THE PRESIDENT'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
LONGIDO DISTRICT

FORM THREE ANNUAL EXAMINATION
051 FOOD AND HUMAN NUTRITION
MARKING SCHEME NOVEMBER 2025

SECTION A (16 MARKS)

1. Multiple Choice Question

i	ii	iii	iv	v	vi	vii	viii	ix	x
C	C	A	D	A	B	B	B	A	D

10pts @ 01Mark, total 10 Marks.

2. Matching Items.

i	ii	iii	iv	v	vi
G	F	C	D	A	H

6 pts @ 01Mark, total 06 Marks.

SECTION B (54 MARKS)

3. (a) Glazing is a process of improving bread appearance and flavour by brushing its crust with some type of liquid. (01Mark)

(b) Types of glazing;

- Honey glaze; This is done by applying honey on the crust when the bread is still warm and allowing it to rest for several hours for better result.
- Egg wash glaze; This is done by applying either egg white, egg yolk or whole egg mixed with water or milk, little fat or oil is added.
- Oil glaze; This is done by applying oil on top of the dough before baking or on top of the bread crust after baking.
- Melted butter glaze; This is done by applying melted butter on the bread crust. It is done after baking the bread while it is still warm.
- Milk or cream wash glaze; This is done by applying milk or cream alone or by mixing them with either egg, fat or oil.
- Water glaze; This is done by applying water on top of the proved bread dough before baking.

(Any 3pts @01Mark, total 03 Marks)

(c) Characteristics of a good quality bread.

- Appealing brown and crunchy crust.
- A pleasant roast aroma
- Fine slicing characteristics
- A soft and elastic crumb texture
- A moist mouthfeel.

5pts @01 Mark, total 05 Marks

4. (a) Agents of food spoilage
   - Microorganisms
   - Enzymes
   - Insects & rodents
   - Chemical reactions (Oxidation)
   - Physical factors (Moisture, Temperature and light)

   (5pts @01 Mark, total 05 Marks)

   (b) Food contaminants
   - Soil
   - Wood fragments,
   - Hair
   - Microorganisms
   - Chemicals (detergents, pesticides and chemical additives)

   (Any 4pts @ 01 Mark, total 04 Marks)

5. (a) Signs of pregnancy
   - Missing menstrual periods
   - Morning sickness
   - Sensitive to smell
   - Enlargement of breast
   - Feel tired due to hormonal changes

   (Any 4 points @ 01 Mark, total 04 Marks)

   (b) Importance of antenatal clinic:
   - A pregnant woman is told how to prepare herself for the baby's arrival
   - The pregnant woman is informed about the Expected Date of Delivery (EDD)
   - Detention and treatment of Malaria and other infections is important
   - Provision of food supplements such as folic and iron.
   - The mother's blood pressure and weight are checked and monitored.
   - Parents are tested for HIV.

   (Any 3 pts @01 Mark, total 03 Marks)

   (c) Proper Nutrition:
   - An adequate amount of a balanced diet.
   - Foods of animal protein and legumes.
   - Should drink milk at least half a litre every day.
   - Drinking enough water and other fluids with a low sugar, fat and salt content.

   (Any 2 pts @01 Mark, total 02 Mark)

6. (a) Advantages of steaming
   - The loss of nutrients is reduced as the food does not come in direct contact with the cooking water.
   - Various dishes can be cooked at the same time.

- -The cooked food by steaming are light and easy to digest.
- The steam cooked food retains more flavour, texture and colour.

(Any 2pts @01Mark, total 02 Marks)

Disadvantages of steaming;

- Asteamer can cause scalds if carelessly handled.
- Foods takes long time to cook
- Not suitable to cook tough food

(Any 2pts @01 Mark, total 02 Marks)

Advantages of Grilling methods;

- It is a quick method of cooking
- It retains nutrients in the food
- Makes food easier to digest as there is less fat.
- Makes food tasty & appetizing.

Disadvantages of grilling methods.

- Food loses fats and juices, thus making dry.
- Needs constant attention

(2pts @01 Mark, total 02Marks)

(b) Reasons for cooking food.

- Killing germs and bacteria which can cause diseases
- Keeping perishable foods long by creating an unfavourable environment for spoilage and rotting.
- Making food more attractive and appetizing.
- Improving the appearance, flavour and smell of food.

(Any 3pts @01 Mark, total 03 Marks)

7. (a) Cereals: Are edible seeds or grains of cultivated grasses. (01 Mark)

Examples of cereals are:

- Wheat
- Rice
- Maize
- Sorghum
- Finger millet
- Barley

Any 4pts @ 0.05Mark, total 02 Marks

(b) Uses of Cereals;

- Used for making foods such as cakes, bread, biscuits, pastry and batter.
- Used as a main meal for example rice
- Used for making beer for example barley
- Used for making foods such as porridge or ugali
- Used for making foods such as porridge, ugali, bread and cookies.

Any 4pts @01 Mark, total 04Marks

(c) Disadvantages of white flour

- Insufficient nutrients

- Low dietary fibre
- Increase the risk of cardiovascular diseases
- Low bowel movement

(Any 2pts@ 01Mark, total 02 Marks)

8. (a)
   i. Iron-supports the production of haemoglobin, which carries oxygen to the mother and foetus, also help to prevent anaemia.
   ii. Folic acid- Prevents neural tube defects (NTDs) in the developing foetus, such as spina bifida. These from leaf greens, fortified cereals and beans.
   iii. Calcium: Supports the development of the baby's bones, teeth, and muscles. Which found from dairy products, (milk, cheese, yogurt), fortified plant-based milk, leaf greens and almonds.
   iv. Protein: Supports the growth and development of the foetus, placenta and maternal tissues. Found in iean meats, poultry, fish, eggs and beans.

   (4 pts @01 Mark, total 04 Marks)

   (b) Diet recommended for Sarah:
   - Eat balanced diet
   - Incorporate Iron -Rich foods
   - Focus on Folate -Rich Foods
   - Ensure adequate Calcium
   - Stay Hydrated

   (5 pts@ 01 Mark,05 Marks)

SECTION C (30 MARKS)

9. Factors affecting food nutrients:

Introduction: Nutrients are chemical substances that make up food, these are Proteins, Vitamins, Fats and oils, Charbohydrate and water.

- Cooking: Can destroy or reduce the activity of heat -sensitive nutrients like vitamin C and B. Can also denature proteins.
- Storage: Long storage times and exposure to light, air,or moisture can degrade nutrients.
- Preservation methods: Freezing can preserve nutrients, but drying or salting may lead to loses.
- Processing methods: Like milling, refining and canning can reduce nutrient content especially vitamins and fiber.
- Food Preparation

6pts @2, total 12 Marks

Any conclusion award 01Mark.

10.

(a) Ways which food may be contaminated.
- Cross contamination
- Poor personal hygiene

- Dirty utensils
- Poor food handling
- Improper food storage

4pts @01.5Mark, total 06Marks

(b) Ways to control food contamination

- Avoid cross contamination by separating cooked and uncooked foods.
- Ingredients that are used to prepare foods that are eaten raw such as salads should be washed with clean and safe water before use.
- Keep chemicals or substance which are unfit for human consumption away to prevent them from contamination the food.
- Kitchen should be clean always.
- Wash the utensils with clean water after every use.
- Maintaining personal hygiene when handling food.
- Wash groceries like roots, tubers, fruits and vegetables before storing.

6pts @01 Mark, total 06Marks.

Any related conclusion 01Mark

11. Introduction: Any related one. Award 02Marks

Rules for making pastry.

- Keep all ingredients and utensils as cool as possible, except for the pastry which needs a warm condition.
- Introduce as much air as possible during solving, rubbing in fat into flour and folding - in the pastry.
- Use a little flour as possible for rolling out.
- -Handle the pastry lightly and roll it lightly to avoid pressing out air and to prevent toughening the pastry.
- Use enough liquid when making pastry dough and during binding the pastry.
- Glaze the pastry dish before baking to give a glossy surface.
- Do not re-roll the pastry as it will crack during cooking.

6pts @02 Marks, total 12 Marks
