PRIME MINISTE'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT

SPECIAL SCHOOLS FORM TWO PRE-MOCK EXAMINATION

COMPUTER SCIENCE

Time: 2: 00 Hours **JUNE 2026**

INSTRUCTIONS

1. This paper consists of sections A and B with a total of **ten (10)** questions.
2. Answer **all** questions in the spaces provided.
3. Section A and C carry **fifteen (15)** marks each and section B carries **seventy (70)** marks.
4. All writing must be in **black** or **blue** ink **except** diagrams which must be in pencil.
5. Communication devices and any unauthorized materials are **not** allowed in the assessment room.

SECTION A (15 MARKS)
Answer all questions in this section.

1. For each of the following items (i) to (x) choose the most correct answer from the given alternatives and write its letter in the table indicated below the items.

i. Nyamogi told his classmate that computer science is the only about learning how to type and use Microsoft Word. Which statement best corrects his ideas?

A. Computer science is the use of computers for entertainment only
B. Computer science is the study of computers, how they work and their applications
C. Computer science is the repairing computer machines only
D. Computer science is the learning how to browse the internet

ii. A company hires an expert to protect its system from hackers and viruses. This field is called:

A. Networking
B. Software engineering
C. Cyber security
D. Artificial intelligence

iii. Early computers use vacuum tubes while modern computers uses microprocessors. This difference shows:

A. Types of operating system
B. Generations of computers
C. Brands of computers
D. Uses of computers

iv. Mary types her essay using a keyboard and later scans a picture into the computer. Which devices is she using?

A. Output devices
B. Storage devices

C. Processing devices.
D. Input devices

v. A bank uses powerful computer for transactions while a student uses a laptop for assignments. Which is the correct classification?
A. Bank- Supercomputer, Student- Multicomputer
B. Bank – Mainframe, Student – Microcomputer
C. Bank - laptop, Student – Supercomputer
D. Bank – Microcomputer, Student - Mainframe

vi. Batuli asked to name computer parts that can be touched physically. What are these parts called?
A. Software
B. Programs
C. Hardware
D. Data

vii. Madam Angel spilled water near her computer keyboard. What should she do FIRST?
A. Continue typing quickly
B. Switch-off the computer and disconnect power
C. Wipe the water while computer is on.
D. Blow air into the keyboard

viii. John is carrying a laptop from one class to other class which of the following is the correct way of handling it?
A. Hold it tightly by the screen
B. Carry it with two hands in a bag
C. Place it under the armpit
D. Swing it by the power cable

ix. Why should food and drinks are not allowed near computers?
A. They make students waste time eating
B. Spills can damage computer parts
C. Computers will become heavier
D, Computers will run faster

x. Why is it important to perform regular software updates on computer?
A. To make the computer look new
B. To protect the system from security threats
C. To increase electricity use
D. To delete all files automatically

ANSWERS:

i.	ii	Iii	Iv	V	vi	vii	viii	ix	x

2. Match the items in **LIST A** with the responses in **LIST B** by writing the letter of the correct response beside the item number in the table provided below the items.

	LIST A	**LIST B**

i. ii. iii. iv. v.	An era characterized by room sized computers that were unreliable and power hungry Era began when thousands of transistors were miniaturized onto a single silicon chip. The key invention was a single chip that contained an entire central processing unit It marked the shift from mechanical electrical parts to a much smaller faster and more durable electronic component. The goal of this era is to develop machines capable of learning and self-organization	A. Very large scale Integration B. Vacuum tube technology C. Transistor technology D. Microprocessor design technology E. Integrated circuits technology

ANSWER

I	Ii	iii	iv	v

SECTION B (70 Marks)

Answer **ALL** questions from this section

3. a) You are needed to analyze key infrastructure communication system and industries that would completely collapse or require fundamental redesign in a world without computers.

i. _____

ii. ii. _____

iii. _____

iv. _____

v. _____

b) Is there any link between one computer generation and the next one? Justify.

_____

_____

_____

4. a) Show how computer are useful in different areas like education business and communication.

i. _____

ii. ii. _____

iii. _____

iv. _____

v. _____

b) Why is it important for computer scientists to understand related disciplines?

i. _____

ii. _____

iii. _____

iv. _____

v. _____

5. a) Briefly explain why did Jelvin want to understand the connection between computer science and information technology in real world life

i. _____
ii. _____
iii. _____
iv. _____
v. _____

b) Jolyn noticed that computer science does not depend only on one fields that contribute to the development of computer science. Identify four field that contribute to computer science.

i. _____
ii. _____
iii. _____
iv. _____
v. _____

6. a) Identify five advantages of using internet

i. _____
ii. _____
iii. _____
iv. _____
v. _____

b) With examples differentiate between system software and application software and explaining how they interact to provide a functional experience for the user..

i. _____
ii. _____
iii. _____
iv. _____
v. _____

7. a) Maria wants to perform preventive maintenance on a computer. What conditions should she check or ensure before starting the process?

i. _____
ii. _____
iii. _____
iv. _____
v. _____

b) What caution did you take for cleaning dust on hardware computer mouse monitor and keyboard?

i. _____
ii. _____
iii. _____
iv. _____
v. _____

8. a) Which computer parts might be affected if a computer is not properly maintained for a long time?

i. _____
ii. _____
iii. _____
iv. _____
v. _____

b) In what specific ways can malware harm a computer's performance a user's private data and the system's overall stability.

i. _____
ii. _____
iii. _____
iv. _____
v. _____

9. Define the following terms

(i) cybersecurity _____
_____
_____

(ii) cyber attack _____
_____
_____

(iii) cyber threats _____
_____
_____

(iv) cybercrimes _____
_____
_____

(iv) hackers _____
_____
_____

SECTION C (15 Marks)

Answer question number ten (10)

10. Explain five components of cyber security.

_____
_____
_____
_____
_____
_____
_____
_____
_____
_____
_____
_____
_____
