SECTION A (16 Marks)

Answer **all** questions in this section

1. For each of the following items (i) – (x), choose the most correct answer from among the given alternatives and write its letter beside the item number in the booklet(s) provided.

(i) Chacha, a shopkeeper at Kisutu Market, uses his time to prepare records of "form" and "report" using a database management system in his business. How can two terms, not directly related, be used to support business processes such as order processing and customer management?

A. A report is an output, while a form is an input object
B. The report has a header, while the form has a footer
C. A report is an input, while a form is an output object
D. The report can be printed, but the form cannot be printed
E. The report has a footer, while the form has a header

(ii) Mr. Rutashobya is among the engineers involved in a significant project, the Kigogo Busisi Bridge, which utilizes computer technology in modern IT infrastructures. The device used in designing and computing the project, according to its functionality, can be classified as _____

A. Digital and analogue computers
B. Supercomputer and minicomputer
C. Hybrid and microcomputers
D. Analogue and special-purpose computers
E. Digital and general-purpose computers

(iii) Arusha Gemstone Company (AGM) is planning to design a minor LAN renovation by connecting all computers and other peripheral devices to a central server. What type of physical network topology would be suitable for this design?

A. Tree topology
B. Bus topology
C. Star topology
D. Mesh topology
E. Hybrid topology

(iv) In a database table, the field for Gender can have different types of data depending on the design and requirements. What is the kind of data in the field of Gender in the database table where the user has to choose either Male or Female?

A. Attachment
B. Lookup Wizard
C. Hyperlink
D. Yes/No
E. OLE object

(v) Form Three students were given an assignment of typing letters using a special program that allows them to edit and apply various features. How are the commands   used in that program to interact with other formatting features?

A. To decrease and increase the indent
B. To minimize and decrease indent
C. To reduce and raise the indent
D. To raise and reduce indent
E. To maximize and increase the indent

(vi) The simple webpage appearance and readability, including chemical formulas. Choose the best HTML statement from the HTML code below used to display the chemical formula of water, "H2O", in a paragraph element.

A. H₂O
B. H<ins>2</ins>O
C. H<below>2</below>O
D. H²O
E. H<sup>2</below>O/p>

(vii) Mr. Tindwa has a television that lacks a data connection cable. Unfortunately, he doesn't know what a proper connecting cable to buy is. If you're an IT consultant, which among the following connecting cables would you recommend?

A. Twisted pair cable
B. Fibre Optic cable
C. Coaxial cables
D. Printer cable
E. VGA cables

(viii) In a multimedia production, various equipment can be used to produce audio. Regarding the statement, choose the correct order and the sequence for the particular output.

A. Mixing, Editing, Recording, and Burning
B. Recording, Mixing, Burning, and Editing
C. Recording, Editing, Mixing, and Burning
D. Editing, Mixing, Recording, and Burning
E. Recording, Burning, Editing, and Mixing

(ix) A teller at NMB Bank was printing transaction slips; the printer used produced noise as well as hammering sounds when printing the records on paper. Such a printer is likely to be_____

A. Scanner
B. LaserJet printer.

C. Plotter printer
D. Impact printer
E. Non-impact printer

(x) Which of the following is a key difference between a flat file database and a relational database?

A. A flat file database can store more data than a relational database
B. Flat file database stores data in a single table or file, while relational database uses multiple tables to store data
C. Flat file databases support relationships between tables, while relational databases do not
D. A relational database is simpler and easier to manage than a flat file database

2. Match the descriptions of word processing program features in **List A** with their corresponding names in **List B** by writing the letter of the correct response beside the item number in your answer booklet (s).

LIST A	**LIST B**
(i) Automatically find the word with a similar meaning. (ii) The process of enhancing the document's appearance. (iii) Large characters in a paragraph that occupy more than one line. (iv) Lines of text that appear at the top of the margin on every page or selected pages. (v) Indicates the task that is currently running on the computer. (vi) Used to change selected text to either uppercase or Lowercase.	A. Header B. Change case C. Drop cap D. Thesaurus E. Formatting F. Heading G. Status Bar H. Tool bar

SECTION B (54 Marks)

Answer **all** questions in this section

3. (a) What is a Database Management System (DBMS)?

   (b) A property owner uses a database to store data about houses he sells. The table below shows part of the database. Study carefully and then answer the questions that follow;

Reference Number	Air Conditioner	Garden	Number of Bedrooms	Price
N1230	Y	N	3	$1,200.00
N1135	N	Y	4	$1,500.00
N2452	N	Y	2	$670.00
N5107	Y	N	3	$1,500.00
N3541	N	Y	2	$800.00

   (i) The records shown in the table above are to be sorted in ascending order of Price. What will be the reference number of the first record in the database after it has been sorted?

   (ii) Which field can be used as the primary Key? Why are we advised to use a Primary Key?

   (iii) Give the names of the data types used in the field of Reference Number.

   (iv) How many records are in the table above?

   (v) Which criterion will be used to show that the Price is less than $1,000?

4. (a) Study the snapshot below and write the HTML tags for the webpage.

   (b) Juma prepared an HTML element in a basic structure for a standard format, which is executed, and the tags are displayed as an element. Briefly explain three basic things that define an HTML tag in the basic structure of a webpage.

5. (a) Why network administrators in organizations prefer to install Linux Operating System in their server computers?

   (b) What two possible challenges the organization may face when using the Linux operating system?

   (c) Explain two functions of the Linux Operating System used in organization's Server Computers.

6. (a) What is the function of each of the following components in the Computer System?
   (i) Arithmetic Logical Unit (ALU)
   (ii) Control Unit (CU)
   (iii)Uninterruptible Power Supply (UPS)
   (b) Why do computers store data in a binary form? Give reason.
   (c) Why is it strongly advised to always save your work while working in Microsoft word document?

7. The academic master created the computer backup by using a storage medium located within the same office. Suddenly the office got fire caused by electricity problem and the data were lost.
   (a) Identify the method of backup done by the academic master.
   (b) Explain three benefits of the method of backup identified in 5 (a).
   (c) Which method of backup could be used to avoid the problem that happened? Give one reason

8. Jimi has no technical knowledge about the computer, but he plans to buy a new computer for his learning purpose.
   (a) Explain three factors he should consider before buying a new computer.
   (b) Explain two types of computer software expected to be installed in a computer to be bought. Give two examples for each category.

SECTION C (30 Marks)

Answer **only two** questions in this section

9. Explain four reasons for schools to use Information and Communication Technology in teaching and learning process

10. Recently, most organizations opt to use the computer technology instead of human being in their various operations. Using five points, explain the reasons for their choices.

11. Explain five advantages of using computers and other devices which are connected to the network in an organization.
