SECTION A (15 MARKS) Answer all questions in this section

1. Select the correct answer from the given alternatives by writing the letter of the most correct answer in the table provided below.

i. Why is it important to study Computer Science?
   A. It allows us to understand how the internet works
   B. It helps us become proficient in social media
   C. It improves our ability to use smartphones
   D. It provides knowledge in solving complex problems using technology

ii. Why is the study of software development important?
   A. It allows you to play video games B. It focuses only on hardware
   C. It enables the creation of applications and systems that solve real-world problems
   D. It teaches only how to write code

iii. Why is studying algorithms important for improving efficiency in computing?
   A. Algorithms only focus on hardware B. They help solve problems in the most efficient way possible
   C. They focus on social media management D. They are not necessary in modern computing

iv. What is the primary function of the CPU in a computer system?
   A. To store data B. To process instructions C. To display output D. To provide power

v. What is an operating system's primary role in a computer system?
   A. To store data permanently B. To provide security for the system
   C. To manage hardware and software resources D. To process

vi. user inputs What is the purpose of a UPS (Uninterruptible Power Supply)?
A. To provide a stable power supply during blackouts and power surges
B. To increase the speed of the CPU C. To manage the data transfer rate between devices
D. To store data on a backup disk

vii. Laptops and desktops are examples of which classification of computers?
A. Supercomputers B. Microcomputers C. Minicomputers D. Mainframes

viii. The following are common examples of power fluctuation except
A. Brownouts B. Spikes C. Electrical surges D. Surge protectors

ix. The following are the collect cleaning materials from computer hardware except
A. Soft cloths B. An electric air blower C. Soft brush D. Liquid

x. Most of the teachers in a certain school that uses computers in performing their daily activities reported the problem of disappearing some files. Which is the best way of preventing data from loss and damage?
A. Backup the file B. Using password C. Updating anti-virus D. Using antiglare screen

2. Match the functions of different types of systems utilities in **List A** with their corresponding types of systems utilities in **List B** by writing the letter of the correct answer below the item number in the table provided.

LIST A	LIST B
i. Reduce the size of data to save storage and transportation space. ii. Protect programs and data against viruses and remove viruses from a computer. iii. Recover a file or information that has been deleted. iv. Create a copy of data to protect it from accidental loss. v. Clean or remove unnecessary files from a hard disk.	A. Disk cleaner B. Backup C. Data recovery D. Anti-viruses E. Data compression

SECTION B (70 MARKS) LUSAELIMU.COM

Answer all questions from this section

3. (a) Define the following fields related to computer science. **(06 marks)**
i. Information Technology
ii. Information and Communication Technology
iii. Information Systems
iv. iv. Computer Engineering
v. Artificial Intelligence
vi. Computer Networking

(b) Mr Kasebele wants to identify the fundamental components of computer systems. As a form one student who study a computer science helps Mr Kasebele how to list and explain the components of computer systems. **(04 marks)**

4. Your school wants to teach students about how computers evolved. Complete a brief comparison table below showing three differences between the first and fourth generation of computers. **(2 marks @)**

Feature	First Generation	Fourth Generation
Year developed		
Technology		
Size		
Power consumes		
Language used		

5. Most electronic devices such as computers and mobile phones contain the most important device which is regarded as a brain of computer.
   (a) Identify this device and give one reason for considering it as the brain of a computer. **(3 marks)**
   (b) In which part of the system unit is the device identified in part (a) allocated? **(1 marks)**
   (c) Explain three functional elements of the device identified in part (a) **(6 marks)**
6. A computer lab is supposed to have enough ventilation and it should be well protected from dust all the time.
   (a) Briefly explain three problems which may be caused by lack of ventilation in a computer laboratory. **(03 marks)**
   (b) Briefly explain four problems which may occur if a computer laboratory is not well protected from dust. **(04 marks)**
   c) What are the three measures that should be taken to ensure proper ventilation in the computer laboratory? **(03 marks)**
7. How can you differentiate the following terminologies as used in **computer systems and computer software.** (2 marks @ of total 10 marks)
   i. Minicomputers and Mainframe computers
   ii. Workstation computers and Supercomputers
   iii. Personal computers and Laptop computers
   iv. Single-user operating systems and Single-task operating systems
   v. Multi-user operating systems and multi-tasking operating systems
8. a) Why is it important to update computer/mobile phones several times within a month? Mention four (04) points. **(04 marks)**
   (b) Your best friend wants to solve problems in utility bills, as form one student who study CS helps him to show the six steps of problem solving **(06 marks)**
9. a) What are the common applications of internet? Mention three **(3 marks)**
   (b) What are the common web browsers? Mention three **(3 marks)**
   (c) What is E-learning? **(2 marks)**
   (d) Eplain what is an E-Mail adress? **(2 marks)**

SECTION C (15 MARKS)

10. The internet is very important in our daily life, explain four advantages and three disadvantages of internet
