect specimens	E Hand lens
	F Sweep net
	G Fume chamber
	H Test tube holder
	I Fish net

ANSWERS

LIST A	(i)	(ii)	(iii)	(iv)	(v)
LIST B					

SECTION B (70 Marks)

Answer **all** questions in this section

3. (a) What is a cell? ……..

..……..

(b) Outline the differences between mango cell and rod-shaped bacteria.

S/N	MANGO CELL	ROD-SHAPED BACTERIA
(i)		
(ii)		
(iii)		

(c) Briefly explain what would happen if the cell lacks the following parts:

(i) Nucleus ..…….

..……

(ii) Plasma membrane ..…….

..……

(iii) Ribosomes ..…….

..……

(iv) Mitochondria ..…….

..……

4. (a) With examples, write down the rules you will consider whenever you write a scientific name.

(i) ..……

(ii) ..……

(iii) ..……

(iv) ..……

(b) A group of students were arguing that scientists should find a means or eradicating all bacteria from our environment. If you are asked to oppose their idea, which points would you give out?

(i) ..……

..……

(ii) ..……

..……

(iii) ..……

..……

(iv) ..……

..……

5. There is a lot of microorganisms around us which can cause harm to our health. With five points, justify how our bodies defend themselves against such microorganisms.

   (i) ..……..
   ..……..
   (ii) ..……..
   ..……..
   (iii) ..……..
   ..……..
   (iv) ..……..
   ..……..
   (v) ..……..
   ..……..

6. (a) Why are some carbohydrates said to be the reducing sugars? ……..
   ..……..

   (b) Explain briefly the types of lipids.
   (i) ..……
   ..……
   (ii) ..……
   ..……

   (c) It is recommended to take lipids in small quantities. However, lipids play an important role in the body. Show out the ways in which lipids are used in the human body.

   (i) ..……
   ..……
   (ii) ..……
   ..……
   (iii) ..……
   ..……
   (iv) ..……
   ..……

7. The following organisms were found in the ecosystem: Bacteria, Goat, Leopard, Impala, Grass, Cheetah.

   (a) Construct a food web using the organisms named above.

   (b) From the food web that you have constructed in (a), which organism(s) are:

      (i) Producers ..……...

      (ii) Secondary consumers ..……

      (iii) In the second trophic level? ..……

   (c) State the main role of bacteria in the ecosystem above. ..…….

   ……..

   ……..

   (d) Derive three food chains from the food web you have constructed in (a) above.

   ……..

   ……..

   ……..

8. We usually observe very small plants which look like green substances on the wet ground, foundations of buildings and other moist places, especially during the rainy season.

   (a) (i) What do you think is the common name of these plants? ……...

      (ii) State the division to which these plants belong. ……..

(b) Briefly explain why these plants:

(i) Never grow taller. ……

..……

(ii) Never grow on a dry land. ……

..……

(c) Outline three distinctive characteristics which made them to be placed in the kingdom plantae.

(i) ..……

..……

(ii) ..……

..……

(iii) ..……

..……

(d) Draw the diagram of the plant described in this question.

9. (a) Differentiate between the following terminologies:

(i) Personal hygiene and Good manners ..……

..……

..……

..……

(ii) Disease and Infection ..……

..……

..……

..……

(iii) Pathogen and Vector ..……

..……

..……

..……

(b) Consider yourself as the health officer of your village. Describe how you would educate your community about the preventive measures against cholera.

(i) ..……

..……

(ii) ..……

..……

(iii) ..……

..……

(iv) ..……

..……

SECTION C (15 Marks)

Answer the question **ten (10)** below

10. Students at Kindoroko Girls' Secondary School are planning to stop cleaning the school environment for six months since they want to focus on studies only. Explain to them any six consequences of their decision.
