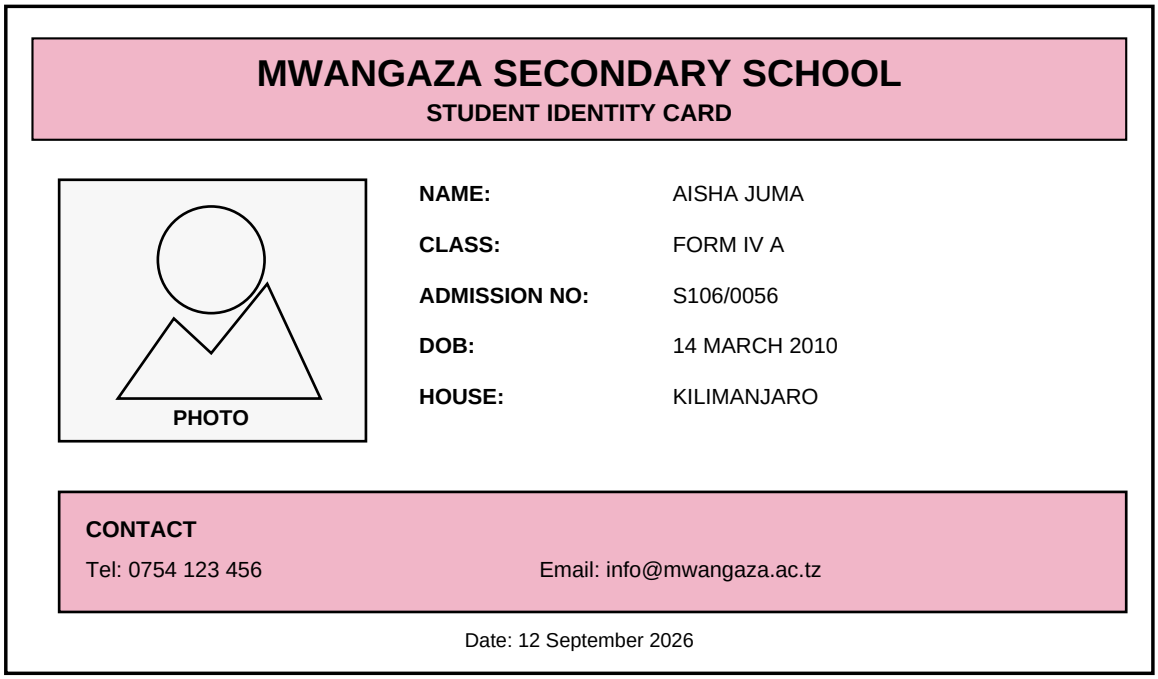
THE UNITED REPUBLIC OF TANZANIA
FORM FOUR ACADEMIC PRACTICAL EXAMINATION
INFORMATION AND COMPUTER STUDIES — 036/2
QUESTION 3: DESKTOP PUBLISHING

Question	3	**Marks**	25
Time	Part of the 3-hour practical paper	**Answer**	Any TWO questions

Scenario

Mwangaza Secondary School is updating its student identification cards. As an ICT practical candidate, you have been instructed to use **Microsoft Office Publisher** to reproduce the Student Identity Card shown in **Figure 1**. The final card must be as close as possible to the specimen in terms of arrangement, text, colours, picture placement and overall appearance.

FIGURE 1 — SPECIMEN STUDENT IDENTITY CARD



Instructions

a) Create a new publication in Microsoft Publisher using an appropriate page size suitable for the identity card. Set the page orientation and margins so that the card fits neatly on one page. Save the publication as **STUDENT_ID_CARD**. **(2 marks)**

b) Recreate the **school name** and **STUDENT IDENTITY CARD** heading. Use appropriate font sizes, bold formatting, alignment and a coloured background similar to Figure 1. **(3 marks)**

c) Create separate text boxes for the student's details exactly as shown: **NAME, CLASS, ADMISSION NO, DOB and HOUSE**. Replace **S106/0056** with your own examination number where instructed. Format and align the details neatly. **(3 marks)**

d) Insert an appropriate **student/ICT picture** in the photo area. Resize it proportionally, crop it if necessary, and position it inside the picture frame without covering other objects. **(3 marks)**

e) Create the **CONTACT** section using a shape/text box. Apply a **pink background**, suitable outline, and enter the telephone number and email address. **Underline the email address**. **(3 marks)**

f) Insert the **current date** using Publisher's date/time feature. Do not type a fixed date manually. Position the date at the bottom of the card. **(2 marks)**

g) Apply an appropriate **border** around the identity card and use Publisher's Arrange/Align tools to ensure that all objects are properly positioned, aligned and evenly spaced. **(3 marks)**

h) Select all objects forming the identity card and **group** them so that the complete card can be moved as one object. Confirm that the grouped card can be moved without disturbing its internal layout. **(2 marks)**

i) Check the final publication in **Print Preview**, save the file, and print one copy. The printed card must resemble Figure 1. **(2 marks)**

Candidate warning: Marks are awarded for following the exact requirements. In particular, distinguish a *current date* from a typed fixed date, use Publisher rather than Word, and group the completed card after arranging its objects.
