NAMANGA SECONDARY SCHOOL
FORM FOUR – TEST 2
INFORMATION AND COMPUTER STUDIES (ICS) EXAM

Time: 2 Hours

SPREADSHEET (MS EXCEL) PRACTICAL TEST

Name: _____ Stream: _____ Marks: _____ / 30

Instructions

1. This paper consists of one (1) question.
2. Answer all parts of the question.
3. This paper contributes to your Continuous Assessment (CA) for ICS. Your performance will be used, among other tests, to determine the best student in ICS in Form Four this year.
4. Show all the steps you use to arrive at your answer.
5. Cellular phones and any unauthorised materials are not allowed in the examination room.
6. Write your name and stream on every page of your answer booklet(s).

---

1. NAMANGA ELECTRONICS LTD is a company that sells electronic goods through its sales staff. Each month, every salesperson is paid a Basic Salary, a Commission based on the number of units sold, and a Bonus based on performance. The table below shows the sales record for the month of August 2026, together with the commission rate paid per unit for each department and the tax bands used to calculate tax. Study the table carefully, then answer the questions that follow:

NAMANGA ELECTRONICS LTD

Sales Record as per 31st August 2026

EmpID	EmployeeName	Department	BasicSalary (Tsh)	UnitsSold	SalesTarget
E001	John Mwakalinga	Electronics	450000	45	40
E002	Grace Kileo	Household	380000	28	30
E003	Peter Massawe	Mobile Phones	500000	62	50
E004	Amina Rashidi	Furniture	420000	22	25
E006	Neema Mollel	Household	400000	35	30
E008	Fatuma Juma	Furniture	410000	30	25

Commission Rate	Electronics	5,000		
	Household	3,000		
	Mobile Phones	8,000		
	Furniture	4,000		
Tax Rates	Up to 300,000	0%		
	300,001 – 500,000	10%		
	500,001 – 700,000	20%		
	Above 700,000	30%		

(a) Create the worksheet shown above in a landscape format using the information given. Bold, wrap and centre-align all column headings. Save your work as **"NAMANGA ELECTRONICS SALES"**.

(b) Insert the following six new columns to the right of SalesTarget, in this order: **Performance**, **CommissionRate**, **Commission**, **Bonus**, **GrossPay**, **Tax** and **NetPay**.

(c) Use appropriate cell reference and a nested IF function to calculate the following for every employee:

(i) **CommissionRate**, based on the Department, using the rates given in the table above.

(ii) **Performance**, which should read "Excellent" if UnitsSold is greater than or equal to SalesTarget × 1.2, "Good" if UnitsSold is greater than or equal to SalesTarget, and "Poor" otherwise.

(iii) **Bonus**, which is 10% of BasicSalary if Performance is "Excellent", 5% of BasicSalary if Performance is "Good", and 0 if Performance is "Poor".

(iv) **Tax**, based on GrossPay, using the tax bands given in the table above.

(HINT: Commission = UnitsSold × CommissionRate; GrossPay = BasicSalary + Commission + Bonus; NetPay = GrossPay − Tax.)

(d) Use a function to calculate **Commission**, **GrossPay** and **NetPay** for every employee, using the formulas given in the hint above.

(e) In three empty cells below the table, use the **COUNTIF** function to count how many employees scored "Excellent", how many scored "Good", and how many scored "Poor".

(f) Create a small summary table with the four department names. Next to each department name, use the **SUMIF** function to calculate the total NetPay paid to employees in that department.

(g) Apply **Conditional Formatting** to the NetPay column so that any cell with a value greater than Tsh 600,000 is automatically filled with a green background.

(h) Apply **Data Validation** to the Department column so that only the values "Electronics", "Household", "Mobile Phones" or "Furniture" can be selected from a drop-down list. Show an appropriate error alert message for any other entry.

(i) Sort the whole table in **descending order** of NetPay, then freeze the top header row so that it remains visible while scrolling.

(j) Using your SUMIF summary table from part (f), create a **three-dimensional (3-D) Pie Chart** with labelled data showing NetPay by department. Save the chart as **"Net Pay by Department"**.

(k) Using the EmployeeName, UnitsSold and SalesTarget columns, create a **Column Chart** comparing UnitsSold against SalesTarget for every employee. Save the chart as **"Sales Performance"**.

(l) Set the page orientation to Landscape, insert your Examination Number in the centre section of the page footer, then print your work.

(30 marks)
