THE PRESIDENT'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
LONGIDO SECONDARY SCHOOL

FORM FOUR PRE-MOCK EXAMINATION
013 GEOGRAPHY
MARKING SCHEME 2025

SECTION A (16 MARKS)

1. Answers

i.	ii.	iii.	iv.	v.	vi.	vii.	viii.	ix.	x.
E	A	E	C	D	D	E	D	B	C

2. Answers

i.	ii.	iii.	iv.	v.	vi.
L	G	O	G	H	A

SECTION B (54 MARKS)

3. (a) The length of the feature on the map is 25 cm

From the scale 1:50000

Where 1 cm = 100000 km

x = 50000

$\frac{1 \times 50000}{100000} =$

$x = \frac{1}{2}$ or 0.5 km

If 1 cm = 0.5 km

25 cm = x

$\frac{1cm \times x}{1cm} = \frac{0.5\ km \times 25\ cm}{1cm}$

x = 12.5 km

∴The length of the features from grid reference is 12.5 km

(b) 1:50000

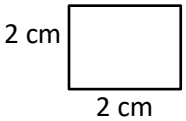

1 km = 100 000 cm

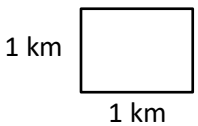

x = 50 000 cm

$\frac{x \times 100\,000\ cm}{100\,000\ cm} = \frac{1\ km \times 50\,000\ cm}{100\,000\ cm}$

$x = \frac{1}{2}$ or 0.5 km

∴ 1 cm on the map represents ½ kilometer on the ground

(c) On the map 

On the ground 

Full square + $\frac{half\ square}{2}$

$0 + \frac{12}{2}$

Square = 6

If 1 square on the map = 1 km^2 on the ground

1 square = 1 km^2

6 squares = x

$\frac{1\cancel{square} \times x}{1\cancel{square}} = \frac{6\ square \times 1\ km^2}{1 square}$

∴ the area of the map covered with season swamp is 6 km^2

(d)

(i). Cultivation: presence of cultivated land

(ii). Tourism: presence of hills

(iii). Lumbering: presence of forest on the mapped area

(iv). Transportation: presence of roads

4. (i)

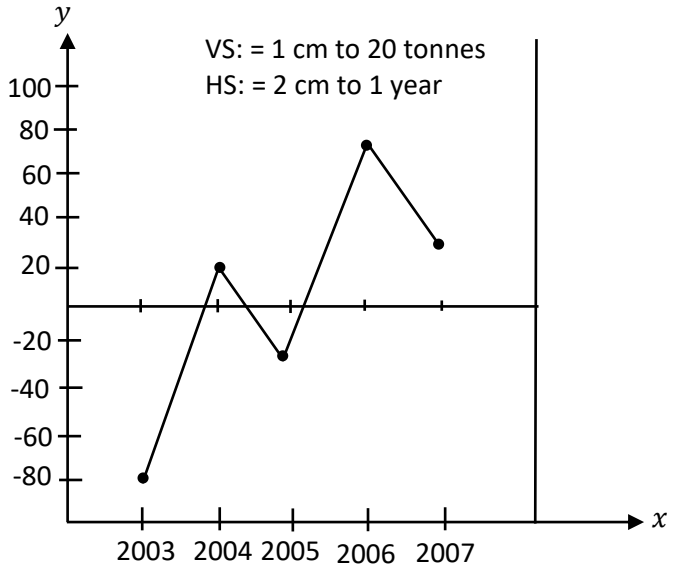

- Determine the variables
- Calculate the mean
- Find deviation of value from the mean
- Plot the deviation graph

(ii)

$\frac{70+160+120+210+185}{5} = 149$

years	Production	$\mathbf{X^1 - \bar{X}}$
2003	70	-79
2004	160	11
2005	120	-29
2006	210	61
2007	185	36

THE DEVIATION LINE GRAPH TO REPRESENT SISAL PRODUCTION IN KILWA FROM 2003 TO 2007

(iii) – simple line graph

- Simple bar graph

5. (a) Research objectives

(b) Research objectives; is the stage at which a researcher has to specify the aims, expectations, and outcomes under the study

(c)

- it should give outcome of the study
- it breaks down general objectives into smaller specific logical connected parts

(d) Formulation of hypothesis

6.

(a). Chainsaw survey

(b). Ruler, chain, tape and surveyor board

(c). Buildings, trees, cliffs

7.

(a) Meteorological summer

(b) Earth revolution

(c) Warm weather, long day, population migration

8.

(a) Ground/ horizontal photograph

(b) Giraffes

(c) Tourism due to the presence of giraffe

(d)

- Creates employment opportunity
- Encourages diplomatic relationship between countries
- Increases foreign exchange/currency
- It encourages trade

SECTION C (30 MARKS)

9.

Introduction: any relevant information **(02 Marks)**

Main body: factors for the development of hydroelectric power plant:

(i) There should be constant supply of water

(ii) There must be ready market

(iii) The ground should be steep to allow fast flow of water

(iv) Water quantity

(v) Geological stability

(vi) Economic and social consideration/Coast effectiveness

(vii) Social input **(any six points, 2 marks each)**

Conclusion (01 mark) any relevant conclusion

10.

Introduction: any relevant information about population **(02 Marks)**

Main body:

(i) Climate

(ii) Soil

(iii) Relief

(iv) Vegetation

(v) Mineral resources

(vi) Water resource
(vii) Political stability
(viii) Job opportunity
(ix) Historical site **(any six points, 2 marks each)**
Conclusion **(01 mark)** any relevant conclusion

11.

Introduction: any relevant information about Geography **(02 Marks)**
Main body: Importance of Geography

(i) It equips us with practical skills and knowledge
(ii) It equips us with skills for environment conservation
(iii) It helps us to understand social and economic relations between countries
(iv) It develops methods and skills of observing, measuring, recording and interpreting various geographic phenomena
(v) It promotes proper uses of available resources
(x) It increases awareness of our country**,** its boundaries and resources as our natural heritage **(any six points, 2 marks each)**
Conclusion **(01 mark)** any relevant information
