SECTION A (16 Marks)

Answer all questions in this section

1. For each of the items (i-x), choose the correct answer from the given alternatives and write its letter beside the item.

(i) Form three students were making revision on the concept of features formed by wind erosion. What do you think is correct about the features formed by wind erosion?

A. Batholith, dykes, and volcano
B. Rock pedastals, yardangs and zeugens
C. Sills, batholith and phacolith
D. Crystalline, sediments and metarmophic
E. Soil profile, soil texture and rocks

(ii) Gabriel Jesus from Arsenal scored a winning goal for his team against Man City at 5:00pm in England (15^0W) at what degree of longitude was the goal scored at 7:00pm In Mbeya?

A. 60^0W
B. 15^0W
C. 30^0W
D. 45^0E
E. 45^0W

(iii) Students from Kilimahewa secondary school conducted a study tour to volcanic region and when they reached the area, they were wondering the way hot water was forcefully emitted into the atmosphere from the ground due to volcanic eruption. This feature is called.....

A. Hot spring
B. Crater lake
C. Geyser
D. Water fall
E. Mud flow

(iv) Hamis is a form three student, he saw the deposition of moisture or frozen water from the atmosphere but he didn't know what it was. What would you call what Hamis saw?

A. Hail
B. Precipitation
C. Rain
D. Sleet
E. Snow

(v) The boundary that separates the mantle and crust is termed as

A. Mohorovic discontinuity
B. Guternberg discontinuity
C. Conrad discontinuity
D. Atmosphere
E. Core

(vi) The process of peeling off and falling of the rock mass like an onion is called?

A. Change in temperature
B. Exfoliation
C. Crystallization
D. Frost action
E. Granular disintegration

(vii) If temperature at 500m where the tourist starts climbing Mount Kilimanjaro is 20°C, what will be the temperature when they reach 2000m above the sea level?

A. 10°C
B. 5°C
C. 11°C
D. 12°C
E. 15°C

(viii) What is the dominant characteristic of a rock formed from eruption of lava from interior of the earth surface?

A. Metamorphic
B. Crystalline
C. Formed in layer
D. Sedimentary
E. Igneous rock

(ix) The people around Lake Nyasa were facing the problem of land shortage for agricultural activities and construction of their dwellings due to the presence of the lake, but they decided to fill sand and mud in some parts of the lake so as to have the area for performing their daily economic activities. What type of process that was done by the Nyasa people?

A. Land degradation
B. Land increase
C. Water sealing
D. Land reclamation
E. Irrigation

A. Equatorial
B. Mediterranean
C. Tropical
D. Tropical savanna
E. Polar climate

2. Match the items in list A with the correct response in list B by writing the letter of the correct response beside the item number in the answer booklet provided.

LIST A		LIST B
(i)	Is the arrangement of soil on the slope from the top to the bottom	A. Leaching B. Soil C. Salinization D. Soil structure E. Weathering F. Soil profile G. Soil porosity H. Soil p.h I. Soil catena J. Soil texture
(ii)	Refer to the empty spaces between particles of the soil materials especially which undistributed	
(iii)	The vertical section from the surface to the parent rock characterized by distinct layer	
(iv)	Acidic or alkalinity used to determine the amount of hydrogen ions in the soil	
(v)	Is the arrangement of the soil particles into aggregate compound particles	
(vi)	The process of washing down nutrients in the solution from top soil layer to sub soil layer	

SECTION B (54 Marks)

Answer **all** questions in this section

3. Carefully study the map extract of Songwe sheet 244/3 provided answer questions that follow
   a) Measure the length of railway from grid reference 020080 to grid reference 100137 in km
   b) Identify any three methods used to show the relief features of the mapped area
   c) Change scale of the map into the statement scale
   d) With evidence mention two means of transport shown in the mapped area
   e) With evidence from the map identify three social services which found in the mapped area

4. Read carefully the statistical data bellow showing cash crops production (00 tones) in east Africa in the year 2023

COUNTRY	CROPS		
	COFFEE	TOBACCO	COTTON
Kenya	280	200	150
Uganda	300	170	80
Tanzania	250	100	290

a) Construct a multiple bar graph
b) Comment on the nature of the production according to your graph
c) Show merits and demerits of the graph provided (three points per each)

5. A geography teacher at Kalimjee secondary school assigned his students to determine the distance by measuring series of straight lines on the ground. As an expert in surveying:-

   a) Advice the students of Kalimjee secondary school the suitable survey technique for their assignment
   b) Name at least four equipment they likely to use
   c) Mention four importance of survey

6. Research is a scientific investigation aimed at finding solutions to geographical problem. By giving out six (06) points describe sources of research problem.

7. Carefully study the photograph attached, then answer the questions that follow.

   a) With two reasons, identify the type of photography.
   b) Name two possible economic activities being conducted in the area.
   c) Suggest the type of climate of the area.
   d) At which time was the photograph taken.

8. Katoto is a farmer whose farm is near a dry river valley. On one side of river valley water from the dry river valley diverted to the wet river valley.
   a) Explain that phenomenon took place.
   b) With the aid of diagram explain three major features produced.

SECTION C (30 Marks)

Answer only two questions from this section

9. Tanzanian government moves to enter into an agreement to release port of Dar Es Salaam with an international company known as DP World of Dubai. As a form four student who knows about water management, prove with six points that harbors with good infrastructures are important to Tanzania.

10. Soil is normally different from one place to another in terms of their physical, biological and chemical properties. However this is determined by the factors and processes involved during its formation. Critically, in six points elaborate how soil is beneficial to human life.

11. Man power mobilization is one of the ways geared towards solving population problems as well as economic and environmental predicaments. As a form four student, discuss six (6) problems facing the mobilization of man power in Tanzania.
