PRIME MINISTER'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
ARUSHA REGION

FORM THREE TERMINAL EXAMINATION

CODE:013 **GEOGRAPHY**

TIME: 3: 00 HRS **25th May, 2026**

INSTRUCTIONS

1. This paper consists of section A, B and C
2. Answer all questions in Section A and B and two questions from section C
3. Section A carries 16 marks, section B carries 54 marks and section C carries 30 marks
4. Use blue or black in writing except drawing which should be in pencil

SECTION A: (16 MARKS)

Answer all questions in this section

1. For each of the items (i) – (x) , choose the correct answer among the given alternatives and write its letter beside the item number in the answer booklet

(i) The layer in the atmosphere which supports the life of humans and other living organisms is known as_____

A. Crust
B. Thermosphere
C. Troposphere
D. Stratosphere
E. Mesosphere

(ii) Mr. John is a farmer in Shinyanga and he traveled to Serengeti national park for leisure. Who is Mr. John in Serengeti National Park?

A. Farmer
B. Tourist
C. Surveyor
D. Researcher
E. Geographer

(iii) Suppose the local time at Greenwich Meridian (0°) is 10:00 am on Wednesday, what will be the time and day at longitude 180°E?

A. 11:00 am, Thursday
B. 10:00pm, Wednesday
C. 11:00 pm Wednesday
D. 2:00pm, Tuesday
E. 10:00am, Tuesday

(iv) The Geographical name given to when rocks peel its outer layer like an onion is known as_____

A. Block disintegration
B. Granular disintegration
C. Frost shattering
D. Mass wasting
E. Exfoliation

REGIONAL TERMINAL EXAMINATION

(v) The following are metallic minerals except;

A. Gold
B. Sulphur
C. Iron
D. Silver
E. Iron

(vi) The narrow water path that separates landmasses is known as a _____

A. Cape
B. Gulf
C. Strait
D. Isthmus
E. Peninsula

(vii) The following are types of faults except;

A. Normal fault
B. Reverse fault
C. Transform fault
D. Simple fault
E. Over thrust fault

(viii) _____ drainage pattern is the arrangement of streams flowing outwards down the flanks or slopes of the dome or cone shaped upland like a large volcano

A. Trellised pattern
B. Rectangular pattern
C. Centripetal pattern
D. Dendritic pattern
E. Radial pattern

(ix) Which among the following planets is made up of rocks (terrestrial)

A. Mars
B. Jupiter
C. Uranus
D. Neptune
E. Saturn

(x) An underground layer of water bearing permeable rock, rock fractures or unconsolidated materials is called_____

A. Fossil
B. Aquifer
C. stalactite
D. Stalagmite
E. Dolines

2. Match the items in List A with the corresponding in List B by writing the letter of the correct response besides the item number in your answer sheet provided.

LIST A	LIST B
(i) Waves which cause the surface rocks to have a vertical circular movement (ii) Waves which cause the crustal rock to move back and forth in direction of wave. (iii) Waves which cause crustal rock to move from side to side (at right angles) in direction of wave (iv) Waves which cause surface rock to move from side to side (v) A point on the Earth's surface that is vertically and immediately above the point of origin of an earthquake. (vi) A point in the Earth's crust where an earthquake originates.	A. Epicenter B. Secondary wave C. Love waves D. Echo waves E. Primary waves F. Surface waves G. Focus H. Rayleigh waves I. S waves

REGIONAL TERMINAL EXAMINATION

SECTION B (54 MARKS)

3. (a) Define Mass wasting
   (b) Explain any three (3) types of rapid mass wasting
   (c) Mention two (2) factors affecting nature and speed of mass wasting

4. As an expert in Geography, help Lisa who is a form one student at green stars secondary school to solve the following map reading questions
   (a) Convert 1:100,000 into a statement scale.
   (b) Mention three (3) ways used to locate position on the map
   (c) If the complete squares are 14, and the incomplete squares are 16. Find the actual area of the place in km^2 given the scale is 1: 50,000.

5. (a) Among the internal forces of the Earth is when molten materials and gases are forced into the Earth's crust and onto the surface. Draw and name four physical features that are formed when these molten materials are forced into the Earth's crust.
   (b) How beneficial is this process to the people of Karatu District (give five points)

6. (a) Give any four differences between the average atmospheric condition of a place observed and recorded over a short period of time and average atmospheric condition recorded over a long period of time normally 30 years.
   (b) Peter was confused to find Karatu was cold having a temperature of 19°c since he left Dar es Salaam which was hot at about 30°c. Explain to peter with three reasons why we have these differences
   (c) The temperature at Karatu 950 metres is 24°c. What will be the temperature at Kibo peak 5894 metres above sea level?

7. (a) How is renewable energy different from nonrenewable energy
   (b) Explain the sources of any five renewable energy

8. (a) Soil is the thin uppermost layer of the earth's crust. Mention three (3) factors for soil formation
   (b) Outline three (3) physical properties of soil
   (c) We have noticed in recent years that there is an increase of soil erosion, it has contributed to the loss of soil fertility. Name three (3) causes of soil erosion in your area.

SECTION C: (30 MARKS)

9. Ali measured distances, angles, directions and elevation in order to position his house and storage building. Describe five objectives of the activity

10. One among the benefits of Transport is to carry out trade smoothly by moving goods from where they are manufactured to the people who need them yet this sector still faces many challenges. Suggest what should be done to address the challenges facing transport sector in Tanzania

11. The earth is made up of natural solid materials made up of various minerals in different ratios. How do these materials contribute towards the economic development of our country?
