THE PRIME MINISTER'S OFFICE

JEPGOS – TANZANIA

FORM FOUR MOCK EXAMINATION

INFORMATION AND COMPUTER STUDIES

MARKING SCHEME

Examination Session	August 2026
Subject	Information and Computer Studies
Level	Form Four
Duration	3 Hours
Total Marks	100 Marks
Paper Structure	Sections A, B and C

MARKING SCHEME PURPOSE

This marking scheme provides a structured allocation of marks and acceptable responses for the supplied August 2026 Form Four Information and Computer Studies mock examination. It is arranged in an academic examination format suitable for marking and moderation.

Note: The examination paper supplied is identified as a JEPGOS–Tanzania Form Four Mock Examination. The scheme is based directly on that paper. It should not be treated as an official TIE marking scheme.

MARK DISTRIBUTION

Section	Questions	Marks
A	1–2	16
B	3–8	54
C	9–11 (Answer any two)	30
TOTAL		**100**

SECTION A — 16 MARKS

General marking instruction: Award 1 mark for each correct response. No mark for an incorrect response.

QUESTION 1 — 10 MARKS

Item	Answer	Correct response
i	A	=E2+E2
ii	C	Storytelling
iii	C	Zooming
iv	E	Podium
v	B	Select queries
vi	C	Microsoft Edge
vii	E	Hot shoe
viii	B	Cyber stalking
ix	A	Ethernet card
x	D	Address bar

QUESTION 2 — 6 MARKS

Item	Answer	Correct shot
i	C	Extreme close up shot
ii	A	Medium shot
iii	B	Medium long shot
iv	D	Medium close up shot
v	E	Long shot
vi	F	Extreme long shot

SECTION A TOTAL = 16 MARKS

SECTION B — 54 MARKS

Answer all questions.

QUESTION 3 — 9 MARKS

(i) (2 marks) Data processing is the collection and manipulation/processing of raw data to produce meaningful and useful information.

(ii) (3 marks) Any three: decision-making; planning and forecasting; communication; problem-solving; monitoring and control; keeping proper records. Award 1 mark for each correct reason.

(iii) (2 marks) Batch processing system. Census information is collected in large quantities and can be processed together as a batch.

(iv) (2 marks) Any two valid advantages of batch processing, for example: suitable for large volumes of data; efficient for repetitive processing; saves time/resources; reduces manual work; produces consistent results. Award 1 mark per valid advantage.

QUESTION 4 — 10 MARKS

(a)(i) (1 mark) Frame: A single still image/picture in a sequence that forms part of a video or animation.

(a)(ii) (1 mark) Scene: A part or sequence of a multimedia production occurring in a particular setting or representing a particular event/action.

(b)(i) (1 mark) Talking room: Space left in front of a person who is speaking or looking towards a direction.

(b)(ii) (1 mark) Head room: Space between the top of the subject's head and the upper edge of the frame.

(b)(iii) (1 mark) Walking room: Space left in front of a moving person or object in the direction of movement.

(c) (5 marks) Any two types of multimedia content, with an appropriate explanation/example. Examples include text, image/graphics, audio, video and animation. Award up to 5 marks for two correctly described types and examples.

QUESTION 5 — 9 MARKS

(i) (2 marks) Any two relevant aspects, e.g. provides information; supports communication; supports online business/e-commerce; provides online services; promotes products/organisations; improves access to information. Award 1 mark each.

(ii) (2 marks) Website publishing is the process of making a website/webpage available on the Internet so that users can access it.

(iii) (3 marks) Any three: webpage/website files; web hosting/server; domain name; Internet connection; web publishing tools/software. Award 1 mark each.

(iv)(a) (1 mark) Colspan: Used to merge/combine two or more columns in an HTML table.

(iv)(b) (1 mark) Rowspan: Used to merge/combine two or more rows in an HTML table.

QUESTION 6 — 9 MARKS

(i) (2 marks) Computer security is the protection of computer systems, hardware, software, networks and data from unauthorised access, damage, loss or other threats.

(ii) (4 marks) Any four: use strong passwords; install/update antivirus; update the operating system/software; use a firewall; make regular backups; avoid suspicious email attachments/links; restrict unauthorised access; use user accounts and permissions; physically secure equipment. Award 1 mark

each.

(iii) (3 marks) Any three: access data from different locations; protects against data loss/hardware failure; supports automatic backup; provides off-site storage; easy restoration; reduces need for physical storage; synchronises data across devices. Award 1 mark each.

QUESTION 7 — 9 MARKS

(a)(i) (1 mark) Default value: A value automatically entered into a field when the user does not provide another value.

(a)(ii) (1 mark) Validation rule: A condition used to control or restrict the type or range of data entered into a field.

(a)(iii) (1 mark) Validation text: A message displayed when data entered does not satisfy the validation rule.

(b) (2 marks) Any two: uniquely identifies each record; prevents duplicate values; helps establish relationships between tables; helps locate specific records. Award 1 mark each.

(c) (2 marks) Any two: tables should have appropriate primary keys; the related field should act as a foreign key; related fields should have compatible data types; the relationship should be based on matching key fields. Award 1 mark each.

(d) (2 marks) Any two examples: Microsoft Access, MySQL, Microsoft SQL Server, Oracle Database, PostgreSQL, SQLite. Award 1 mark each.

QUESTION 8 — 8 MARKS

(a) (2 marks) Hardware: Physical components of a computer that can be seen and touched, e.g. keyboard. **Software:** Program/instructions used to control the computer and perform tasks, e.g. Microsoft Word. Award 0.5 mark for each correct definition/example pair, total 2 marks.

(b) Two differences between system software and application software — 4 marks

System software	Application software
Manages and controls computer hardware/system resources.	Performs specific tasks for the user.
Provides a platform on which application software can run.	Runs on top of system software.
Examples: Windows, device drivers.	Examples: Word, Excel, Photoshop.

Award 2 marks for each correctly explained difference; maximum 4 marks.

(c) (2 marks) Any two advantages of Windows OS: easy-to-use graphical interface; supports many hardware devices; supports many software applications; multitasking; wide manufacturer/software support; networking and Internet features; security/system updates. Award 1 mark each.

SECTION B TOTAL = 54 MARKS

SECTION C — 30 MARKS

Instruction: Answer only two (2) questions. Each question carries 15 marks.

QUESTION 9 — 15 MARKS

Negative impacts of ICT on society

1. Cybercrime: Cybercrime may include hacking, online fraud, identity theft and unauthorised access to information. **(3.75 marks)**

2. Loss of privacy: Personal information may be collected, shared or accessed without proper authorisation. **(3.75 marks)**

3. Unemployment/job displacement: Automation and computerised systems may replace some tasks previously performed manually. **(3.75 marks)**

4. Health problems: Excessive use of computers and digital devices may contribute to eye strain, poor posture and reduced physical activity. **(3.75 marks)**

Marking guide: For each of four well-developed impacts, award 1 mark for identification, 2 marks for a relevant explanation, and 0.75 mark for a relevant example/effect. Other valid impacts include cyberbullying, misinformation, social isolation, digital divide, addiction and e-waste.

QUESTION 10 — 15 MARKS

Advantages of Desktop Publishing (DTP) software

1. Professional-looking documents: Allows attractive layouts, graphics, fonts and designs. **(3.75 marks)**

2. Saves time: Templates and formatting tools make publication production faster. **(3.75 marks)**

3. Easy editing: Text, images, colours and layouts can be modified easily before publication. **(3.75 marks)**

4. Produces different publications: Can create brochures, posters, newsletters, business cards, invitations and flyers. **(3.75 marks)**

Marking guide: For each of four well-developed advantages, award 1 mark for identification, 2 marks for explanation, and 0.75 mark for a relevant example/application. Other valid advantages should be accepted where correctly explained.

QUESTION 11 — 15 MARKS

Advantages of multimedia in web designing

1. Attracts users' attention: Images, animation, video and audio can make a website more attractive. **(3.75 marks)**

2. Improves communication: Different media formats can make information easier to understand. **(3.75 marks)**

3. Improves user engagement: Interactive multimedia can encourage users to explore and interact with a website. **(3.75 marks)**

4. Supports effective learning: Video, audio, images and animation can make educational information easier to understand. **(3.75 marks)**

Marking guide: For each of four well-developed advantages, award 1 mark for identification, 2 marks for explanation, and 0.75 mark for a relevant example/application. Other valid advantages should be accepted where correctly explained.

SECTION C TOTAL = 30 MARKS

GENERAL MARKING AND MODERATION GUIDELINES

1. Accept any other correct and relevant answer, even where the wording differs from the model answer.

2. For questions requiring explanations, do not award full marks for a mere list where explanation is specifically required.

3. Where a candidate gives more responses than required, apply the examination marking convention used by the examining authority; where no special instruction is provided, mark the required number of responses in the order presented.

4. Minor grammatical or spelling errors should not be penalised where the intended technical meaning is clear.

5. Marks should be awarded consistently across candidates and moderated where necessary.

6. For Section C, consider accuracy, relevance, explanation and application when awarding marks.

7. Maximum obtainable mark for the paper is 100.

END OF MARKING SCHEME

Prepared from the supplied JEPGOS–Tanzania Form Four Mock Examination, August 2026.
