Candidate's examination number ……

PRESIDENT'S OFFICE

REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT

ARUSHA REGION

FORM TWO REGIONAL MOCK ASSESSMENT

036 INFORMATION AND COMPUTER STUDIES

TIME 2:30 Hours **MAY 2024**

Instructions

1. This paper consists of sections A, B and C with a total of 10 questions.
2. Answer all questions.
3. Write your answer in a spaces provided.
4. All answers must be written in black or blue ink.
5. Cellular phones, calculators and any unauthorized materials are not allowed in the examination room.
6. Write your examination number on the top right corner of every page.

Candidate's examination number ……

SECTION A (20 Marks)

Answer **all** questions in this section.

1. For each of the following items (i-x), choose the correct answer and write its letter in the box provided.

i. Which of the following application software can be used to write books, memos, essays and reports.

A. Adobe page maker
B. Microsoft word
C. Microsoft excel
D. Adobe acrobatic reader

B

ii. The collection of output devices which generates softcopy outputs are

A. Plotter, projector and light emitting diode (LED)
B. Printer, light emitting diode (LED) and speaker
C. Speaker plotters and monitors
D. light emitting diode (LED), monitors and speakers

D

iii. pressing together the keyboard keys CTRL and P enables a computer user to

A. paste text in a document
B. print a document
C. save a document
D. align text in a document

B

iv. Which of the following error in an Excel is displayed due to result being too long to fit in the cell?

A. #NULL
B. #REF
C. ######
D. #VALUE

C

v. The type of computer based on the operational principle of computer (technology) are named as…….

A. Minicomputer, supercomputer, digital computers
B. Analogy, hybrid microcomputer
C. Mainframe, supercomputer and microcomputer
D. Analogy, hybrid and digital computers

D

vi. Why a company may prefer to install star type of network topology for its employees to use.

A. Once one node fail others continue working
B. Difficult to install
C. Most expensive
D. Need each computer to interconnect to each other

A

vii. What represent protocol in the Uniform Resource Locator (URL) http://wwww.Itilima.go.tz/itlimadc/agriculture.html

A. wwww.Itilima.go.tz
B. http
C. itlimadc
D. agriculture.html

B

viii. The source of information based on personal interview, e-mail contact, event and discussion to extract information is?

A. Traditional source
B. Modern source
C. Secondary source
D. Primary source

D

ix. The strategy that can prevent a computer being infected by virus is

A. Restarting a computer
B. Use a virus scanning program
C. Downloading free programs
D. Visiting unsafe website

A

x. The function of keyboard in a computer is

A. To process data given to computer
B. To accept information and process them to output
C. To output data processed by CPU
D. To accept data from the user to the computer

D

2. Match the following functions used in calculation manipulation on excel file in **List A** with their description in **List B** by writing the letter of the correct description below the corresponding item item number in the table provided.

List A	List B
i. AND ( )	A. Returns true if its arguments is true
ii. IF ( )	B. Return the arithmetic mean of its arguments.
iii. COUNTIF ( )	C. Negates the unary operand
iv. MIN ( )	D. Returns the largest value in a set of value within a range.
v. NOT ( )	E. Conditionally counts the number of cells within a range that meets a given condition.
	F. Returns the smallest value in a set of values.
	G. Conditionally adds the specified cells according to set of criteria.
	H. Returns true if all its arguments are true or false and if any argument is false
	I. Returns a value or label if a condition you specify is evaluated to true and another is evaluated to false.
	J. Multiplies all the values in arguments.

List A	(i)	(ii)	(iii)	(iv)	(v)
List B	H	I	E	F	C

3. For each of the following statements write **TRUE** if the statement is correct or **FALSE** if the statement is not correct.

i. Upload means transfer a file from your computer to another computer through network **TRUE**

ii. RAM in computer store and control programs that are necessary the initial activation of hardware when power is switched on **FALSE**

iii. Dust can block flow of electricity to circuit system of a computer **TRUE**

iv. Landscape layout of a page in Microsoft word, text and graphics are placed with the longest side of a page placed vertically **FALSE**

v. Network protocol is a rule of exchanging data between computers in a network **TRUE**

SECTION B (60 Marks)

Answer **all** questions in this section.

4. (a) differentiate data from information

Data is unprocessed piece of fact, can be used in reasoning, calculating and planning While;

Information is an organized data which provide meaning of full sentence or statement.

(b) Describe four (4) qualities of information

- **Information should have a range of time**
- **Information should be relavant**
- **Information should be reliable**
- **Information should be**

(c) Outline four (4) importance of information to the Tanzanian society.

- **It alerts people when there is danger.**
- **Information gives instructions.**
- **Information helps in decision making.**
- **Information can be used in advertising goods.**

5. (a) outline the procedures/step to italicise the text on Microsoft word processor

- **Highlight/select the required text**
- **Click italicise(*I*) from formatting bar(press CTRL + I) on the keyboard**

(b) Outline three (3) factors to consider when choosing a word processor

- **The type of operating system**
- **Its user-friendliness, ease fo use**
- **Its formatting and editing features. They should be good and varied**.

(c) Differentiate the following terms as used in Microsoft word processors.

i. Save and save As
Save stores the changes made to the document. While;
Save AS allows user to save new document, give it name and specify new location.

ii. Superscript and subscript
Superscript is the text(s) which appear just above the rest of characters for example cm^2, ^{2} is a superscript. While;
Subscript is the text(s) which appear just below other characters for example $O_{2,2}$ is a subscript.

(d) What is print preview?
Is an option on printing which help a user to confirm if no details are outside the printable area

6. (a) Give four (4) differences between Random Access Memory (RAM) and Read Only Memory (ROM).

Random Access Memory (RAM)		Read Only Memory (ROM)
(i)	**It is volatile, means its content is lost when a power is cut off**	**It is not volatile, means its content cannot be lost once a power is cut off**
(ii)	**Enables user to read and write its content**	**Its content is read only**
(iii)	**The conte in RAM is developed by computer user in oder to solve particular proble**	**The content of ROM are built-in at the factory by the manufacturer**
(iv)	**It is temporary**	**It is permanent**

(b) With three examples briefly describe secondary storage memory
Secondary storage- Is a storage or memory which is found inside and outside computer system. Examples of secondary storage are Hard disk, flash ,CD-R,DVD-R, and memory card

7. (a) Define the term computer networks
…are connection of two or more computers for the purpose of sharing resources.……

(b) For data to be entered into a computer there must be an input device specifically for entering data to the computer also there must be an output device specifically for particularly output information .Enumerate any five input devices and any five output devices you know

Input devices	Output devices
ikeyboard	**printer**
ii.bar code reader	**speaker**
iii.joystick	**screen**
iv.scanner	**headphones**
Voptical pen	**plotter**

(c) Physical network topology refers to the physical layout or arrangement of components of the networks. Mention four types of physical network topology

i……**Bus topology……**
ii……Star topology……
iii……Ring topology……...
iv……Hybrid topology……..

8. (a) mention two examples of application software

- **Word processor**
- **Database program**
- **Adobe Photoshop**
- **Web browser**

(b) Mention two (2) examples of system software

- **Operating system such as windows xp, windows 10**
- **Utility software such as Ant-virus, driver disk and translators**

(c) Briefly describe four (4) functions of operating system

i. **Processor management, operating system arrange the order of executing task in a computer**
ii. **Memory management, controls file a user save on a computer.**
iii. **Provides protection and security. For example Microsoft security essentials**
iv. **Device management, operating system have drivers which help in detecting the computer devices such as modem memory and flash**

9. Here is a part of worksheet containing some numerical data:

	A	B	C	D
1				
2	1		12	
3	6	4		
4				
5				
6	20			

(a) Write the cell address containing

i. 4……B6……
ii. 12……C2…….

iii. 20……A6……..

(b) Write the formula that will give:

i. The product of cell A3 and C2…=A3*C2……

ii. The difference between cell A6 and B3…=A6-B3…….

iii. Total of all numbers in the sheet=SUM(A2:C2)……..

(c) Write the procedure used for shading cell in a worksheet

……Double click the cell with the right click then cell shaded

The active cell

SECTION C (20 Marks)

10. Explain three advantages and two disadvantages of computer networks to an organization which decides to employ computer network to run the organization.

Computer network Refers to collections of computing devices that are connected in various ways in order to communicate and share resources like hard disk and printer.

The following are advantages of computer networks

Reduced cost: Net workable versions of many popular software programs are available at considerable savings when compared to buying individual licensed copies. Bodies monetary saving, sharing a program on a network allows for easier upgrading of the program.

Sending messages such electronic mail (E- mail): The presence of a network provides the hardware necessary to install an E- mail system. E- Mail aids in personal and professional communication for all school personnel, and it facilitates the dissemination of general information to the entire school staff. Electronic mail on a LAN can enable students to communicate with teachers and peers at their own school. If the LAN is connected to the internet, students can communicate with others throughout the world.

Flexible access: School network for example: allows students to access their files from computer throughout the school. Students can begin an assignment in their classroom, save part of it on a public access area of the network, and then go to the media center after school to

the following are the disadvantages of computer network

Expensive to install: **Although a network will generally save money, our time, the initial cost of installation can be prohibitive; cable, network cards and software are expensive and the installation may require the services of a technician.**

Requires administrative time**. Proper maintained of a network requires considerable time and expertise. Many schools have installed a network, only to find that they did not budget for the necessary administrative support.**
