.

SECTION A (15 MARKS)

1. For each of the items (i) - (x) choose the most correct answer from the given alternatives and write its letter beside the item number in the answer booklet provided.

(i) The point on the earth's surface that is vertically and immediately above the point of origin of an earthquake which receive maximum destruction.
   A. Focus
   B. Hypocenter
   C. Epicenter
   D. Body centers.

(ii) The layer of atmosphere where airplanes fly is called:
   A. Troposphere
   B. Thermosphere
   C. Stratosphere
   D. Mesosphere

(iii) Radial movements within the earth's crust are associated with the formation of….
   A. Basins, rift valleys and volcanos
   B. Joints, faults and fissures
   C. Horsts, grabens and basins
   D. Joints, basins and faults

(iv) ……is a large body of an igneous rock formed at the base of the earth's crust
   A. Laccoliths
   B. Lopoliths
   C. Phacoliths
   D. Batholiths

(v) Movements of the solid parts of the Earth away from one another, towards each other as well as upward and downward the earth's crust is referred to as…
   A. Diastrophism
   B. Horizontal /lateral movement
   C. Epeirogeny
   D. Endogenic forces.

(vi) ...is a type of fold in which the limbs incline in the same angle formed when compressional forces on both sides are of equal strength.
   A. Asymmetrical fold
   B. Overfold.
   C. Recumbent fold.
   D. Symmetrical fold

(vii) ...is the vertical displacement while…is the horizontal or Lateral displacement in faulting.
   A. Fault and Upthrow
   B. Downthrow and Upthrow
   C. Throw and Heave
   D. Hade and Heave

(viii) The type of fault which results from compressional forces which occurs when the beds of rocks on one side of the fault plane are thrust over the other side is called?
   A. Normal fault

.

B. Transform/ Tear fault
C. Reverse fault
D. Overthrust fault

(ix) The sedimentary rocks formed by deposition of sediments such as sands stones, gravel, debris from eroded materials of existing rocks are known as?
A. Organically formed sedimentary rocks
B. Chemically Formed sedimentary rocks
C. Mechanically Formed sedimentary rocks
D. Compaction formed sedimentary rocks.

(x) The mantle layer is separated from the Crust by the layer called?
A. Conrad discontinuity
B. Mohorovicic discontinuity.
C. Repetti discontinuity.
D. Gutenberg discontinuity.

(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)	(viii)	(ix)	(x)

2. Match the item in list **A** with corresponding items in list **B** by writing its letter beside the corresponding item number in the answer booklet provided.

LIST A	**LIST B**
(i) Close-up horizontal photograph (ii) Low oblique photography (iii) Aerial photographs (iv) High oblique photography (v) Panorama horizontal photograph	A. This is the ground photography taken when the camera is focused on one specific item such as a tree, an animal, a person or a house that needs to be interpreted B. These are general view photographs which show many items on an extensive landscape C. These are photography taken at low elevated angle less than 60º towards the ground. D. These photographs are taken from the sky with the camera tilted at an angle of less than 90º towards the ground. E. Are taken when the principal axis of a camera is vertical (90°) to the general ground level. F. Are digital images or pictures of the Earth's surface taken from space by special cameras on satellites. G. Image of the whole or part of the earth taken using artificial satellites.

(i)	(ii)	(iii)	(iv)	(v)

.

SECTION B (70 MARKS)

3. With only five reasons, explain why earth is the only planet that supports life.
