(A) Plateaus (B) Plain (C) Mountains (D) Plutonic.

ix. Plant root can break down rock to form soil under the process known as

(A) Biotic weathering (B) Exfoliation (C) Chemical weathering
(D) Mass wasting. (E) Thermal expansion weathering.

x . A vertical features formed out of the solidification of magma within the earth crust is called.

(A) Phacolith (B) Sill (C) Dyke (D) Lapolith.

2. Match the items in List A with the responses in List B by writing the letter of the correct response beside the item number.

LIST A	LIST B
i. Removal of materials from surface of land. ii. Fineness and coarseness of the soil particle. iii. Wind blow more frequently in a particular region. iv. The amount of water vapour in the atmosphere. v. Wind vane.	A. Determine the direction the wind is blowing from. B. Soil erosion. C. Prevailing wind. D. Soil texture. E. Trade winds. F. Humidity. G. Determine the direction the wind is blowing to. H. Soil organic matter. I. Soil structure. J. Dew.

SECTION B (55 Marks)

Answer all questions in this section

3. Study the statistical table bellow and answer the following questions

Class interval	Frequency
0-4	2
5-9	3
10-14	9
15-19	4
20-24	2

Calculate the following

i. Mean
ii. Mode
iii. Median
iv. Standard deviation

4. The form four students at Namanga Secondary School were told by their Geography teacher to measure the area of the school compound.
   i. Which survey method will be suitable for that measurement?
   ii. Describe any four equipments that will be suitable for the method mentioned in (i) above
   iii. Explain two significances of the method mentioned in (i) above
5. Define the following terms as used in research:
   a) Research
   b) Case study
   c) Research methodology

(ii) Explain any three research tools that can be used to investigate on the failure of geography exam at Longido Secondary School

(iii) Briefly explain any five importance of research in daily life.

6. Study carefully the photograph bellow and then answer the questions that follow

(i) With two evidences identify the type of photograph above?
(ii) What is the common name of the animals seen on the photograph?
(iii) Give two human activities that are likely to affect the animals mentioned in (ii) above
(iv) Which main economic activity is likely to take place in the photographed area?
(v) Briefly give two economic benefits of the activity mentioned in (iv) above
(vi) Mention two areas where this photograph might have been taken in Tanzania.

7. Study careful the map extract of SIKONGE (sheet 137/2) and answer the questions that follows
   (i) Give two supportive contents that have been used on the given map by giving example.
   (ii) Find the area covered by the whole map. Give your answer in Km^2 (use grid square method)
   (iii) With evidences from the given map, give any two methods used to show relief of the mapped area.
   (iv) Comment on settlement pattern by referring on the given map.
   (v) By giving evidence from the given map, comment on any two (2) economic activities carried on the mapped area.
