THE PRIME MINISTER'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
LONGIDO DISTRICT MID TERM JOINT EXAMINATION

FORM THREE
013 GEOGRAPHY

Time: 3 Hours **Friday, 28th August 2026 a.m.**

Instructions

1. This paper consists of sections A, B and C with a total of eleven questions.
2. Answer all questions in section A and B, and two questions from section C.
3. Section A carries sixteen marks, section B carries fifty-four marks and section C carries thirty marks.
4. All working must be shown clearly.
5. All communication devices and any unauthorized materials are not allowed in the examination room.
6. Write your name on every page of your answer sheet(s).

SECTION A (16 MARKS)

Answer **all** questions in this section

1. For each of the items (i) – (x), choose the correct answer among the given alternatives and write its letter in the answer sheet(s) provided.

(i). Which one of the following is NOT a factor that influences the climate of an area?
A. Altitude B. Latitude C. Ocean currents
D. Population density E. Distance from the sea

(ii). The discontinuity that separates the crust from the mantle is known as;
A. Mohorovicic discontinuity B. Conrad discontinuity C. Gutenberg discontinuity
D. Repiti discontinuity E. Wiechert discontinuity

(iii). Physical (mechanical) weathering is most dominant in areas with;
A. High temperature and high rainfall B. Low temperature and high humidity
C. Large diurnal temperature range D. Areas near the equator E. High humidity only

(iv). The instrument used to measure atmospheric pressure is called;
A. Anemometer B. Barometer C. Hygrometer
D. Rain gauge E. Thermometer

(v). A river that joins and flows into a bigger/main river is known as;
A. Distributary B. Tributary C. Watershed
D. Meander E. Estuary

(vi). If the local time at Greenwich is 12:00 noon, what is the local time at a place located at 30°E?
A. 10:00 AM B. 2:00 PM C. 12:00 noon
D. 1:00 PM E. 2:30 PM

(vii). The type of livestock keeping practiced by people who move from place to place searching for pasture and water, without a permanent home, is called;
A. Ranching B. Nomadic pastoralism C. Sedentary livestock keeping
D. Transhumance E. Dairy farming

(viii). If a point on a map is located at grid reference 452368, then;
A. 452 are northings B. 368 are eastings C. 452 are eastings
D. 368 are latitudes E. 452 are longitudes

(ix). Which one of the following is a renewable source of energy?
A. Coal B. Natural gas C. Petroleum
D. Solar energy E. Uranium

(x). The main factor that determines the type of agriculture practiced in an area is;
A. Government policy only B. Climate C. Population size only
D. Religion E. Political boundaries

2. Match the volcanic features/terms in Column A with the correct descriptions in Column B by writing the letter of the correct response beside the item number in the answer sheet(s) provided.

COLUMN A	COLUMN B
(i). Crater	A. A vertical intrusion of magma cutting across rock strata
(ii). Caldera	B. A large depression formed after the collapse of a volcanic cone
(iii). Geyser	C. A hot spring that periodically ejects steam and hot water
(iv). Fumarole	D. A small opening through which volcanic gases escape
(v). Sill	E. A horizontal intrusion of magma between rock layers
(vi). Dyke	F. A bowl-shaped depression at the summit of a volcano
	G. A steep-sided volcanic cone made of ash
	H. A crack through which lava flows quietly onto the surface
	I. A flat area formed by solidified lava flows

SECTION B (54 MARKS)

Answer **all** questions in this section.

3. Study the following information carefully and answer the questions that follow.
(a) The scale of a map is given as 1:100,000. Convert this scale into a statement scale.
(b) Two points, P and Q, on a map have grid references 245368 and 245418 respectively. If the scale of the map is 1:50,000, calculate the actual ground distance between P and Q. Give your answer in kilometres.
(c) Using the square method, a forest on a certain map covers 40 complete squares and 18 incomplete squares, whereby each square represents 1 km² on the ground. Calculate the area covered by the forest.
(d) Define the term "contour line" and state what closely spaced contour lines on a map indicate about the nature of the land.

4. (a) Mention three limitations of chain survey.
(b) State the use of each of the following chain survey instruments:
(i) Ranging rod
(ii) Offset
(iii) Optical square.

5. (a) Distinguish between latitude and longitude. (2 marks)
(b) If the local time in Dar es Salaam (39°E) is 3:00 PM, calculate the local time in London (0°).
(c) State two (2) effects of the rotation of the earth.
(d) State one (2) effect of the revolution of the earth.

6. (a) Define the term "climate".
   (b) Explain three factors that influence the climate of a place.
   (c) Mention three instruments used in a weather station and state what each one measures.
   (d) Give two difference between weather and climate.

7. A farmer collected three soil samples from different parts of a farm. Sample A contained a large proportion of sand, Sample B contained a large proportion of clay, while Sample C contained a balanced mixture of sand, silt and clay.
   (a) Define the term soil.
   (b) Name the soil texture represented by Sample C.
   (c) Give three characteristics of the soil represented by Sample A.
   (d) Explain two ways in which soil erosion can be controlled on a cultivated farm.
   (e) State two factors that influence soil formation.

8. The Earth's surface is continuously modified by forces operating both inside and outside the Earth.
   (a) Distinguish between internal forces and external forces that affect the Earth's surface.
   (b) Give three examples of internal forces that affect the Earth's surface.
   (c) Explain two ways in which weathering contributes to the modification of the Earth's surface.
   (d) State two landforms that may result from volcanic activity.

SECTION C (30 MARKS)

Answer **two** questions from this section

9. Wildlife conservation is one of the major activities carried out in Tanzania. As a student who has studied regional focus studies, explain six (6) benefits of wildlife conservation to Tanzania.

10. "Mining is one of the leading economic activities in Tanzania, but it comes with several negative impacts to the environment and society." Justify this statement by giving six points.

11. Explain six (6) characteristics of nomadic pastoralism as practiced in tropical Africa.
