PRESIDENT'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
ARUSHA REGION
FORM TWO MOCK EXAMINATION

Code: 013 **GEOGRAPHY**

TIME: 2:30 Hours **MAY 2024**

INSTRUCTIONS

1. This paper consists of section A, B and C with total of ten (10) questions.
2. Answer all questions in the space provided
3. Section A and B carries fifteen (15) marks each and section B carries seventy (70) marks.
4. Cellular phones calculator and other unauthorized materials are not allowed.

SECTION A (15 MARKS)

Answer **all** questions**.**

1. For each of the item (i-x), choose the correct answer for the given alternatives and write its letter in the box provided.

   (i) In group discussion John told his fellow form two students that "ocean flow consists of numerous features" which one of the terms do you think mentioned by John as applicable to some parts of the ocean floor?

   A. Basin, deep, cirgue, plateau.
   B. Ocean ridge, ocean deep, deep sea plain, continental slope.
   C. Sea trench, beach, basin, ridge
   D. Sea ridge, ocean deep, ocean basin, waterfalls.

   (ii) When the moon sun is directly overhead at the tropic of cancer (23.5N latitude) around 21 June in the Northern hemisphere, the condition is known as:

   A. Summer Solstice
   B. Spring Solstice
   C. Winter Solstice
   D. Autumn Solstice

   (iii) The temperature at Korogwe 950m is 24℃. What is the temperature of Kilimanjaro above sea level?

   A. 5.67℃
   B. 18.15 ℃
   C. -5.67℃
   D. 10.24 ℃

   (iv) Suppose a meteorological measured the temperature at Antananarivo 77 ℉ and convert into degree centigrade as 25℃ . Which among the following formula a meteorological used to convert from ℉ to ℃?

   A. ℉ = 5/9(℃ + 32)
   B. ℃ = 9/5(℉-32)
   C. ℉ = (5/9(℃+32)
   D. ℃ = 5/9(℃ -32)

   (v) A person may either gain or lose time travelling across International Date Line East or West respectively. Hence one gains in term of time by 60 minutes for every 15° of longitude when travel from.

   A. North to South
   B. East to South
   C. West to East
   D. East to West

(vi) Mr Musa visited all tropical climatic regions. In his visits he observed great temperature variations among regions. Which of the following tropical climate does Mr. Musa observed to have largest diurnal temperature range?

A. Equatorial Climate
B. Tropical Monsoon
C. Tropical Savannah
D. Hot Desert

(vii) When the difference in Reading of the dry bulb and wet bulb thermometer is great indicates that

A. Evaporation is low
B. Moisture content in the atmosphere is low
C. Humidity is low
D. Air in the atmosphere is saturated

(viii) Isohyets are lines on the map which joins all places with the same!

A. Height above the sea level
B. Amount of rainfall
C. Atmospheric pressure
D. Natural vegetation

(ix) What is the compass directions for 202

A. SSE
B. SSW
C. NWN
D. NNE

(x) The atmospheric is said to be humid only when

A. It is saturated with water vapour
B. It is unsaturated with water vapour
C. It consists of water
D. It does not contain water vapour.

i	ii	iii	iv	v	vi	vii	viii	ix	x

2. Match the items in list A with the corresponding one in list B by writing the letter of the correct response below the item number in the table provided.

LIST A	**LIST B**
(i) The great circle around the middle of the globe dividing the earth into two equal parts (ii) The position of a point on the earth's surface in relation to the equator expressed as it's angular distance north and south of the equator (iii) Either half of the earth's sphere which has been divided by an equatorial plane through its center (iv) The standard line of the earth located at 0^0 longitude dividing the earth east and west into two equal parts (v) The angular distance of a given point measured in degrees east or west of Greenwich meridian.	A. Current horizon B. Longitude C. Hemisphere D. Standard line E. Parallels F. Equator G. International date line H. Prime meridian

LIST A	i	ii	iii	iv	v
LIST B					

SECTION B: (70 MARKS)

3. Mr. Juma measured a bearing of Dodoma **(NW)** from Dar-Es-salaam (SE) in Tanzania and read 305° NW of Tanzania at 11:30am.
   a) Outline four procedures used by Dr. Juma to measure bearing
      i. ……
      ……
      ii. ……
      ……
   b) Name the type of bearing measured by Dr. Juma
      ……..
   c) Show four (4) other possible ways used to locate the position of the place
      i. ……
      ii. ……
      iii. ……
      iv. ……

4. James family was watching TV at home; the program was a weather forecasting. James and his wife got angry with the program as they say weather forecasting is useless to them.
   a) As a form two geography students help James family to understand the importance of weather forecasting (four points).
      i. ……
      ii. ……
      iii. ……
      iv. ……
   b) List at list two dangers when weather forecast is not implemented?
      i. ……
      ii. ……

5. Always the oceanic flow is not uniform it needs to vary from one place to another it has different features, with this regard draw a well labeled structure of the oceanic flow and indicate its eight features' parts.

6. (a) Draw a well labeled diagram to show the solar eclipse

(b) Briefly describe on how solar eclipse you have drawn above occurs:

……
……
……
……

(c) Give two impacts which may occur due to the solar eclipse.

i. ……
ii. ……

7. In making a good map, scale is very important information to be considered. Without a scale map is incomplete.

(a) With three (3) examples, outline types of map scale

……
……
……
……
……
……

(b) In which ways map scale can be expressed?

(i) ……
……
(ii) ……
……
(iii) ……
……

(c) Give two importance of map scale.

i. ……..
ii. ……..

(d) Suppose that one centimeter on the map represents half kilometer on the ground (1cm to 1/2km) convert into representative fraction scale R.F.

8. Forest has many resources "with vivid examples explain five (5) forest resources.
   i. …….....
   ii. ……..
   iii. …….
   iv. …….
   v. …….

9. Carefully study the data below and answer the questions that follows;

MONTH	J	F	M	A	M	J	J	A	S	O	N	D
TEMP℃	28	27	28	24	27	28	29	28	28	29	30	30
Rainfall (mm)	200	150	190	140	160	200	202	112	226	130	300	250

(a) Calculate the total rainfall of the six months.

(b) Change the temperature range of the given data into degree Fahrenheit.

(c) Calculate the mean Temperature of the given data.

(d) With two reasons, identify the type of climate of the given data .the type of climate

……
……
……
…….

(e) Mention two crops that may grow in the mentioned type of the climate 9.iv) above.

i. ……
ii. ……

SECTION C (15 Marks)

10. ”AUWSA” was the responsible medium for water supply and management in Arusha . The sector helped the government acknowledging people on the importance and need for water management some people failed to understand. As an expert in the whole aspect of water describe significance of water management for daily life (Six points).
