2. Answer all questions from Section A, B and only two (2) questions from section C
3. Section A carries sixteen (16) marks, Section B carries fifty four (54) marks and section C carries thirty (30) marks
4. All writings should be in blue or black ink except drawings must be in a pencil
5. Map extract of MKOMAZI sheet 109/1 is provided.
6. Programmable calculators, communication devices and unauthorized materials are not allowed in the examination room.
7. Write you name on the top right to every page of your answer sheet (booklet)

SECTION A 16 Marks

Answer all questions in this section

1. For each of items (i-x), choose the correct answer from among the given alternative and write its letter beside the item number in the answer sheet provided.

   i. Mr. Kibwanda visited a hot desert land scape. During his visit managed to learn that some rocks used to crock at peel-off. The geographical term for this process is referred as _____

   A. Salt crystallizations

   B. Exfoliation

   C. Carbonation

   D. Hydrolysis

   E. Granular disintegration

   ii. Suppose you are living in urban center and you are interested in keeping livestock. What type of livestock keeping would be suitable for you?

   A. Ranching
   B. Sedentary
   C. Transhumance
   D. Pastoralism

   iii. Mwajuma was explaining to her grandmother about the layers of the earth's atmosphere. She told her that the atmosphere comprises of different layers in which amount of water vapour. From your understanding what is the name of the layer?

   A. Mesosphere
   B. Troposphere
   C. Stratosphere
   D. Exosphere
   E. Tropopause

   iv. During holiday students passed along a certain forest having trees characterized with needle – like leaves and their fruits are cone-shaped. They are also growing in cold area. What type of forest is this?

   A. Deciduous forest
   B. Coniferous

C. Mangrove forest
D. Tropical monsoon forest
E. Equatorial forest

v. Mr. Ambrose visited Sambaru Village which was highly affected by earthquakes so as to determine the extent of destruction associated by the disaster. Which instrument helped him to achieve his goal?

A. Seismology

B. Seismograph

C. Ritcher sale

D. Mercalli scale

E. Seismometer

vi. Student reported enjoying the temperature of mount Uluguru – Morogoro region at 1500meters above the sea-level which is 32oC. They also planned to travel from Morogoro to Dar es Salaam which is at Seal level. What might be temperature experienced by students in Dar es Salaam?

A. $41^{o}C$
B. $10^{o}C$
C. $9^{o}C$
D. $23^{o}C$
E. $0.6^{o}C$

vii. Neema is living near the mountain within the time she noticed the bending of truck of trees and fences downward the slope. Identify the type of process occurred.

A. Land slide
B. Soil creep
C. Rock fall
D. Soil erosion
E. Mudflow

viii. The discipline master was assigned by the Headmaster to council his students because of peer influence suggest the type of human activities conducted by discipline master.

A. Quinary activities
B. Quaternary activities
C. Tertiary activities

D. Secondary activities
E. Primary activities

ix. Ateba was interested in developing energy from the remains of living organisms. What will be the best raw materials for Ateba's project.

A. Solar energy
B. Coal
C. Natural gas
D. Petroleum
E. Running water

x. Ferdinand Magellan is 1519 to `1522 he travelled straight around the earth from a certain point and comeback to the original point. This statement proves for

A. Spherical shape of the Earth

B. Earth rotation

C. Earth revolution

D. Structure of the earth

E. Obtale shape of the earth

2. Match the description of vulcanicity features in Column 'A' with the corresponding features in column 'B' by writing the correct answer beside the item number.

COLUMN A	COLUMN B
i. A saucer – shaped mass of rock formed in the geosyncline	A. Crater
ii. A rock sheet formed when magma solidifies horizontal along the bedding planes	B. Volcanic plug
iii. A cone – shaped accusation of rock fragment around the vent	C. Colden
iv. A feature that stands above the ground like a pillar	D. Shield volcano
v. A large crater formed which the upper part of the volcano is bombarded away by violent corruption in the volcanic cone	E. Dyke
vi. A wall-like feature formed when a mass magma cuts across the bedding planes of the rocks	F. Ash and cinder cone
	G. Folds
	H. Composite cone
	I. Sill
	J. Lapolith

SECTION B 54 MARKS

Answer all question in this section

3. Use the map extract of Mkomazi sheet 109/1 to answer the following question

   a) Find bearing and direction of Kwamiali grid reference 923803 from Mkomazi grid reference 980868

   b) With evidence from the map explain three economic activities that seen to be taking place on the mapped area

   c) State two (2) types of transport observed from the map

   d) Calculate area covered by the seasonal swamps through tracing method

   e) Describe drainage patterns found in the mapped.

4. Carefully read the weather data for station K and then answer the questions below.

Months	J	F	M	A	M	J	J	A	S	O	V	D
Temperature	13	12	18	24	30	35	34	35	33	27	20	16
Rainfall(mm)	70	150	100	100	150	80	60	50	100	120	200	102

   a) With two strong reasons identify the type of climate for station K
   b) In which hemisphere the station K located? Why?
   c) Calculate the annual mean temperature for station K
   d) Find the temperature range of station K
   e) Find the annual rainfall of six last months
   f) Suggest three (3) economic activities which might be take place in an areas with the such climate mentioned in @ above.

5. Form three students visited the river mouth of Rufiji River and they found that the river pours its water into Indian Ocean by spreading many small Channels called distributes covering a wide flat land with alluvium deposits forming a triangular shaped feature.

   a) Identify the feature observed by form three students

   b) Describe four (4) conditions necessary for the formation of a feature in @ above

   c) Briefly explain four (4) importance of a feature in @ above

6. You as form three student and you are knowledgeable about soil briefly explain with six points

7. Mr. Alberto was insides in his house, suddenly wondered saw the vibration and shaking of house and other objects inside and outside of the cause
   a) Identify the event observed by Mr. Alberto
   b) Identify the instrument used by Mr. Alberto to determine the intensity of the event occurred in @above
   c) Briefly happen from the event mentioned in @ above (two points)
   e) Advice Mr. Alberto to take precautions during that event occurred in @ above (two points)

8. Carefully study the photograph provided below and then answers the questions that follow.

   a) Name the crop shown in the photography above
   b) Mention three (3) necessary physical conditions for the growth of the crop
   c) List to regions in Tanzania might be the photograph taken
   d) With one reason suggest the type of climate
   e) Mention two contribution of economic activity taking place
   f) With one evidence suggest the scale of production of the crop shown on the photograph

SECTION C (30 MARKS)

Answer Two (2) Questions from this Section

9. The process by which flora of a given are decreases and eventually disappear is becoming a worst and pre dominant problem in most part of the world. As a geographer explain six (6) points on how to minimize the problem.

10. With vivid examples from your environment, explain on how mining sector is referred as robbery industry

11. "Agriculture is the linchpin of the economy of east Africa". Justify this statement by giving six points with special reference to Tanzania.
