SECTION A (16 MARKS)

Answer **all** questions in this section.

1. For each of the items (i) - (x), choose the correct answer from among the given alternatives and write its letter beside the item number in the answer booklet provided.

(i) In a computer system, unprocessed numbers, text and pictures for various purposes are known as

A Knowledge
B Data
C Information
D Contents
E figures

(ii) Which of the following is a technical term for a computer that can be accessed by an internet user using another computer or device from far away?

A Local computer
B Remote computer
C Client computer
D Internet Service Provider
E Web computer

(iii)A network communication device which forwards a packet directly to the intended address without broadcasting is called

A Switch B. Repeater C. Hub D. Modem

(iv) What is the smallest and largest font sizes available in the font size tool on the formatting toolbar?

A. 8 and 72
B. 8 and 68
C. 6 and 72
D. 6 and 76
E. 8 and 128

(v) A computer user wants to ensure their system remains operational for a few minutes after a main power failure to allow for a graceful shutdown. Which device should they install?

A. Socket extension.
B. Surge protector
C. UPS.
D. Voltage stabilizer.
E. Voltage 8regulator

(vi) A user presses the power button on a desktop computer. The LEDs on the system unit light up and the cooling fans can be heard spinning, but the screen remains completely black. Which of the following could be a reason for this issue?

A. The monitor is not turned on.
B. The monitor is not connected to the computer.
C. The monitor is not plugged in.
D. The monitor is connected.

A. Power unit.
B. Processor chip.
C. Keyboard.
D. ROM BIOS.

E. Motherboard

(ix) The alphanumeric character that describes the contents of the row and columns in a spreadsheet:

A. Formula B. Value C. Labels D. Functions E. Data

(x) Form of intellectual property theft which means illegal copying of software, information or data is:-

A Physical theft
B Fraud
C Sabotage
D Piracy
E Espionage

2. Match each item in list **A** against its corresponding item in list **B.**

List A	List B
(i) Record	A. Provides additional information of the particular tag.
(ii) Field	B. Database object that asks a question
(iii) Query	C. Column in a database table
(iv) Data type	D. Kind of information a field contains
(v) Form	E. Database object that is created from a report
(vi) Foreign key	F. Row in a database table
	G. Key field in the table that uses a primary key of another table.
	H. Database object created from a query.
	I. A component of a database such as a table, query, form or report
	J. Provides more detailed heading for your field names.
	K. Database object that simplifies the process of entering, editing and displaying data.

SECTION B (54 MARKS)

Answer all questions from this section

3. (a) A school registrar stores all student examination results on a single external hard drive. One afternoon, the drive is dropped and becomes unreadable, and there are no other copies of the files.

(i) Explain the technical strategy the registrar should have implemented to prevent total data loss.

(ii) Provide three specific risks or situations that this strategy would protect the school against in the future.

(b) After using a computer for two years, a user notices that the system has become very slow, the storage is almost full of "junk" files, and they are worried about unauthorized access to their folders. Instead of buying a new computer, the user decides to install and run a specific category of software designed to maintain, optimize, and protect the system.

(i) Identify this category of software.

(ii) Give two examples of specific tools within this category that would help the user.

4. (a) Outline the importance of protecting information systems.

(b) Explain five criminal activities facilitated by information and communication technology (ICT).

(c)Briefly explain four security measures that can be applied to avoid criminal activities explained in part (b) above.

5. The Ministry of Home Affairs of Iran uses Television and Radio broadcasting to disseminate information about ongoing war against USA and Measures to be taken by the society.

(a) Which type of information dissemination method used by the Ministry?

(b) Why the Ministry uses such means of disseminating information? Give four reasons.

(c) What two challenges would the Ministry face by using such method of disseminating information?

6. (a) Mshikamano" Bank has recently moved all its customer records from physical paper files to a centralized digital database accessible via a network across five different branches. You have been asked to conduct a risk assessment for the bank's new infrastructure.

(i) Identify three major security threats that could specifically target the bank's network.

(ii) For each threat, explain how it could potentially disrupt the bank's operations or compromise customer data.

(b) During a staff meeting, it was discovered that some employees have been using the bank's high-speed internet to download copyrighted movies, while others have been accessing private customer contact details to promote their own side businesses. The Human Resources Manager has asked you to address the staff.

(i) Explain two distinct ethical issues related to ICT usage demonstrated in this scenario.

(ii) For each issue, justify why it is considered a violation of professional computer ethics in a corporate environment.

7. Your classmate, Monitor, has been selected to represent your school at a national ICT innovation competition. Despite being a brilliant student, Monitor is terrified of public speaking and wants to withdraw because he "doesn't know how to act" in front of a crowd

and doesn't know where to start his preparation. As a student leader with strong communication skills, you have been asked to mentor Monitor to build his confidence.

(a) Describe three essential qualities of a professional presenter that he should model during his speech to appear authoritative and engaging.

(b) Monitor is worried about losing his place or boring the judges. Develop a three step preparation plan he should follow before the competition day to ensure his content is well-organized and meets the needs of his audience.

8. The table below shows the specification for the PC.

Feature	**Details**
Hard drive	1TB
Graphics card	4GB
CD/DVD/Blu-ray drive	CD-RW,DVD-RW
Operating system	Windows 11®
Processor	AMDquad-coreA10-5800K4.2GHZ
RAM	8GB

(a) Identify the hard disk capacity and the speed of the computer processor.

(b) What is the role of the hard disk?

(c) The computer has an 8GB RAM chip. Explain the functions of RAM when data is being processed.

(d) Windows 11 is the operating system used.

(i) With examples explain the term operating system.

(ii) Briefly describe four resources managed by operating system.

SECTION C (30 MARKS)

Answer two questions from this section.

9. Analyze how desktop publishing (DTP) software provides superior control over page layout than other programs? Explain by giving five points.

10. A local media house in Dar es Salaam is planning to launch a new daily newspaper called *"The Digital Citizen."* The management is debating whether to design the newspaper using standard Word Processing software or specialized Desktop Publishing software. As the lead Graphic Designer, you have been asked to present five technical justifications to the Company for choosing Desktop Publishing software over other programs for this specific project.

11. A large manufacturing company in Dar es Salaam currently employs 200 clerks to manually record inventory, process payroll, and manage customer orders using paper ledgers. The

Board of Directors is considering a massive investment to replace these manual processes with an Automated Enterprise Resource Planning (ERP**)** computer system. As an ICT consultant hired by the board, you are asked to provide five technical justifications for this transition.
