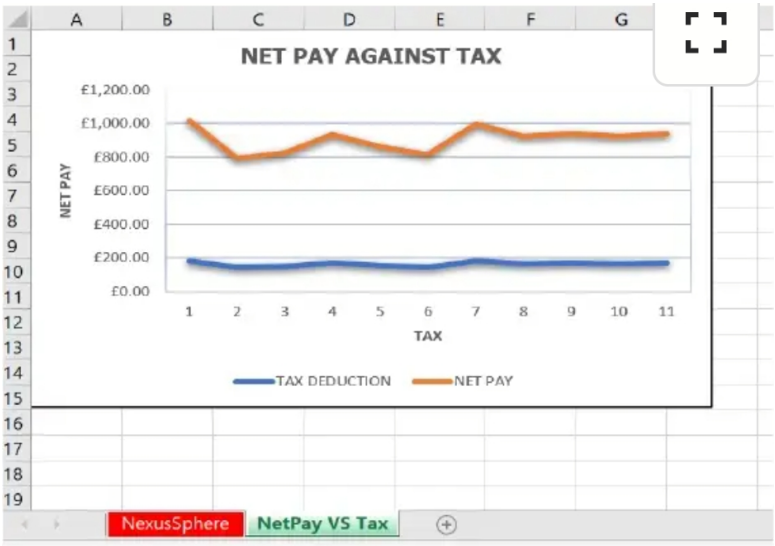

Figure 4

i. Format row A1 so as it appears as shown in the figure 3 above.

ii. Format row A2 so that the exceeding words can be shifted to the next line in the same cell.

iii. Change the worksheet from Sheet1 to **NexusSphere** as shown in the figure 3 above and the tab color to red.

iv. Format the data on cell D3:J13 so that the pound symbol can appear automatically.

v. Add borders as shown in the figure 3 above.

vi. Use the Absolute cell referencing and fill the allowance column if the allowance is 10% of the basic pay.

vii. Fill the Overtime column if the overtime is 3% of the basic pay. Use the concept of absolute cell referencing.

viii. Fill the gross pay column if the gross pay is calculated by totalizing the basic pay, allowances and overtime.

ix. Fill the tax deduction column if tax is calculated by the 18% of the gross pay.

x. If the NSSF deductions can be calculated by the 10% of the gross pay before tax, fill its column in the figure 3 above. Use absolute cell referencing concept.

xi. If the Net pay is calculated by deducting the tax and NSSF contributions from the gross pay, fill the Net pay column.

xii. Draw a Stacked line with marker chart of Net pay against tax deductions on a new worksheet, use NET PAY AGAINST TAX as the title. (Use Tahoma as a font style and 12 as its size)

xiii. Format your chart and add style 13 to it, change the worksheet to the name shown, change the tab color to green and add all the elements visible on the chart figure 4 above.

xiv. Format the borders on your chart to solid with black color.

xv. Print the NexusSphere worksheet in a landscape orientation and your chart in a portrait orientation.

NOTE: You can use either PRODUCT function or multiplication formula where needed.
