THE PRESIDENT'S OFFICE

REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT

ARUSHA REGION TERMINAL EXAMINATIONS - MAY, 2025

FORM THREE

GEOGRAPHY

Time: 3:00Hours **MAY, 2025**

INSTRICTIONS

- This paper consist of section A, B and C with a total of eleven (11) questions.
- Answer all questions in section A B and TWO (2) questions from section C.

SECTION A (16MARKS)

Answer all questions in this section

1. For each of the following items , choose the most correct answer and write its letter in the space provided.

(i) Singida at 1,500m above sea level has a temperature of 22.8^0C. determine the temperature of Micheweni at sea level with an altitude of 300m.

A. 15.6^0C
B. 7.2^0C
C. 30^0C
D. 21^0C
E. 100^0C

(ii) Greenhouse gases can deplete the ozone layer, among other effects ozone layer depletion can also cause.

A. Good visibility
B. Skin cancer
C. Cloud formation
D. Environmental lapse rate
E. Glaciations

(iii) The following are the features developed at the lower stage of the development of the river profile except;

A. Interlocking spurs
B. Oxbow lake
C. Floodplain
D. Natural levees

E. Delta

(iv) Deposition of soil material removed from one horizon to another is called:
   A. Illuviation
   B. Erosion
   C. Eluviation
   D. Leaching
   E. Soil pH

(v) An extensive cone with gently sloping sides formed when basic ;ava is poured onto the surface and occupies a large area is ;
   A. Batholiths
   B. Caldera
   C. Acidic cone
   D. Laccolith
   E. Shield volcano

(vi) Water bodies are used for different purpose; however, we can classify their use into several categories. Which among the following are the economic uses of water bodies?
   A. Domestic and industrial
   B. Irrigation and drinking
   C. Washing and transport
   D. Transport and domestic
   E. Industrial and irrigation

(vii) If the time at place X (45^0E) is 10:00am, what will be the time at place Y (30^0E?
   A. 1:00 am
   B. 9:00pm
   C. 9:00am
   D. 7:00am
   E. 3:00pm

(viii) Mr. Hans Meyer climbed Mt. Kilimanjaro in 1889. As he climbed up the mountain, he experienced some changes and stated shivering. Mr. Lauwo, his tour guide told him that as one ascends an altitude, the temperature tends to:
   A. Decrease and increase at the same time
   B. Remain constant
   C. Increase at the rate of 10^0C.
   D. Decrease at the rate of 0.6^0C for every 100 meters
   E. Increase at the rate of 0.6^0C for every 100 meters

(ix) John is a Cartographer who wants to draw map of his country district that shows major natural and man made features found in his country. Which of the following scales will be suitable for the task?
   A. 1:100000
   B. 1:1000
   C. 1:5000
   D. 1:25000
   E. 1:32000

(x) Magesa prefer to cultivate vegetables, maize, and beans on his farm. What type of farming is he practicing?
   A. Bush fallowing
   B. Shifting cultivation
   C. Crop rotation

D. Mixed farming
E. East Africa Rift Valley

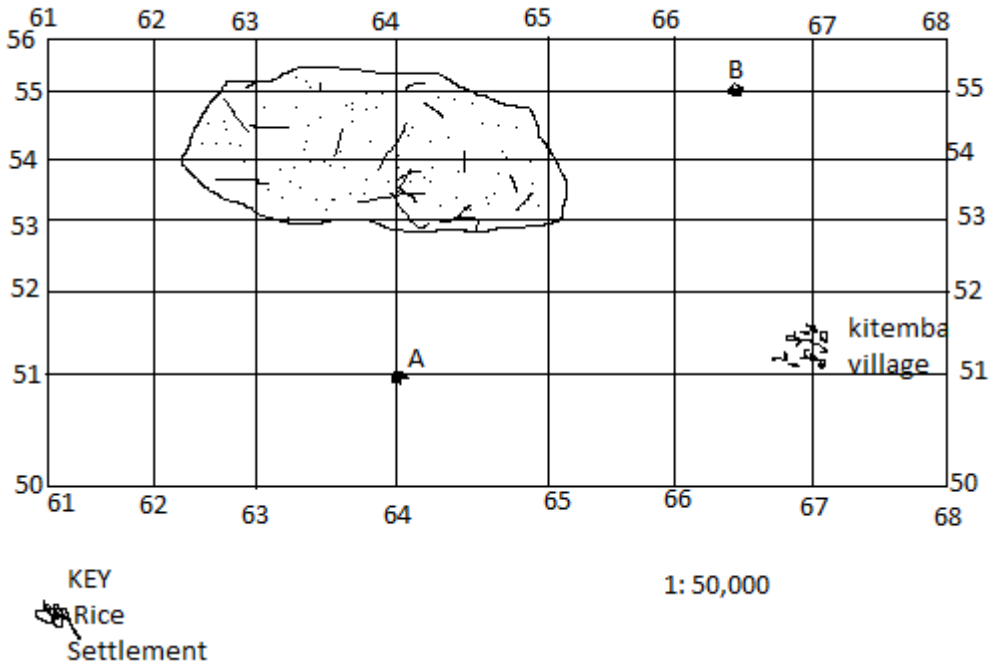

2. Match the item in LIST A with the answers in LIST B by writing the letter of the most correct answer beside the item number in the space provided.

LIST A	LIST B
i) Rock formed when magma solidifies deep in the crust and can be exposed on the Earth's surface by agents of soil erosion	A. Crystalline rocks
ii) Rock formed when molten magma cools and solidifies inside the rocks of the Earth's or the Earth's surface.	B. Igneous rock
iii) Rocks formed as a results of deposition and compaction of remains od dead plants and animals.	C. Coal
iv) Rock formed when different types of rock are subjected to great heat and pressure	D. Organic sedimentary rocks
v) Rocks formed when sediments are deposited either by wind, water, or ice.	E. Intrusive volcano rocks
vi) An example of rock formed when plants, shells and bones are compressed under pressure.	F. Extrusive volcano rocks
	G. Metamorphic rock s
	H. Gypsum
	I. Sedimentary rocks

SECTION B

Answer all questions in this section(54 MARKS)

3. Carefully study the map extract of Chumbwi Village, then answer the questions that follows;

(i) Calculate the area covered by the rice farms in km^2 given that the side of the full square is 2cm
(ii) Mention two essentials that have been applied in the drawing of the given sketch map.
(iii) Find the bearing and direction of grid reference 620500 from 650550.
(iv) Mention two methods that can be used to locate positions on the given sketch map
(v) Determine the grid reference of point A and B.

4. Despite the fact that road transport causes a lot of accidents in Tanzania, most Tanzania replaces road transport with air transport. Justify this statement with six points.
5. A form one students debates on the ability to be allowed by the headmaster to drop Geography subject because they think that it is useless. As a form three students, tell the form the benefits of studying Geography.
6. Most geographer has various perspectives toward classification of rocks, as a form three student who studies geomorphologic process, briefly, classify rocks according to the mode of formation.
7. Juma was inside the house where he observed sudden shaking of the floor due to the vibration of the Earth's surface caused by natural tones operating beneath the Earth's crust. Answer the following questions
   (a) Name the environmental hazard experienced by Juma
   (b) What instruments were used to measure the intensity of the hazard named in (a) above?
   (c) Briefly explain the four causes of the hazard in (a) above
   (d) Describe three (3) effects of the hazard named in (a) above .

8. (a) knowledge of the atmospheric condition of a place is an important factor since it enables people to prepare themselves about the expected weather conditions, this makes it important in the process of weather forecasting.
   (i) With five points, identify the importance of weather forecasting

(ii) List any five elements of weather that could be considered during the process of weather forecasting.

b) A weather station can not be established anywhere because various factors have to be considered. Identify five factors to consider when establishing a weather station.

SECTION C (30MARKS)

Answer TWO questions from this section

9. Mwajuma and Rose are three students who prefer to study mass wasting, which is said to be the movement of weathered materials dowwqqawq2aaq2zsas an the slope due to gravitational force. As three students who study mass wasting, explain the factors affecting the rate of mass wasting with examples.

10. Mr. Kagose wants to establish a plastic processing industry in Kibaha town. Analyze sic factors he should consider before locating industry.

11. Forests have a significant contribution to social, economic, and ecological development since they provide various products for human beings such as timber, poles, wood, logs, and honey. With examples, explain six points that are likely to happen if the forest is destroyed.
