ii. What temperature will be experienced by the Posta ferry Dar es Salaam residents 0 metres above sea level if the temperature of Korogwe Tanga 1500 metres above the sea level is 23^0C?
   A. 09^0C
   B. 17^0C
   C. 32^0C
   D. 14^0C
   E. 12^0C

iii. My brother is living in the area where houses are far from one another and agriculture is the main activity in the area. What kind of settlement pattern is depicted in the area?
   A. Liner settlement
   B. Sparse settlement
   C. Urban settlement
   D. Nuclear settlement
   E. Mega settlement

iv. The owner of a plastic industry ordered the management to use environmental friendly energy sources in production. Which energy source could be used in that industry?
   A. Petroleum
   B. Nuclear
   C. Fuel wood
   D. Coal
   E. Solar

v. Form one students were watching a Television program on various human activities in Kidole village. Which among the observed activities is of environmental conservation method in that village?
   A. Spraying
   B. Deforestation
   C. Afforestation
   D. Migrating
   E. Burning

vi. Kashasha jogging club from Migombani in Dar es Salaam went to Moshi region to climb Mount Kilimanjaro. If you classify that mountain, it will fall under which category of the following mountains?
   A. Residual
   B. Volcanic
   C. Fold
   D. Block
   E. Rock mountain

vii. In Shinyanga, most farmers leave idle the exhausted part of the land for a certain period to regain fertility and then cultivate them again. How can you call this farming technique?
   A. Shifting cultivation
   B. Sedentary farming
   C. Bush fallowing
   D. Aquaculture
   E. Mixed farming

viii. Most of the areas in Pwani region are frequently experiencing flood during heavy rain. Which among the following soil properties accelerate the occurrence of such calamity?
   A. Soil Ph
   B. Soil porosity
   C. Soil shape
   D. Soil air
   E. Soil temperature

ix. Bahati went to enjoy the sea breeze at Coco beach in the Indian Ocean during the weekend. She saw a big forest over the area while passing along it. How does that forest differ from other forest types regarding their growing condition in certain areas?
   A. Heavy rain
   B. Deep soil
   C. Saltwater
   D. Cold climate
   E. Mountainous climate

x. Jaha completed his form four education in 2021. He lives in the region characterized by little rainfall, high temperature during the day, very cold during night and common vegetations are thorn trees and cactus. Currently he is working in dates farm in his region. In which climatic region does Jaha live?
   A. Mediterranean
   B. Equatorial
   C. Monsoon
   D. Savannah
   E. Hot desert

2. Match the descriptions of the types of folds in **List A** with the type of folds in List **B** by writing the letter of the correct answer beside the item number in the answer sheet provided.

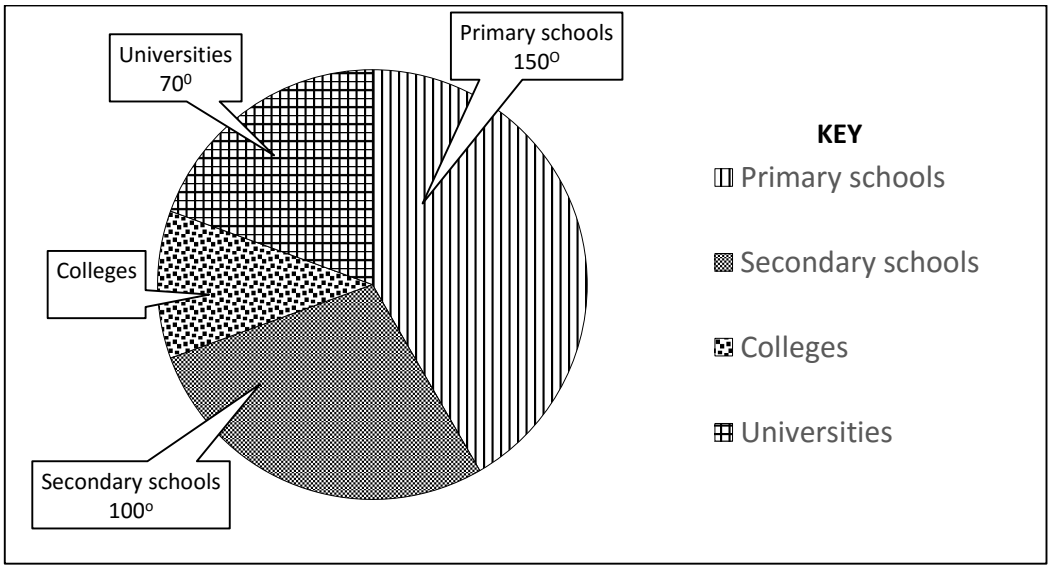

List A	List B
(i) Are the folds with one limb steeper than the other (ii) Are the folds where one limb is pushed over the other (iii) One limb is pushed over the other limb over another limb to a greater distance. (iv) Folds have equal limbs formed by two compression forces of equal magnitude (v) One limb is pushed over the other limb along the line of thrust plane. (vi) Folds that are packed closely together and with limps almost parallel to each other	A. Simple folds B. Over thrust folds C. Centreline folds D. Asymmetrical folds E. Recumbent folds F. Isoclinal folds G. Over folds H. Geosyncline folds

SECTION B (54 Marks)

Answer **all** questions in the section

3. Study the map extract of **Arusha sheet** 55/3 and then answer the following questions
   a. Describe the relief of the area
   b. Describe the settlement pattern of the area shown in the map
   c. Mwanjaa was at Mwangula school grid reference 260230; she saw a flying bird at 135°SE. The same bird was seen by Maneno at 225^0 SW who stood at Ngurobob grid reference 320250.
      (i) Determine the position of the flying bird by grid reference
      (ii) By using the given RF scale measure the distance between Maneno and the flying bird and write your answer in kilometre
   d. In which hemisphere is the mapped area found? Give evidence.

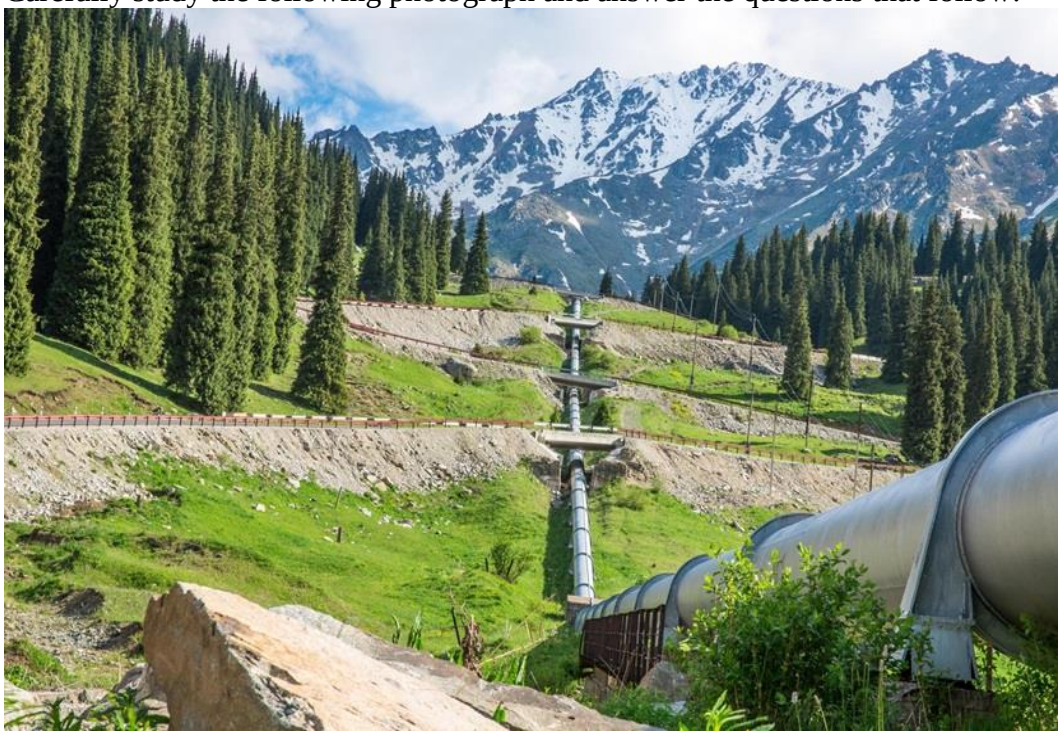

4. The pie chart below shows the allocation of money that the government spends on different government educational institutions in the Tanzania mainland in 2023.

If the total money spent is known, we can calculate the expenditure on each sector. Assuming that the total money spent is 720,000/=. Find:

i. Degree in Colleges
ii. The money allocated to Primary schools, Secondary schools, colleges and Universities
iii. Present the amount obtained in (ii) above by the means of simple bar graph.

5. Carefully study the following photograph and answer the questions that follow:

(a) Identify mode of transport used in the area.
(b) Name two products and examples of the mode of transport that you have mentioned found in your country.
(c) At what time the photograph was taken?
(d) Suggest the possible processes responsible for the formation of the relief feature seen on the background
(e) Apart from transportation, suggest the possible three economic activities that might take place in the area

6. The form three surveying team of Mango secondary school was told by their geography teacher to conduct chain survey around their sport ground so as to make boundaries of their sport ground. In accomplishing their survey, the team realized that they have collected data with discrepancies due to improper arrangement of the poles.
    a) Name and explain the type of discrepancy the surveying team encountered?
    b) What are the four (4) things the surveying team was supposed to consider so as to avoid such discrepancy?
    c) Identify three people who are involved in the form three surveying team at Mango secondary school.

7. People who are living in the areas close to the slope of mountains or hills frequently experience downward movement weathered materials like rocks, soil and mud.

   a) Name the geographical scenario taking place
   b) Explain five (5) factors affecting the nature and speed of the geographical scenario

8. Mkude and his friend Kitale were travelling from Kibaha to Morogoro, Along the road, they saw people selling rocks, Kitale asked what type of that rocks? Mkude answered, those are sedimentary rocks from Tanga, in general those rocks are important to our life. In six (06) points support Mkude's words.

SECTION C (30 Marks)

Answer **two (02)** questions in this section

9. In the one of the world economic forums President Samia Suluhu Hassan said that "One among the factors for wide gap between Africa and Europe is level of manufacturing industries in such a way we can't compete with their industrial goods in the world market." Suggest six ways that can be employed by government to uplift this sector.
