   (a) Specify the geographical phenomenon that might have been observed by the natives.
   (b) Describe two types of the phenomenon you have identified in (a) above
   (c) Name three (3) factors influencing occurrence of the geographical phenomenon concern
   (d) Determine three (3) causatives of the geographical phenomenon you have identified in (a) above.

6. Carefully study the following data and answer the questions that follow:
   Production of food crops in Mbeya region

YEAR	MAIZE	BEANS	RICE	WHEAT
2004	8000	1400	3320	3000
2005	6000	2600	4000	2900
2006	6000	4300	6000	5000
2007	4500	4300	3850	2300
2008	3200	2850	1390	1800

   (a) Find the mean production of wheat
   (b) Draw the divergence line graph to present wheat production
   (c) Briefly explain four merits of using divergent line graph
   (d) In which year the production of wheat was below the mean

7. Give one reason for each of the following:
   (a) Ranging pole has a pointed metal end
   (b) Notebook is important during field study
   (c) During surveying measurements are called back by the booker.
   (d) Ranging rods are painted with red and white or black colour
   (e) Leveling staff is used during the surveying activities
   (f) Arrows are tied up at cherty with red rag

8. Carefully, study the photograph bellow and then answer the questions that follow:

   (a) With relevant reason, identify the type of photograph above
   (b) At what time the photograph might have been taken?
   (c) (i) Name the crop shown on the photograph.
   (ii) Identify the stage reached by the crop.
   (d) Name two necessary natural conditions required for the sustainability of the crop shown on the photograph.

SECTION C (30 Marks)

Answer **two (2)** questions in this section

9. Zanzibar is working hard to exploit her resources through blue economy. Describe six economic sectors which are being developed in blue economy.
