THE PRESIDENT'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
LONGIDO DISTRICT

FORM ONE TERMINAL EXAMINATION
051 FOOD AND HUMAN NUTRITION
MARKING SCHEME MAY 2025

SECTION A (15 MARKS)

1. Multiple choice (10 marks 1@)

i	ii	iii	iv	v	vi	vii	viii	ix x
B	C	C	C	A	A	A	B	B A

2. Matching item(5 marks 01@)

List A	i	ii	iii	iv	v
List B	E	F	G	D	B

SECTION B (70 MARKS)

3.(a) Importance of water in the body(5 marks)

i. Forming an essential component in blood and body secretions such as digestive juice
ii. Carry nutrients and oxygen to body cells
iii. Supporting the structure of the body cells
iv. Assisting in the secretion and elimination of body wastes through the kidneys
v. Assisting in food digestion, absorption and assimilation of nutrients
vi. Regulating body temperature
vii. Acting as a lubricant in joints and membranes (5 marks)

(b) Importance of roughage (5 marks)

i. It prevents constipation
ii. It lowers cholesterol and blood glucose levels
iii. It speeds up the passage of food through the digestive tract, hence increasing the fecal bulk
iv. It regulates body weight
v. It makes the stomach full all the time

4.(a) Factors to consider when cooking food so as to retain its nutrients (5 marks)

i. Cook food with little water and serve the food with its liquids to avoid losing water soluble vitamins
ii. Prepare enough food for a moment to avoid leftover which will need reheating, hence loss of nutrients
iii. It is advisable to cook vegetables in high heat for a very short time to reduce the loss of heat sensitive nutrients such as vitamins C.
iv. Cove food when cooking as some of the water-soluble vitamins like vitamins C and B can evaporate

v. Do not use bicarbonate of soda or ashes in cooking as they destroy a number of vitamins such as vitamins C, D, BI and B2

(b) Factors to consider when preparing food (5 marks)

i. When peeling foods like potatoes, carrots and fruits you should use a sharp knife to peel them
ii. Wash vegetables and fruits before chopping to avoid loss of vitamins
iii. Avoid exposing vegetables to direct sunlight to prevent loss of vitamins for example vitamins C and A.
iv. Vegetables and fruits should be prepared few minutes just before serving
v. Food that can be oxidized such as avocados, bananas and potatoes should not be exposed to air
vi. Vegetables and fruits should not be soaked.

5.(a) Factors to consider when planning balanced Meals for family members (5 marks)

i. Age of an individual
ii. Sex of an individual
iii. Occupation of an individual
iv. State of the body or physiological status
v. Time available for cooking food
vi. Economics consideration
vii. The equipment available
viii. Climate condition
ix. Time of a day
x. Religion, cultural values, traditional believes and taboos

(b) Sources of roughage (5 marks)

i. Unrefined cereals
ii. Apple
iii. Cabbage
iv. Fruit
v. Pulses

6.(a) Functions of protein in the body (5 marks)

i. Development of body tissues, maintenance or repairs of worn - out tissues
ii. Formation of enzymes and hormones for regulating body processes
iii. Production of antibodies, which help the body to fight against diseases
iv. Supplying the body with energy when a meal does not provide enough carbohydrates and fats
v. It builds the body

(b) Functions of fats in the body (5 marks)

i. It act as an insulator
ii. It protect internal organs, such as heart and kidney from damage
iii. They provide a sense of fullness
iv. Fats are a concentrated sources of energy

v. They provide a reserve of energy for long time
vi. Fats improve the texture and flavour of food
vii. They facilities the absorption of fat - soluble vitamins (A, D, E, and k)

7.(a) The Nutrients need in the body (5 marks)
i. Protein
ii. Carbohydrates
iii. Fats
iv. Vitamins
v. Minerals

(b) Food groups
i. Cereals, starch, roots, tubers
ii. Food of animal original
iii. Vegetables
iv. Fruits
v. Pulses, Nuts, and oily seeds
vi. Fats and oil

8.(a) Subjects Which relate with food and human nutrition (5 marks)
i. Biology
ii. Chemistry
iii. Physics
iv. Mathematics
v. Agriculture

(b) Importance of eating food (5 marks)
i. Providing energy to the body
ii. Building and repairing body cells
iii. Regulating body processes
iv. Protecting the body against diseases
v. Strengthening social relationships
vi. Identification

9.(a) The importance of studying food and human nutrition (5 marks)
i. It helps the students to prepare balanced Meals at home
ii. It gives knowledge about catering business a
iii. It helps students to know how to prepare and cook different types of food and beverage
iv. It gives knowledge about importance of balanced Meals
v. It helps students to know about types of food groups

(b) Foods which rich in protein (5 marks)
i. Fish
ii. Milk
iii. Eggs
iv. Meat

v. Beans

SECTION C (15 MARKS)

10. Deference between micronutrients and macronutrients and give its examples for each type
    i. Macronutrients are required in large amounts in the body.
    ii. They include carbohydrates
    iii. Protein
    iv. Fats
    v. Micronutrients they are required in small amount, it include
    vi. Vitamins
    vii. Minerals
