TUNDUMA TOWN COUNCIL

SUMAGHA SECONDARY SCHOOL

FORM TWO ASSESSMENT SERIES II

037 COMPUTER SCIENCE -- MARKING SCHEME

Year: 2026

SECTION A (15 Marks)

1. Multiple Choice (10 Marks, 1 mark each)

Q	Answer
(i)	C - Cybersecurity
(ii)	A - Instructions
(iii)	D - Registers
(iv)	B - Spills can damage computer parts
(v)	D - Staying on topic in a forum
(vi)	D - 15 (x + 5 = 10 + 5 = 15)
(vii)	C - Google search
(viii)	B - Bank - mainframe, student - microcomputer
(ix)	D - Natural language
(x)	A - Oval

2. Matching (05 Marks)

Item	Answer
(i)	B - Operating system software
(ii)	A - Application software
(iii)	C - Utility software
(iv)	F - Drivers software
(v)	E - Network software

SECTION B (70 Marks)

3(a) Three types of system documentation (03 Marks)

- User documentation - guides end users on how to use the system
- Technical documentation - describes system design/code for developers
- Operational documentation - describes procedures for operating and maintaining the system

Marking guide: They differ mainly in their intended audience and purpose: user docs serve end users, technical docs serve developers, operational docs serve administrators/operators.

3(b) C program - write to info.txt (03 Marks)

```
#include <stdio.h>
int main() {
FILE *fp;
fp = fopen("info.txt", "w");
fprintf(fp, "Learning C is fun!\n");
fprintf(fp, "File handling makes programming easier.\n");
fclose(fp);
return 0;
}
```

3(c)(i) Importance of comments in Python (01 Mark)

Marking guide: Comments explain what the code does, making it easier to read, understand and maintain, without affecting how the program runs.

3(c)(ii) Python - name, age, height (03 Marks)

```
name = "Vincent"
age = 20
height = 1.75
print("Name:", name, "- this is my name")
print("Age:", age, "- this is my age")
print("Height:", height, "- this is my height in meters")
```

4(a) Cybercrime vs Cybercriminal (02 Marks)

Marking guide: Cybercrime is an illegal act committed using a computer or network, while a cybercriminal is the person who commits that illegal act.

4(b) Two categories of cybercrime (02 Marks)

- Crimes against individuals - e.g. identity theft, cyberstalking, harassment
- Crimes against property/organisations - e.g. hacking, data theft, financial fraud

4(c) Three forms of cybercrime (03 Marks)

- Hacking
- Phishing
- Identity theft (accept malware distribution, cyberbullying, etc.)

4(d) Three causes of cybercrime (03 Marks)

- Weak security systems/passwords
- Financial gain motivation
- Lack of cyber laws and public awareness

5(a) Definitions (03 Marks)

- System unit - the main case/box of the computer that houses the CPU, motherboard and other core components
- Computer generation - a stage in the development of computer technology marked by major technological change
- Hardware - the physical, tangible components of a computer system

5(b) Periods of computer generations (03 Marks)

- Second generation - 1950s to 1960s
- Third generation - 1960s to 1970s
- Fourth generation - 1970s to present

5(c) Four characteristics of a computer (04 Marks)

- Speed - performs tasks very fast
- Accuracy - produces precise, error-free results
- Storage capacity - can store large amounts of data
- Automation/diligence - performs repetitive tasks with minimal human intervention and without tiring

6(a) Effects on computer (04 Marks)

- Dust - causes overheating and can clog fans/vents, leading to hardware damage over time
- Liquid - can cause short circuits and permanently damage electronic components

6(b) Three guidelines for handling a mouse (03 Marks)

- Keep it away from dust and liquids
- Use it on a clean, flat surface
- Avoid dropping it or handling it roughly

6(c) Three maintenance tools (03 Marks)

- Screwdriver set
- Compressed air/blower brush
- Antivirus/utility software

7(a) Hardware troubleshooting (01 Mark)

Marking guide: The process of identifying, diagnosing and resolving physical/hardware problems in a computer system.

7(b) Two common hardware issues (02 Marks)

- Overheating - causes the system to slow down or shut down unexpectedly
- Faulty RAM - causes system crashes or failure to boot

7(c)(i) Three causes printer not responding (03 Marks)

- Printer not connected/powered on
- Outdated or faulty printer driver
- Paper jam or printer out of paper/ink

7(c)(ii) Three solutions (03 Marks)

- Check and secure cable/power connections
- Reinstall or update the printer driver
- Clear the paper jam or refill paper/ink

8(a) Flowchart symbols (04 Marks)

Marking guide: Based on the standard flowchart symbols used in this syllabus: (i) Rectangle - Process symbol, used to represent a processing step/action. (ii) Diamond/Rhombus - Decision symbol, used to represent a decision point with a yes/no or true/false outcome. (Match to the actual symbols shown on the student's paper.)

8(b)(i) Flowchart - average of Amina's marks (03 Marks)

Marking guide: Start -> Input the three marks (52, 75, 91) -> Sum = 52+75+91 -> Average = Sum/3 -> Display Average -> End.

8(b)(ii) Flowchart - decision to proceed to Form Six (03 Marks)

Marking guide: Start -> Input Average -> Decision: Is Average >= 60? -> If Yes: Print 'Proceed to Form Six' -> If No: Print 'Not eligible to proceed' -> End.

9(a) Main components of the CPU (02 Marks)

- Control Unit (CU) - directs and coordinates the operations of the computer
- Arithmetic Logic Unit (ALU) - performs arithmetic and logical operations
- Registers - small, high-speed storage locations that hold data being processed

9(b) Four differences: primary vs secondary memory (04 Marks)

- Primary memory is volatile (loses data when power is off); secondary memory is non-volatile
- Primary memory is faster; secondary memory is slower
- Primary memory has smaller storage capacity; secondary memory has larger capacity
- Primary memory is directly accessed by the CPU; secondary memory is accessed indirectly

9(c) Plotters - advantages and disadvantages (04 Marks)

- Advantages: produce high-quality, large-scale drawings/prints; can print on large paper sizes (e.g. architectural or engineering drawings)
- Disadvantages: slow printing speed; expensive to purchase and maintain

SECTION C (15 Marks)

10. Internet information: advantages and disadvantages (15 Marks)

- Advantages: information is up to date; wide range of sources and topics available; easily accessible and convenient
- Disadvantages: information may be inaccurate or unreliable; risk of plagiarism/copyright issues; overwhelming amount of information that can be hard to filter
