THE UNITED REPUBLIC OF TANZANIA

PRESIDENT'S OFFICE

REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT

NORTH WESTERN ZONE FORM FOUR FORM PRE-NATIONAL EXAMINATION

013

TIME:3HOURS **GEOGRAPHY 16-9-2024**

1. This paper consists of section A, B and C with eleven (11) questions
2. Answer ALL questions in section A, B and Two (02) questions from section C
3. Section A carries sixteen (16) marks, section B fifty-four (54) marks and section C carries thirty (30) marks.
4. Map extract of **SONGWE RIVER** sheet **244/3** is provided.
5. All answers must be written in the booklet provided.
6. Programmable calculators, cellular phones and any unauthorized materials are NOT allowed in the examination room.
7. Write your examination number /Name on every page of your answer booklets/ sheet (s)

SECTION: A (16 Marks)

Answer all question in this section

1. For each of the items (i) – (x) choose the correct answer from the given alternatives and write its letter beside the item number on the sheet provided.
   (i) Suppose you are the General Director at National environmental management and conservation (NEMC) and you have been asked by ITV channel to educate society about conservation measures against pollution of underground water. Which among the following alternative could be the best alternatives?
      (a) Farmers should be encouraged to use industrial fertilizer
      (b) Deforestation should be encouraged
      (c) The acidity in the ground should be added
      (d) The waste should be damped underground
      (e) The waste should be recycled
   (ii) Simba sports club left Washington, D.C (96^0W) at 05:00pm Friday, when will they land at Zanzibar (39^0E)
      (a) 02:00am Saturday
      (b) 04:00am Sunday
      (c) 02:00pm Saturday
      (d) 10:00am Saturday
      (e) 09:40pm Monday

(iii) Mr. Deo drawn a diagram that shows the moon is between the sun and the earth. What does this geographical phenomenon imply?
(a) Earth rotation
(b) solar eclipse
(c) earth revolution
(d) lunar eclipse
(e) penumbra eclipse

(iv) Farmers were transporting mangoes from Kasulu to Dar es salaam for sale. In which branch of geography, the activity under taken?
(a) Physical geography
(b) practical geography
(c) Human and economic geography
(d) political geography
(e) trans-human geography

(v) It is believed that when some rocks are subjected & great hear and pressure can change their physical and chemical properties'. What type of rocks will be formed when that situation happens?
(a) Metamorphic rocks
(b) phi tonic rocks
(c) granite rocks
(d) sedimentary rocks
(e) hypabyssal rocks

(vi) If the map distance from point A to B is 4cm while its actual ground distance is 22km, what is the representative fraction of the given map?
(a) 1:1,800,000
(b) 1:450,000
(c) 1:550,000
(d) 1:5500,000
(e) 1:50,000

(vii) Gormo cultivates a piece of land and he leaves it for some years regain its fertility. He is now expecting to go back for cultivation next year. What is the type of cultivation Gormo practicing?
(a) Mixed farming
(b) Shift cultivation
(c) modern cultivation
(d) mono – cultivation
(e) bush fallowing

(viii) Meshack saw two streams/ small river that are Msilve river and Mgongo river joining into Ruaha river, what is the geographical name of the two small rivers?
(a) Tributaries
(b) perennial rivers
(c) distributaries
(d) water shed
(e) common river

(ix) Sonia wants to carry out a field study on the atmosphere conditions suitable for growth of maize on a farm voltage. What are the best weather components & be considered?
(a) Rainfall and wind

(b) Rainfall and cloud cover
(c) moisture and sunshine
(d) rainfall and temperature
(e) pressure and humidity

(x) The Maasai around Oldonyo Le Ngai mountain were wondering the way the mountain was ejecting fire and smoke. They believe that the mountain was possessed by bad evils. Tell them what geological process that was taking place.
(a) Volcanic eruption
(b) tectonic movements
(c) mass wasting
(d) faulting
(e) folding

2. Match the description of the drainage pattern in List A with the correct name of the drainage pattern in List B.

LIST A	LIST B
i. Is the drainage pattern which flow outward down the slunk or slopes of the done or cone shape up land	A. Dendritic drainage pattern
ii. Is the drainage pattern which has a series of streams flowing in a spiral way forming concentric curve of the dome or round the crater where there is alternate band of soft and hard rocks	B. Trellised drainage pattern
iii. Is the drainage pattern in which all streams flowing in all direction converge at the counter in the basin	C. Rectangular drainage pattern
iv. Is the drainage pattern which has tributaries joining the main river at right angle and it is common at areas which are faulted	D. Radial drainage pattern
v. Is the drainage pattern which develops in the areas with alternate hard and soft rocks and the tributaries join the main river at almost right angle	E. Annual drainage pattern
vi. Is the drainage pattern which looks like trunks of tree and its branches or a leaf with its rains. It normally develops in areas with uniform rock structure	F. Centripetal drainage pattern
	G. Parallel drainage pattern

SECTION: B (154 Marks)

Answer all question in this section

3. Study carefully the map extract of SONGWE RIVER sheet 244/3 and then answer the following questions.
(a) A map contains information which reflect to the actual area represented, state three factors that might affect the content of a topographical map given
(b) By considering the scale given 1:50,000. Calculate the area covered by the forest in Northern east of the map

(c) With evidence from the mapped area identify three ways used & indicate features like mountain, river, hills, escarpment, villages and other features in the mapped area.
(d) Suppose you have been given the vertical increase (vi) 20m and scale of `1:50,000, what will be the total distance of a person will move from a grid reference 020079 to 130121 and then go back to the point where he started.

4. Ocasha Dickson is a form four student at Tandaimba secondary school during Geography class he was presenting on the construction of simple bar graph. As a form four student assist him, by using the following data to;

Year/crop	2005	2006	2007	2008
Coffee	200	400	500	400
Sisal	350	550	700	600
Rubber	400	650	800	450

(a) Presenting the coffee data by using simple bar graph
(b) Pint out three demerits and tree merits of the method
(c) Outline the other two methods that can also present the data.

5. Research is the scientific investigation because if follows the steps, all steps are supposed to be observed carefully. However, the third step is very important as it helps the researcher to think about other outcomes of the results.
(a) What is the step?
(b) Explain the types of the step mentioned in "a" above
(c) Give three (3) characteristics of the step mentioned in (a) above?
(d) Briefly describe three (03) importance of the step you have identified in "a" above

6. Mr. Msele is Geography teacher at Konoike secondary school. He taught his students theoretically on how to conduct a simple survey when they were in a classroom. On the next day he wanted them to do it practically where he told them to collect the materials that will be used to draw the map of their surveying process.
(a) Suggest the type of land survey that will be used in their surveying process
(b) Explain two types of obstacles that will be encountered
(c) Mention four (04) equipment's that can be used by students in accomplishing the task.

7. The flying drone took photograph with the camera inclined vertically in order to produce the top view of Ngarenaro village so as to make the print which will be used to produce the district map.
(a) What type of the photograph is that?
(b) Explain three (03) strength of the photography produced?
(c) Describe three limitations of the photography produced

8. Mr. Isack was watching the video program showing the ejection of molten materials within the earth's crust or onto earth's exterior. This process all companied with the outbreak of ashes, gases and smoke. This molten material sometimes cool, solidify within the earth's crust & form both plutonic and hypabyssal rocks, and sometimes other materials other material, reach to the surface.
(a) What is the genetic process observed by Mr. Isack from the Video program?
(b) Outline five (05) environmental impact resulted from the process in (a) above.

SECTION: C (30 Marks)

Answer two questions from this section

9. Despite of the fact that road transport causes a lot of accidents in Tanzania most of Tanzanians prefer road transport to air transport, with six pints justly this statement.
10. Ulomi's grandmother used to cultivate many crops in a small are using local seeds, a hand hoe and manure. She is now blaming that in five years the harvests are poor. She is complaining that her neighbours are the ones causing it. With six points, explain to her how she can improve her farming system.
11. Mr. Kiswaga has a great belief that human activities can lead to the mediation of the physical environment and distribution of people. One the other hand, this may be as the result of the types of environments in the area. With six (06) points, explain the factors influencing population distribution in Tanzania.
