*Student's Assessment Number*_____

TUNDUMA TOWN COUNCIL
SUMAGHA SECONDARY SCHOOL
FORM TWO ASSESSMENT SERIES III
037 COMPUTER SCIENCE

Duration: 2:30 Hours **Year: 2026**

Instructions

1. This paper consists of sections A, B and C with a total of **ten (10)** questions.
2. Answer all questions in the spaces provided.
3. Section A and C carry **fifteen (15)** marks each and section B carries **seventy (70)** marks.
4. All answers must be written in **blue** or **black** ink.
5. Communication devices and any other unauthorized materials are **not** allowed in the assessment room.
6. Write your **assessment number** at the top right corner of every page.

*Student's Assessment Number*_____

SECTION A (15 Marks)

Answer **all** questions in this section

1. For each of the items (i) - (x), choose the correct answer from the given alternatives and write its letter in the box provided. **(10 Marks)**

(i) How can strong passwords improve security?

A. By making hacking easier in accounts
B. By deleting hacker accounts and virus
C. By slowing systems to avoid hackers
D. By preventing unauthorized access

(ii) Why do photographers prefer to use digital camera nowadays?

A. They instantly produce images
B. They are cheap to purchase
C. They produce low quality image
D. They are not limited by poor light

(iii) Which key is used to delete the character to the left of the cursor?

A. Delete
B. Backspace
C. Enter
D. Spacebar

(iv) What does CPU stand for?

A. Central Process Unit
B. Computer Personal Unit
C. Central Processing Unit
D. Control Program Unit

(v) Early computers used vacuum tubes while modern computers use microprocessors. This difference shows?

A. Types of operating systems
B. Brands of computers
C. Uses of computers
D. Generations of computers

(vi) In a school, students were advised to purchase laptop computers instead of desktop computers for their academic uses. Why was it advised to buy laptop computers?

A. They are very cheap to purchase
B. It is easier to use laptop keyboard
C. They can be used everywhere
D. They cannot be easily damaged

(vii) Why is Computer Science important in modern society?

A. It helps in solving complex problems efficiently

B. It reduces human interaction

C. It makes people lazy

D. It increases paper usage

(viii) What is a variable most similar to in real life?

A. A dictionary

B. A cup that can hold different liquids

C. A calculator

D. A window

(ix) The part of a C program that contains the main logic of the program and where program execution starts is called:

A. Include function

B. Printf function

C. Main function

D. Return function

(x) Which of these will pause the program for 3 seconds?

A. pause(3)

B. sleep.time(3)

C. time.sleep(3)

D. delay(3)

(i)	(ii)	(iii)	(iv)	(v)	(vi)	(vii)	(viii)	(ix)	(x)

2. Match the **List A** with their corresponding **List B** by writing the letter of the correct response below the item number in the table provided. **(05 Marks)**

List A	List B
(i) System of interlinked hypertext documents accessed via the internet. (ii) Hypertext document that accessed over WWW through web browsers. (iii) Collection of related web pages with the same themes connected using hyperlinks. (iv) Software used for search information on the WWW. (v) Software application used to access, retrieve, and view information on the WWW.	A. Search engine B. Hypertext C. Web server D. World wide web E. Web page F. Web browser G. Website

Answers

List A	(i)	(ii)	(iii)	(iv)	(v)
List B					

SECTION A (70 Marks)

Answer **all** questions in this section

3. A company in Tanga has acquired new computers installed with Linux Operating System and various open source application software. The IT manager insists that understanding Operating System functions is essential for all staff.

   (a) Provide three reasons why an operating system must be loaded into memory before any application software can run. **(03 Marks)**

   (i) _____

   (ii) _____

   (iii)_____

   (b) Explain three key functions performed by an Operating System in managing computer resources. **(03 Marks)**

   (i) _____

   _____

   (ii) _____

   _____

(iii)_____

_____

(c) Describe four types of an Operating System. **(04 Marks)**

(i) _____

_____

(ii) _____

_____

(iii)_____

_____

(iv)_____

_____

4. (a)Mention three rules used for naming identifiers in Python. **(03 Marks)**

(i) _____

(ii) _____

(iii)_____

(b) A certain school needs a program that will help them to specify a grade for a given students score. Assume that the scores are graded as follow: - A: 75 – 100, B: 65 – 74, C: 45 – 64, D: 35 – 44, And F: Below 35. From the given data write a Python to program that:

(i) Asks a student to enter their scores. **(0.5 Mark)**

(ii) Convert the input to an integer. **(0.5 Mark)**

(iii)Use if, elif, and else statements to determine the grade. **(02 Marks)**

(iv)Print the assigned grade. **(0.5 Mark)**

(v) Modify the program to handle negative inputs from the user. **(0.5 Mark)**

_____

_____

_____

_____

_____

_____

_____

_____

_____

(c) Write a Python program that creates a list of three cities. Ask the user to enter a new city name and replace the second city in the list with the user's input. Display the updated list. **(03 Marks)**

_____

_____

_____

_____

_____

_____

_____

_____

_____

_____

5. (a) What is the meaning of the term debugging? **(02 Marks)**

_____

_____

(b) Juma is learning C programming. He writes the following program to calculate the sum of two numbers entered by the user, but it contains errors.

```
#include <stdio.h>
int main(
        int num1, num2, sum;
        printf("Enter first number:   ");
        scanf("%d", num1);
        printf("Enter second number:   ");
        scanf("%d", &num2);
        sum = num1 + num2;
        printf("The sum is:  %d",  &sum);
        return 0;
```

(i) Identify and describe three syntax errors in Juma's code. For each error, show how he should correct it. **(06 Marks)**

- _____

  _____

- _____

  _____

- _____

_____

(ii) After fixing the syntax, Juma runs the program. He enters the first number as 10.5 and the second as 5. The program crashes. What type of error is this? Explain why it happened. **(02 Marks)**

_____

_____

_____

_____

6. (a) Mention five common methods used for internet connectivity. **(05 Marks)**

(i) _____

(ii) _____

(iii)_____

(iv)_____

(v) _____

(b) A school allows students to access lessons, notes, assignments and learning materials using computers or mobile phones through the internet, without being physically present in the classroom.

(i) Identify the method of learning described above. **(01 Marks)**

_____

(ii) Give two advantages of this method of learning. **(02 Marks)**

- _____
- _____

(iii)Give two disadvantages of this method of learning. **(02 Marks)**

- _____
- _____

7. (a) Explain the difference between algorithms and Pseudocode. **(02 Marks)**

_____

_____

_____

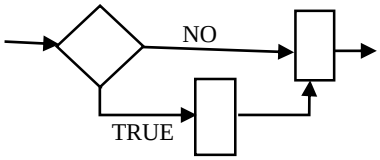

_____

(b) Create an algorithm to calculate simple interest for a loan, given the Principal amount (P), Rate of interest (R), and Time in years (T) as input. (use **I=(P*R*T)/100**). Use pseudocode to present your answer. **(04 Marks)**

Algorithm	Pseudocode

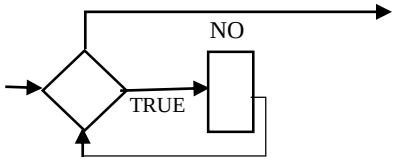

(c) Name and explain the uses of the following figures. **(04 Marks)**

(i)

- Name: _____
- Use: _____

(ii)

- Name: _____
- Use: _____

8. (a) What are the leading causes of cybercrime in your community? Four points **(04 Marks)**

(i) _____

(ii) _____

(iii)_____

(iv)_____

(b)(i) What is meant by the term netiquette? **(01 Mark)**

_____

_____

(ii) Describe five tips for practicing good netiquette. **(05 Marks)**

- ❖ _____
- ❖ _____
- ❖ _____
- ❖ _____
- ❖ _____

9. (a) List the component that formed the basis of the first fourth generations of computers.

(i) _____

(ii) _____

(iii)_____

(iv)_____

(b) Explain:

(i) Why is wearing the Antistatic wrist strap said to be very important during computer maintenance? **(02 Marks)**

_____

_____

(ii) Why is it necessary to conduct electrical troubleshooting in computer systems? Four points **(04 Marks)**

- ❖ _____
- ❖ _____
- ❖ _____
- ❖ _____

SECTION C (15 Marks)

Answer question **ten (10)** only

10. A computer laboratory experiences frequent power fluctuations that cause computers to restart unexpectedly. Explain possible causes and effects of power fluctuation, and state the devices that can be used to protect the computers against them.

_____

_____

_____
