CANDIDATES NUMBER…….

THE UNITED REPUBLIC OF TANZANIA
PRIME MINISTER'S OFFICE
REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT

FORM TWO SPECIAL SCHOOLS PRE-MOCK EXAMINATION

TIME: 2:30 HOUR **COMPUTER SCIENCE** **JUNE 2026**

INSTRUCTIONS

1. This paper consists of sections **A, B** and **C** with a total of ten (10) questions.
2. Answer all questions.
3. Section A and C carry fifteen **(15) marks** each, section B carries seventy **(70) marks**.
4. Cellular phones and any unauthorized materials are not allowed in the assessment room.
5. Write your Assessment Number at the top right-hand corner of every page.

SECTION A (15 MARKS)

Answer all questions in this section

1. Select the correct answer from the given alternatives by writing the letter of the most correct answer in the table provided below.

i) Why is it important to study Computer Science?

(a) It allows us to understand how the internet works (b) It helps us become proficient in social media

(c) It improves our ability to use smartphones

(d) It provides knowledge in solving complex problems using technology

ii) Why is the study of software development important?

(a) It allows you to play video games (b) It focuses only on hardware

(c) It enables the creation of applications and systems that solve real-world problems

(d) It teaches only how to write code

iii) Why is studying algorithms important for improving efficiency in computing?

(a) Algorithms only focus on hardware (b) They help solve problems in the most efficient way possible

(c) They focus on social media management (d) They are not necessary in modern computing

iv) What is the primary function of the CPU in a computer system?

(a) To store data (b) To process instructions (c) To display output (d) To provide power

v) What is an operating system's primary role in a computer system?

(a) To store data permanently (b) To provide security for the system

(c) To manage hardware and software resources (d) To process user inputs

vi) (vi)What is the purpose of a UPS (Uninterruptible Power Supply)?

(a) To provide a stable power supply during blackouts and power surges (b) To increase the speed of the CPU

(c) To manage the data transfer rate between devices (d) To store data on a backup disk

(**vii)** Laptops and desktops are examples of which classification of computers?

(a) Supercomputers (b) Microcomputers (c) Minicomputers (d) Mainframes

viii) The following are common examples of power fluctuation except

(a) Brownouts (b) Spikes (c) Electrical surges (d) Surge protectors

ix) The following are the collect cleaning materials from computer hardware except

(a) Soft cloths (b) An electric air blower (c) Soft brush (d) Liquid

x) Most of the teachers in a certain school that uses computers in performing their daily activities reported the problem of disappearing some files. Which is the best way of preventing data from loss and damage?

a) Backup the file (b) Using password (c) Updating anti-virus (d) Using antiglare screen

i	ii	iii	iv	v	vi	vii	viii	ix	x

2. Match the items from list A with the correct response in list B by writing its letter on beside the item number.

LIST A	LIST B
i) Making machines intelligent so that they can think and solve problems as a human being.	A. Artificial intelligent
ii) Deals with insight and knowledge from large datasets through statistical analysis.	B. Data science
iii) Focus on how to design, develop, test and maintain software systems	C. Software engineering
iv) About ensuring computers can communicate with each other and share information.	D. Computer networking
v) Focuses on protecting computer systems and networks from security breaches, damage, attacks and unauthorized users.	E. Cyber security
	F. Computer architecture

Answer.

LIST A	i	ii	iii	iv	v
LIST B					

SECTION B: (70 Marks)
Answer ALL questions.

3. (a) Define the term computer.

……..

……

……

(b) Mention four (4) characteristics of a computer.

……

……
……
……
……

(c) State three (3) differences between data and information.

……
……
……
……

4. (a) List four (4) types of computers according to size.

……
……
……
……

(b) Mention four (4) input devices.

……
……
……
……

(c)State four (4) output devices.

……
……
……
……

5. (a) Define the term software.

……
……

(b) Identify two (2) types of software.

……
……

(c) State four (4) functions of an operating system.

……
……
……
……

6. (a) Mention three (3) components of the Central Processing Unit (CPU).

……
……
……

(b) Define computer virus.

……
……

(c) Give three (3) ways of protecting a computer from viruses.

……
……
……

7. (a) Explain the three main components of a computer system.

……
……
……
……

(b) Describe four (4) uses of computers in everyday life.

……
……
……
……

(c) Discuss four (4) differences between hardware and software.

……
……
……
……
……

8. (a) what is computer handling and care?

……..
……
……

(b) Mention four (4) devices used to deal with power fluctuation when using electrical appliances at home and at school computer laboratory.

……
……
……
……..

(c) What are four (4) possible risks may a computer face if proper handling measures are not taken into consideration?

……
……
……
……
……
……
……..

9. (a) What is computer system troubleshooting?

……
……
……

(b) Outline possible steps followed when troubleshooting a computer system

……
……
……
……
……

(c) Give a list of six aspects of troubleshooting

……
……
……
……
……
……
……

SECTION C (15 MARKS)

10. The computer is an electronic device that can be affected by power instability. With an example, discuss this statement.

……
……
……
……
……
……
……
……
……
……
……
……
……
……
……
……
……
……
……
……
……
