THE UNITED REPUBLIC OF TANZANIA
THE PRESIDENT'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
LONGIDO DISTRICT
ANNUAL JOINT EXAMINATION

FORM THREE
013 GEOGRAPHY

Time: 2:30 Hours **November 2024**

Instructions

1. This paper consists of sections A, B and C with a total of **eleven (11)** questions.
2. Answer **all** questions in sections A and B and **two (2)** questions from section C.
3. Section A carries **sixteen (16)** marks, section B **fifty-four (54)** marks and section C carries **thirty (30)** marks.
4. Except for drawings which must be drawn in pencil, all writings must be in **blue** or **black** ink
5. Cellular phones and any unauthorized materials are **not** allowed in the examination room.
6. Write your **Examination Number** on every page of your answer booklet(s).

SECTION A (16 Marks)

Answer **all** questions in this section

1. For each of the items (i) – (x) choose the correct answer from among the given alternatives and write its letter beside the item number in the answer booklet(s) provided.

(i) Which one among the following by origin and composition is not a form of igneous rocks?

A Sill B Gypsum
C Lava plain D Volcano
E Granite

(ii) Sometimes the shape of the sea is anomalous, it can enter the land or surrounded by land sometimes surround the land. All these appearances have different name. What is the name of the part of sea that is surrounded by land?

A Peninsula B Cape
C Island D Gulf
E Strait

(iii) **Seyplam** was suprised to see objects with leading heads and bright tails in the sky, which were made up of ball ice, dusts and gases. According to your understanding, what do you think were those objects?

A Asteroids B Meteors
C Satellites D Comets
E Meteorites

(iv) Problem in the Indian Ocean where the captain called for the help from the Engineer crew. He told them, the ship is found somewhere in the South South East. What is the bearing of that direction?

A 112.5^0 B 247.5^0

C 2250 D 67.50

E 157.5^0

(v) Dr. Asha addressed the meeting at Mombasa (15^0E) at noon. The people of Benin observed the same speech at 8:00 am on the Television. Suggest the Longitude of Benin

A 30^0 W B 45^0 W

C 45^0 E D 60^0 E

E 60^0 W

(vi) Suppose you have been invited by your fellow students at Seypalm Secondary school to educate them about the topic of major features of the earth's surface, which are formed by the process of wrinkling of the upper parts of the earth crust due to compressional force. Which one among the following features will you present to them?

A Block mountains B Fold mountains

C Volcanic mountains D Rift valleys

E Residual mountains

(vii) **Seypalm** cultivates a piece of land and she leaves it for some years to regain its fertility. He is now expecting to go back for cultivation next year. What is the type of cultivation Liandeli practicing?

A Mixed farming B Shifting cultivation

C Modern cultivation D Mono-cultivation

E Bush fallowing

(viii) Rutashobya was explaining to her grandmother about the layers of the Earth's atmosphere. She told her that the atmosphere comprises of different layers in which one of them support rain formation due to its high amount of water vapour. From your understanding, what is the name of that layer?

A Mesosphere B Stratosphere

C Exosphere D Troposphere

E Ozone layer

(ix) It is a fact that Ocean currents are set in motion. Which one among the following is the reason for the movement of the Ocean currents?

A Revolution of the Earth B Rotation of the earth

C Gravitational force D Lunar Eclipse

E Overhead sun

(x) The people of Seypalm village are not served with electricity; instead, they are using the energy that is produced from Flora and Fauna products after being broken down by bacteria in an oxygen tree environment. From the knowledge you have acquired in from two on the topic of sustainable use of power and energy resources. What is the name of such energy?

A Wind Energy B Solar Energy

C Hydro Electric Power D Geothermal Energy E. Biogas Energy

2. Match the item in List A with the response in List B by writing the letter of the correct response besides the item number in the answer booklet(s) provided.

LIST A	LIST B
(i) Rock formed when magma solidifies deep in the crust and can be exposed on the Earth's surface by agents of soil erosion	A Crystalline rocks
(ii) Rock formed when molten magma cools and solidifies inside the rocks of the Earth or the surface of the Earth	B Igneous rocks
(iii) Rocks formed as a result of deposition and compaction of remains of dead plants and animals	C Coal
(iv) Rock formed when different types of rocks are subjected to great heat and pressure	D Organic sedimentary rocks
(v) Rocks formed when sediments are deposited either by wind, water or ice	E Intrusive volcano rocks
(vi) An example of rock formed when plants, shells and bones are compressed under pressure.	F Extrusive volcanic rocks
	G Metamorphic rocks
	H Gypsum
	I Sedimentary rocks

SECTION B (54 Marks)

Answer **all** questions in this section

3. Weather and climate are the son from the same parents and they are dependent in its presence.
   a) Identify four elements of weather.
   b) List down about four climates of the world that you know.
   c) Differentiate between weather and climate (three 3 points each)

4. Mr. Seypalm was watching the video program showing the ejection of molten materials within the Earth's crust or onto the Earth's exterior. This process was accompanied with the outbreak of ashes, gases and smokes. These molten materials sometimes cool and solidify within the Earth's crust to form both hypabyssal and plutonic rocks. And sometimes other materials reach the surface to form volcanoes.
   a) What was the genetic process observed by Mr. Seypalm from the video program?
   b) With examples explain the types of features produced by the process named in (a) above?
   c) Outline five (5) environmental impact resulted from the process named in (a) above.

5. With aid of diagram, explain concentric zones of the Earth.

6. Form three students ask for temporary movement for leisure and studies outside of Markaz areas.
   a) What is the name of that movement?
   b) Identify the two types of the movement named in (a) above.

c) Analyse four importance of that movement.

7. Form three students were given a map by their Geography teacher drawn by the scale of 1:50,000, and were supposed to answer the following questions:
   (i) Given the data, map distance from point A to B is 100cm what will be the actual ground distance in Kilometres? If someone travelled from point A and returned back to point B.
   (ii) The assumed map was characterized by the presence of plantations, water bodies, national parks and game reserves, crater and mountains, scrubs, schools, hospitals and contours. Elaborate three economic activities that you think might be taking place.
   (iii) Given the data full squares 0, half squares 16. How would you find the total area in Km2? If one square in the map had 2cm both sides?
   (iv) Convert the given map scale into statement scale

8. Most of the natives from Hanang witnessed a movement of weathered materials downward the slope in December 2023.
   a) Specify the geographical phenomenon that might have been observed by the natives.
   b) Describe two types of the phenomenon you have identified in (a) above
   c) Name three (3) factors influencing occurrence of the geographical phenomenon concern
   d) Determine three (3) causatives of the geographical phenomenon you have identified in (a) above.

SECTION C (30 Marks)

Answer **two (2)** questions in this section

9. In order for any country to attain development, transport sector should be given priority. Examine six (6) efforts made by government in developing air transport in Tanzania.

10. Solar energy is the mostly friendly energy resources to the environment, in Tanzania it seems like it is not harnessed in large quantities as the others sources of energy like charcoal, firewood and petrol. What might be reasons (3points) for problems and what are the possible solutions (3 points)

11. Two form one students were arguing against each other on the shape of the Earth. One was saying that the Earth's shape is flat, another was claiming that the Earth's shape is a flattened sphere. As a form three student, how would you resolve the misunderstanding among these form one students? Elaborate your arguments by giving six (6) points.
