THE PRESIDENT'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT
FORM TWO JOINT EXAMINATION FOR GOVERNMENT SCHOOLS –JEGOS

PRE-MOCK EXAMINATION
036 INFORMATION AND COMPUTER STUDIES (ICS)
MARKING SCHEME 2024

SECTION A (15 MARKS)

1.

(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)	(viii)	(ix)	(x)
B	A	C	A	B	A	D	D	C	A

2.

(i)	(ii)	(iii)	(iv)	(v)
H	A	E	I	D

SECTION B (70 MARKS)

3. (a)
   (i) RAM - ***Random Access Memory***
   (ii) HDD **–** ***Hard Disk Drive***
   (iii) GIGO – ***Garbage In Garbage Out***
   (iv) UPS – ***Uninterruptible Power Supply***

   (b)

Menu bar, tool bar, Ctrl+F4, Ctrl+S, Ctrl+X, status bar, Ctrl+V

   1. ***Menu bar***,act as communication link between the user and the program
   2. ***Ctrl+F4*** help a user to close the current document.
   3. ***Ctrl+S*** help a user to save changes made to document.
   4. ***Ctrl+V*** help a user to paste the document.

4.

(a) *Is an electronic device that accepts inputs (data, commands, programs and user response) process them and gives the outs. Or Is an electronic machine that collects data, process data, store them and then gives the output*
(b)

i. *Input devices- are equipments or devices that enable computer user to enter data and instructions into the computer. Example of input devices are:- The keyboard, the mouse, the light pen, the joystick, the bar codes, the scanner, the digital camera etc*

ii. *Output devices - are the equipment used to get information out of a computer. Example of output devices are Monitor (Screen) or Video Display Unit (VDU), speaker, printers, Projectors, plotter, tape recorder etc.*

(c)Give two examples of

i. input devices
   a. ***The keyboard*** ***b.the mouse***
ii. output devices.
   a. ***Monitor (Screen) or Video Display Unit (VDU)*** ***b.speaker***

(d) Give function of any two input or output devices **that you have not mentioned** in question 5c

i. Scanner – ***change the document from hardcopy to softcopy***
ii. Printer - ***change the document from softcopy to hardcopy***

5. To make a computer function, it must have an operating system installed.
   a. What is Operating System?
      Is a main program that controls other programs in the computer
   b. Give 4 types of single user and multi-tasking operating System
      i. Windows xp
      ii. Windows 7.
      iii. Windows 8
      iv. Windows 10
   c. Give four main functions of an operating system.
      i. Processor management.
      ii. Memory system management.
      iii. Hardware management.
      iv. Provide user interface. E.g. Command Line Interface (CLI), Graphic User Interface (GUI) and Menu Driven Interface (MDI).
      v. Manage files.
      vi. Control access to system resources.
      vii. Information management.
      viii. **Provide networking capability**

6. Word processing is done through computer in which an application program or software known as word processor has been installed.
   a. Differentiate between word processing and word processor

<u>Word processing</u> is an art of creating, editing, formatting, saving and printing of text-based documents .

<u>Word processor</u> is an application software for manipulating electronic text-based documents.

State two examples of word processing programs.

i. Microsoft word,
ii. Word perfect,
iii. Open Office writer,
iv. Google Docs,
v. Write pro,
vi. **Word star**

   b. List 3 uses of word processor

i. **Create document such as letter**
ii. **Save the document for future use**
iii. **Printing the document**

c. Show 2 main steps that are used when a computer user wants to underline a text

Procedures to underline:

i. **Highlight a desired word.**
ii. **Select underline icon (U) on the formatting tool bar.**

Or;

i. **Highlight a desired word.**
ii. **Simultaneously press <ctrl and U > keys on the key board**

7. In the past, information was shared amongst people through traditional means. Today, due to technology advancement, information is shared through a variety of ways, including the use of connected computer.

a. What is computer networking?

Refers to the connection of more than one computer in the network for data sharing.

b. List 3 main types of computer networking.

i. **Local Area Network (LAN).**
ii. **Metropolitan Area Network (MAN).**
iii. **Wide Area Network (WAN**

c. In brief, explain the meaning of any one type of computer networking that you have listed in (8.b) above.

i. **A local Area Network (LAN): Is a kind of network that covers small geographical area such as school, building etc.**
ii. **A Metropolitan Area Network (MAN): Is a type of network that covers a large geographical area than LAN such as town, city etc.**
iii. **A Wide Area Network (WAN): Is a kind of network that covers lager area than LAN and MAN *networks. Areas covered by this network are country and continent***

d. 3 network interface devices: **Hub, switch, Network Interface Card (NIC), Router, Modem, Bridge**

8. Computer can be classified according to physical size, purpose and functionality. Therefore, based on physical size computer can be classified into 4 main groups. List them and explain any of two groups.

A. Microcomputer.
B. Minicomputer.
C. Main Frame computer.
D. Super computer.

Microcomputer: Is a small, relatively inexpensive computer with a microprocessor as its central processing unit (CPU). It includes a microprocessor, memory, and minimal input/output (I/O) circuitry mounted on a single printed circuit board (Mother board). Microcomputer are can process less amount of data compared than minicomputer, mainframe and supercomputer.

The Micro-computers are specially designed for general usage like entertainment, education and work purposes. Example or categories of microcomputer are Desk top or personal computer (PC), Laptops, Handled computer Personal Digital Assistants (PDAs), Notebook, Tabulates, and Smartphone's.

Minicomputer: Is a kind of computer that contains more than one processors and support multiprocessing and fills the space between the mainframe and

microcomputer. Minicomputers are generally resilient to high workloads. Although they are smaller than mainframe or supercomputers, minicomputers are more powerful than personal computers and workstations in processing data. Minicomputers are used by small businesses and firms. Minicomputers are also called as "Midrange Computers". These computers are not designed for a single user. A large company or organizations use Mini-computers for specific purposes. For example, a production department can use Mini-computers for monitoring certain production process.

Mainframe computer: This is a kind of computer which is more powerful expensive than microcomputer and minicomputer and can be used primarily by large organizations for critical applications, bulk data processing, such as census, industry and consumer statistics, enterprise resource planning, and transaction processing.

Supercomputer: Is a kind of computer that is most powerful, highest speed in processing data and is the most expensive computer compared with microcomputer, minicomputer and mainframe computer. A super computer is used in large organization on scientific research, Space Exploration, earthquake studies, weather forecasting, and nuclear weapons testing

9. a.List steps to rename the Sheet2 and make it appear as RESULTS instead of Sheet2. 1 MARK

   b.List steps to save an Ms excel to the desktop 1 MARKS

   c.How did the value 207 in total marks have been obtained? 1 MARK

   d.Give two options in which the value 49 in average column can be obtained? 1 MARKS

   e.How did the value 5 in position have been obtained? 1 MARKS

   f.give 5 examples of error code in MS Excel and their meanings 5 MARKS

   answers

   a. right click the sheet2>click rename>type the text RESULTS>PRESS ENTER 1 MARKS
   b. click file menu>click save>select desktop>type a filename in the file name text box>click save. 1 MARKS
   c. the value 207 in total marks have been obtained by typing a formula =C6+D6+E6 1 MARK
   d. 1st option =(C7+D7 + E7)/3 2ND OPTION =AVERAGE(C7:E7) 3RD OPTION =F7/3 1 MARKS
   e. =RANK(G3,G$3:G$7) 1 MARKS
   f. 5 MARKS

SECTION C (15 MARKS)

10. Importance's of internet to the society

i. Efficient communication
ii. Electronic commerce
iii. Vast content
iv. Entertainment
v. Online teaching and learning
