THE PRIME MINISTER'S OFFICE

JEPGOS – TANZANIA

FORM FOUR MOCK EXAMINATION

GEOGRAPHY

(For Both School and Private Candidates)

TIME: 3 : 00 HOURS **AUGUST 2026**

Instructions

1. This paper consists of sections **A, B and C** with a total of eleven **(11)** questions.
2. Answer all questions in section **A** and **B** and **two (2)** questions in section **C**
3. All answers must be in black or blue pen.
4. Write your Examination Number on every page of your answer booklet(s).

wazaelimu.com

Jepgos Tanzania 2026

SECTION A: (16marks)
Answer all questions in this section.

1. For each of the items (i)-(x) choose the correct answer from among the given alternatives and write its letter beside the item number.

i. The pattern which looks like a trunk of a tree with it's branches or like a leaf with it's veins
   (a) Trellis
   (b) Rectangular
   (c) volcanic mountains
   (d) Fold mountains
   (e) Dendritic drainage

ii. Practical geography can base on several aspects except one
   (a) map work
   (b) research technique
   (c) Formation of land form
   (d) surveying
   (e) quantitative methods

iii. A coral reef is a limestone rock mainly of calcium carbonate and calcareous algae. Its formation occurs in several stages which are
   (a) coral polyps, planktons and calcareous algae
   (b) coral polyps, fringing reefs and barrier reef
   (c) fringing reef, barrier reef and A tool
   (d) barrier reef, A toll and polyps

(e) Atoll, polyps and fringing reefs

iv. Identify the set of features categorized into extrusive volcanoes in the Earth's crust
(a) solfatara, fumarole, Mofette and lopolith
(b) Geysers, fumarole lacolith and composite cone
(c) Hot springs, geysers, phacolith and lopolith
(d) solfatara, fumarole, Mofette and geysers
(e) Fumarole, Mofette, solfatara and phacolith

v. Heavy rainfall on Mt. Hanang triggered strong flow of heavy fine-grained semiliquid, mixture of fine sand and soil which knocked down houses and killed people in Katesh on December 2023, this can be summarized as
(a) Slow movement called soil creep.
(b) slow movement referred to as rock fall
(c) Rapid movement called rock fall
(d) Rapid movement referred to as soli fluction
(e) Rapid movement known as mudflow

vi. Why are Japanese ship building industries located along the coast?
(a) Government policy
(b) presence of skilled labor
(c) availability of capital
(d) good supply of power
(e) presence of natural harbor

vii. What could be the appropriate method of extracting gold deposits which are near to the surface?
(a) shaft mining
(b) underground mining
(c) opencast mining
(d) alluvial mining
(e) placer mining

viii. The season of the year are caused by
(a) Rotation of the earth
(b) Revolution of the earth
(c) Lunar eclipse
(d) solar eclipse
(e) movement of the earth

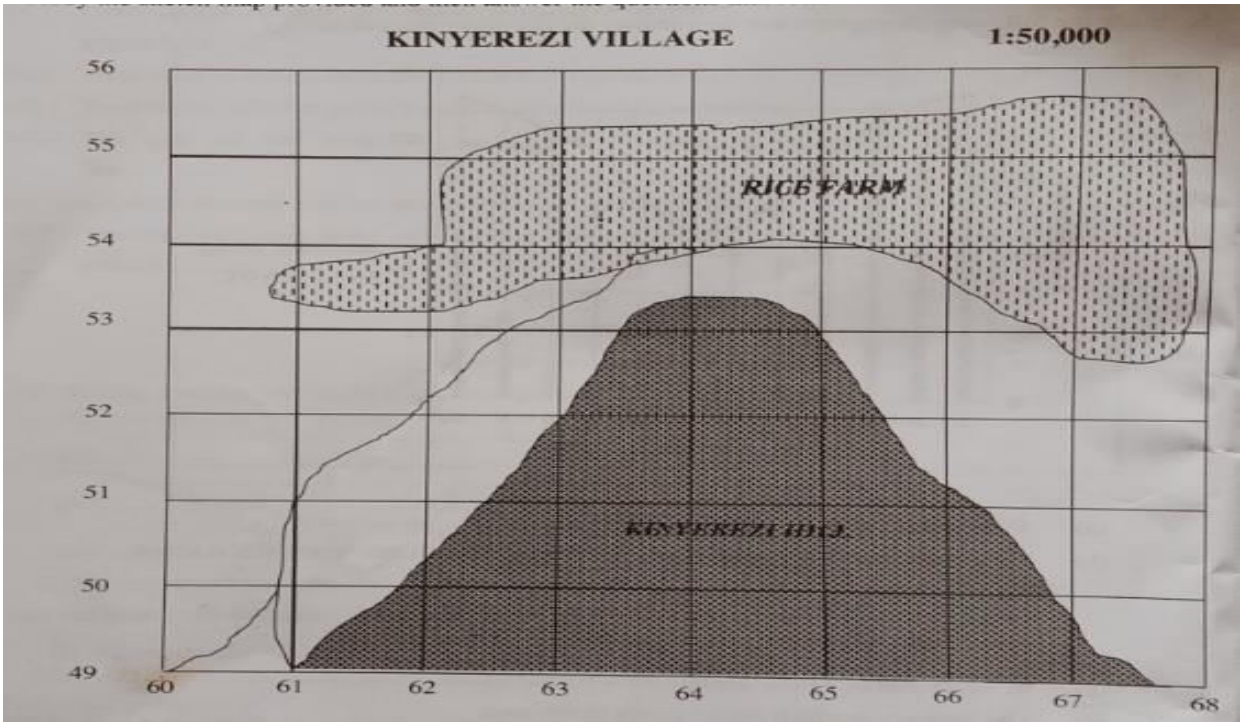

ix. A feature formed as a result of a long and Fairly narrow stretch of land that extend through hills or mountains is called
(a) basin
(b) plateau
(c) depression
(d) valley
(e) peak

x. Which one is not affected by the earth rotation?
   (a) movement of ocean currents
   (b) direction of prevailing winds
   (c) aphelion and perihelion
   (d) changes in seasons
   (e) changes of day and night

2. Match the description of the landform of a hot desert landscape in the list A with their geographical terms in the list B by writing a letter of their correct response beside the item number in the answer booklet provided.

LIST A	**LIST B**
i. Delta which is triangular in shape composed mainly of coarse sediments such as gravels and sand.	A. Desertification
ii. The actual piece of land upon which a settlement is built.	B. linear settlement
iii. Overcrowding in the cities because of great availability of employment and good health services.	C. Drought
iv. The depression formed as a result of wind deflation in flat areas in the desert.	D. Rural settlement.
v. A state in which an area experiences prolonged dry period.	E. Nuclear settlement.
vi. Addition of unwanted substances into the environment	F. Settlement site.
	G. Urbanization
	H. Zeugens.
	I. Loess.
	J. Ripples.
	K. Pollution

3. Study the sketch map provided and then answer the question that follow.
   (a) calculate the area covered by RICE FARM in km
   (b) mention any two essentials of map which have not been applied to draw the sketched map
   (c) Calculate the length of the river from grid reference **600490** to **640540** in km.

4. carefully study the table below showing sisal production ("000" tones) of Kange sisal estates from 2016 to 2020 and then answer the questions that follows

Years	2016	2017	2018	2019	2020
Production ("000") Tones	70	160	120	210	185

(a) Briefly explain what do you understand by the term profit and loss bar graph
(b) Explain the six procedures to be followed when constructing profit and loss bar graph
(c) Construct profit and loss bar graph to depict the above information. In your construction use vertical,1cm to 10,000tonnes and horizontal scale 3cm to 1year

5. Hamisi who is an employee of the women affair's institution in Kigoma, he decided to conduct research on the effects of early pregnancy on academic achievements for girls in Kigoma region. He selected three districts to represent the remaining and six (6) village secretaries were chosen from each district to make a sample for his study
   (a) Suggest the best research approach for his study
   (b) Explain five uses of his research outcome
   (c) State the type of sampling and technique used
   (d) Explain three importance of using a sample

6. The form four students have been assigned to measure a linear distance between lines of traverse in measuring new area for a school playing ground
   (a) Suggest a suitable survey method for the activity
   (b) Mention the steps that form four will use to accomplish the activity

(c) Briefly explain the four equipment's that form four will use in the field

7. Study the photograph below carefully and answer the questions that follows;

(a) With vivid examples from the photography identify (2) economic activities that conducted in this area
(b) suggest the type of the photograph
(c) what are the two importance of the nature of environment seen on the photograph to individual level and national level
(d) suggest the possible climactic condition of area on this photograph
(e) Explain what you observed in the photograph

8. Imagine you are an environmentalist who has visited mining center which is near to residential areas. You noted that the mining activities emits some harmful substances which directly pollute the environment and finally cause the effects to the people
(a) Briefly and explain five (5) effects of such situation to the people who are living in that area
(b) Suggest suitable (4) ways that government would use to control these effects to people and the environment

SECTION C (MARKS 30)

Answer **two** questions only

9. Despite of agriculture being a backbone of Tanzania economy most of Tanzanian still face serious challenges in practicing agriculture. With vivid examples justify this statement by using six points.

10. Environmental degradation is a serious problem caused by human activities, as environmentalist provides six measures that can be employed to overcome the situation.

11. Regardless of being important to the environment by maintaining the balance of ecosystem, supporting agriculture, medicine and climate stability. However it is disappearing at an alarming rate. Discuss six reasons leading to the loss of biodiversity.

GEOGRAPHY MOCK MARKING SCHEME

SECTION A (16 MARKS)

1. *@ 1 mark Total 10 marks*

NUMBER	i	ii	iii	iv	v	vi	vii	viii	ix	x
ANSWERS	E	C	C	D	E	B	C	B	D	D

2. *@1 Mark Total 6 marks*

SECTION A	i	ii	iii	Iv	V	vi
SECTION B	B	F	G	H	C	K

SECTION B (54 MARKS)

3. (a) Area covered

Soln
Full squares = 2 Squares
Half squares = 19 squares
= 2 + 19/2
= 2 + 9.5
= 11.5 squares

From the scale
1: 50, 000
1: ½ km
2:?
1 square = 1 km
Area for 1 square = 1 km square
11. 5 =?
11.5km squares
AREA COVERED BY RICE FARM IS 11.5 KM SQUARES (3 marks)

(b) Two essentials (3 marks)

(i) Key (ii) North direction

wazaelimu.com

(c) Soln

Length of the river from grid 600490 to 640540

14 cm

From scale

1: ½ km

14 cm :?

14 × ½ km = 7km

The length of the river is 7km (3 marks)

4. (a) A profit and loss Bar graph is a type of graph used to show data given in terms of profit and loss. It also known as a divergent bar graph. (1 mark)

(b) Six procedures (3 marks)

(i) Collect data or gather data for each time period.

(ii) Find the mean of the data given by using the formular $\sum F/N$ where F is the frequence or number of appearance and N is the amount of given data.

(iii) Subtract the mean from the frequence you got for each data to get the profit and loss.

(iv) Title the graph

(v) Draw the axes and mark the scale - horizontal axis is for time given (year or month) and vertical axis is for amount of profit and loss

(vi) Draw the bars where there will be negative (below zero) and positive (above zero) parts

(c) Soln (2 Marks)

YEARS	PRODUCTION ('1000 TONNES)	MEAN	X - MEAN
2016	70	149	-70
2017	160	149	11
2018	120	149	-29
2019	210	149	61
2020	185	149	36

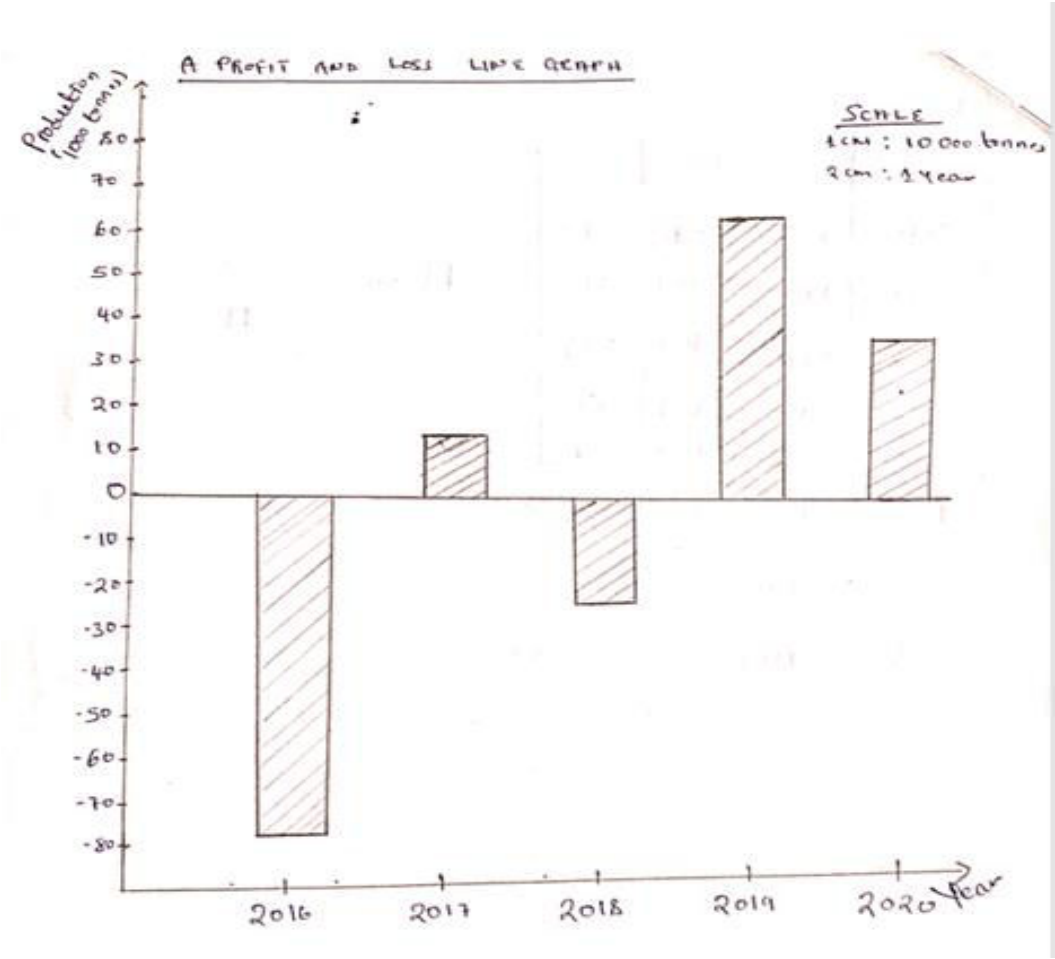

MEAN = $\sum F/N$

= 70 + 160 + 120 + 210 +185 /5

= 745/5

=149

(d) A GRAPH (2 Marks)

5. (a) Quantitave Research Approach (1 mark)

(b) 3 Marks

i. Policy formulation and improvement

ii. Educational planning example strategies to retain pregnant girls to schools.

iii. Community awareness

iv. Support for affected girls

v. Future research and Academic use.

vi. Advocacy.

(c) Probability Sampling is the multistage technique sampling (cluster sampling technique) 1 mark

(d) 4 marks

i. It saves times

ii. Reduces cost

iii. Improves manageability

iv. Enables in depth study

v. Allows for generalization.

vi. Ethical consideration.

6. a) CHAIN SURVEY (2marks)

b) 4 marks

i. Reconnaissance (Pre liminary survey)
ii. Marking survey station
iii. Ranging the line
iv. Measuring the distance
v. Recording the data

c) 3 marks

i. Measuring the chain or tape
ii. Ranging rods
iii. Arrows (or pin)
iv. Pegs

7. a) 3 marks

i. Tourism activities
ii. Lumbering activities
iii. Agriculture activities

b) Ground photography (1marks)

Reasons

i. It shows only front view
ii. It has three major parts; front view, middle view, and background

c) 4 marks

i. National Level
   — Source of government revenue through tourist attractions. Mt. Kilimanjaro National parks
   — I t create the international relationship
ii. Individual level
— Create life standard of the people. Example Tour guider

d) Tropical climate (1 marks)

e) The photograph shows the Mount Kilimanjaro and Elephants in National Park. (1 marks)

8. a) 4 marks

i. Health problems example skin infections cancer birth defects
ii. Unsafe drinking water

iii. Loss of livelihoods examples kill fish land reduce crop production.
iv. Forced migration
v. Environmental degradation

b) 5 marks

i. Strict environmental regulations
ii. Regular monitoring and inspection
iii. Safe mining practices
iv. Rehabilitation and reforestation
v. Public awareness and health supports

SECTION C (30 MARKS) Two questions (15 marks for each)

Introduction: 1.5 marks
Mainbody 6 points x 2 marks=12
Conclusion: 1.5 marks

9.

i. Unreliable rainfall and climate changes. Example Dodoma and Singida
ii. Lack of modern farming tools and technology. Example hand hoes and traditional methods are used.
iii. Poor storage facilities. Example in Mbeya, large quantities of maize rate due to lack of silos or proper drying system.
iv. Limited access to capital and credit. Example loans or financial support
v. Poor infrastructure. Example Rural Road

10.

i. Afforestation and reforestation
ii. Proper waste management
iii. Enforcing environment laws
iv. Promoting sustainable agriculture
v. Environmental education and awareness
vi. Control of industrial pollution

11.

i. Deforestation
ii. Pollution. Example industrial waste Chemical and plastics poison.
iii. Climate changes. Example amphibians and coral reefs are very sensitive to temperature changes
iv. Overexploitation of natural resources. Example overfishing overhunting and overharvesting of plants and animals
v. Introduction of invasive species. Example the invasive plants water hyacinth in Lake Victoria blocks sunlight and oxygen.

vi. Habitat fragmentation. Example wildlife corridors in Serengeti.
