MOCK EXAMINATIONS ARUSHA

SECTION A 15 MARKS

Answer all questions in this section

1. For each of the following items (i-x) choose the most correct answer from the given alternatives and write its letter in the table indicated below the items

   (i) A bank uses powerful computer for transactions while students uses a laptop for assignments. Which is the correct classification?

   A. Bank – Super computer Student multicomputer

   B. Bank – Mainframe, student – Microcomputer

   C. Bank laptop, Student super computer

   D. Bank Microcomputer, student Main frame

   (ii) Consider the following sequence of steps for a student's morning routine: 1. Work up, 2.If it is a school day THEN go to step 3, ELSE go back to sleep. 3.Take a shower. 4. Get dressed 5. Eat breakfast. This sequence is best described as

   A. A flowchart because it uses a decision

   B. An algorithm because it is a finite set of logical steps to solve a problem (getting ready)

   C. A program because it is written in English

   D. Pseudocode because it uses keywords like 'if ' and 'ELSE'

   (iii) In the context software, 'Debugging' refers to:

   A. Running an Antivirus scan to remove malware

   B. The process of identifying and removing errors from a program

   C. Deleting temporary files to free up disk space

   D. Updating software to the latest version

   (iv) A Diamond shape in flowchart is used to represent;

MOCK EXAMINATIONS ARUSHA

A. An input or output operation

B. The start and End of the process

C. A process step like a calculation

D. A decision point or a conditional branch

(v) A computer is powered on but display nothing on the screen. The power light on the monitor is off. What is the MOST logical first step in troubleshooting?

A. Replace the monitor

B. Open the computer case and replace the RAM

C. Check if the monitor is plugged into a power source and turned on

D. Reinstall the computer operating system

(vi) Mary types her essay using a keyboard and later scans a picture into a computer. Which devices is she using?

A. Output devices

B. Storage devices

C. Processing devices

D. Input devices

(vii) A self-driving car users sensors and algorithms to navigate. Which combination is most essential for self -driving car to detect obstacles and decide when to stop or run?

A. GPS receiver and fuel injector

B. Steering wheel and braking pedal

C. Date collection devices and decision-making programs

D. Car battery and headlights

(viii) Mr. Ayo spilled water near his computer keyboard. What should he do first?

A. Continuer typing quickly

B. Switch off the computer and disconnect power

C. Wipe the water while computer is on

D. Blow air into the keyboard

MOCK EXAMINATIONS ARUSHA

(ix) Mark notice that his computer is running slow where he opens multiple programs. Which component is responsible for temporarily storing data and instructions up speed up processing?

A. Read only Memory (ROM)

B. Random Access Memory (RAM)

C. Solid state Drive (SSD)

D. Hard Disk Drive (HDD)

(x) It is a movable indicator that display the location on a computer screen where text will be entered when user types on the keyboard

A. The home key

B. Cursor

C. Enter page

D. The arrow key

Answers:

i	ii	iii	iv	v	vi	vii	viii	ix	x

2. Match the items in List A with a responses in List B by writing the letter of the correct response beside the item number in the table provided below the items

	List A	**List B**
i	An era characterized by room size computers that were unreliable and power hungry	A. Very large-scale integration
ii	Era began when thousands of transistors were minimized	B. Vacuum Tube technology
iii	onto a single silicon chip The key invention was a single chip that contained an entire central processing unit	C. Transistor technology D. Microprocessor design technology
iv	It marked the shift from mechanical electrical part to a much smaller faster and more durable electronic component	E. Integrated circuits technology
v	The goal of this era is to develop machines capable of learning and self - organization	

Answers:

i	ii	iii	iv	v

SECTION B (70 Marks)

Answer All questions in this Section

MOCK EXAMINATIONS ARUSHA

3. (a) Mary is ordering groceries online through and e-commerce website. Explain how computer Science facilitates this process

……
……
……

(b) Describe the function of Arithmetic Logic Unit (ALU) within central Processing Unit

……
……
……
……

4. (a) A medical researcher is using machine learning to predict disease heartbreaks. How does computer science contribute this field?

Give two reasons

……
……
……

(b) In the context of storage, differentiate between volatile and non-volatile. Give one example of each

……
……
……

5. (a) Lona is a college student who needs a computer for writing essay, browsing the internet, and managing her e-mails. She wants something affordable and easy to use. Which type of computer would be the best for Lona and why? Give two reasons

……
……
……

(b) Your friend is computer is emitting loud, grinding noise from the system unit. What is the most likely cause, and what type of maintenance would be required to solve it

……
……
……

(c) Differentiate between system software and Application software

……
……
……

MOCK EXAMINATIONS ARUSHA

(d) Classify the following as either system software or Application software

(I) Microsoft Windows …….

(II) Google Chrome ……..

(III) Android OS ……..

(IV) Microsoft Excel ……

6. A company want to add dedicated graphics card to its computers for better video performance, Which part of system Unit allow for adding extra components like a graphic card?

……
……
……

(b) A school computer lab needs a device that allow the students to see what they are working on. Which external hardware component is necessary for displaying output?

……
……
……

7. As the student of form two explain to your parents the following:

(I) Internet:……
……

(II) URL:……
……
……

(III) BCC:
……
……
……

(IV) CC:
……
……
……

(V) What are the benefits and draw backs of using public WI-FI for internet connectivity?

Benefits

A. ……

MOCK EXAMINATIONS ARUSHA

B. ……

C. ……

8. (a) What essential hardware and software components are required to establish a home internet connection

Hardware

(I): …….

(II): ……

(III): ……..

Software

(I): …….

(II): ……

(III): ……

Software:

(I): ……..

(II): …….

(III): ……

(b) What is ISP in the context of internet give two examples

……
……

(c) Suppose you want to represent an algorithm to find a sum of any two numbers entered by a user, represent by wing a flow chart

MOCK EXAMINATIONS ARUSHA

9. Physics students were studying and encounter computer science items in their physics book you as a computer science expert please help them

(I) Flower chart

……
……

(II) Pseudocode

……
……

(III) Problem solving

……
……

(IV) Computer troubleshooting

……
……

(V) Computer Maintenance

……
……

SECTION C (15 Marks)

10. Howa can E-Mail communication be used effectively to enhance professional relationships and work place productivity in today's digital environment (5pints)
