PRESIDENT'S OFFEICE

REGIONAL ADMINISTRATION AND LOCAL GOVERNMENT

LEKULE SECONDARY SCHOOL

FORM ONE ANNUAL EXAMINATION

BIOLOGY MARKING GUIDE 2023

1.

i	ii	iii	iv	v	vi	vii	viii	ix	x
A	C	D	C	A	C	A	D	D	B

10marks @1mark

2.

i	ii	iii	iv	v
G	A	H	D	C

5marks @1 mark

3(a) Agriculture is the practice of growing crops and rearing animals for food, money, or both. Biological research findings on crops and livestock have led to improved agricultural production. Scientist have developed breeds of crops and animals that mature quickly and produce high yield

(b) Nutrition The study of biology is important in understanding the composition and value of different groups of foods. This knowledge is used by Dieticians to determine the kind of diets that are suitable for people with different health need through the knowledge of biology

(c) Forestry are sources of fuel (firewood and charcoal), building materials, and medicinal plant. They also serve as water catchment. Biologists have developed varieties of trees that grow well in dry areas. Such trees are used to reclaim dry land areas. Through biological research, varieties of fast growing trees are planted to replace deforested area.

(d) Medicine and pharmacy, medicine is the study of the prevention, treatment, and cure of diseases. Pharmacy is the science of preparation and administration of drugs. Anatomy and immunology form an important part of the study of medicine.

The study of anatomy helps doctors to learn the structure of the body and how it functions. This makes it possible for them to know what is wrong in the body and how it can be treated.

10 marks @ 2.5 marks

4. (a)

i) Adequate space
ii) Proper lighting
iii) Good ventilation iv) Adequate storage room v) A source of water
vi) Source of heating
5 Marks @ 1mark

b)

i) In order to show the reaction when taking place
ii) To show the volume of substance
3marks @ 1.5mark

(c)

i) In order to ensure the safety of the laboratory
ii) To ensure the safety of the student when performing experiments
iii) To minimize accident in the laboratory 2marks @1mark

5 (a)

i) Eye piece - Has a lens that magnifies the specimen five times (5x), ten times (10x) or fifteen times (15x)
ii) Mirror - Reflects and directs light to the specimens under observation
iii) Stage - Surface on which the specimen is placed
iv) Base - Provides firm support for the microscope
4 marks @ 1 marks

(b)

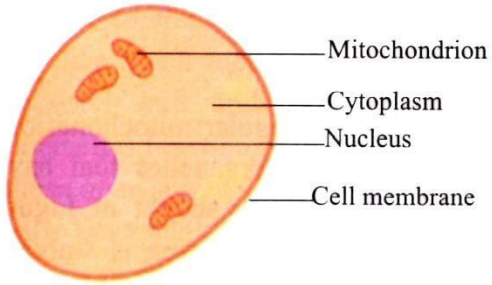

i) Immediately move the victim away from the area where the bites occurred
ii) Calm the victim and let him or her lay or sit down and reassure the victim that many snakes are non-venomous.
iii) Remove all jewellery
iv) Keep the wound at heart level or lower in order to reduce flow of venom 3Marks @ 1.5 marks

(c) Common accident at home and school

i) Fire,
burns and
scalds

ii) Drownin
g iii) Falls iv)
Poisoning v)
Choking
vi) Bites and stings
vii) Cuts and scratches
3Marks @1mark

6 (a)

2marks

(b)

i) It helps us to understand ourselves better since we are living things.
ii) Skills and knowledge of biology can be applied to other scientific fields such as agriculture, forestry medicine, nutrition, pharmacy and veterinary science.
iii) It helps us to understand our environment better and principles of conserving it. iv) Biology helps to answer some important questions such as, what do living things need, why do we resemble with a monkey, why do frogs lay many eggs but only few become adults?
v) Knowledge of biology helps us to improve our health since causes, symptoms, transmission and treatment are of various diseases are studied in biology.
vi) Knowledge of biology helps us to avoid our selves from magical beliefs, superstitions and other traditional taboos.
vii) Knowledge of genetics helps us to clear some common doubts about certain inherited characteristics e.g. albinism, sickle cell anaemia, haemophilia, etc. viii) Knowledge of the structure and chemical composition of the organisms enable us to acquire food, clothes and shelter from them. 5marks @1mark

(c) (i) Eruption of diseases

i) iEnvironmental pollution
ii) They make unattractive land/environment
iii) Degrade natural beauty of the environment iv) Harm wildlife and domestic animal
5Marks@1mark
7. (a)
i) Chew while mouth is closed
ii) Chew at a reasonable pace

iii) Use proper serving spoons to serve food iv) Do not talk
v) Avoid issues that are likey to make other people lose appetite 3marks @1mark b)

Changes in boys

i) Enlargement of testes and penis
ii) Sweat and oil gland became more active
iii) Development of deep and coarse voice 2marks 1@0.5mark

Changes in girls

i) Development and increase of breast size
ii) Increase in secretion of muscus in the vagina
iii) Development of pimples of some girls 2marks 1@0.5mark

(c)

i) Reduce intake of unhealthy food such as canned foods that contain chemical preservatives.
ii) Have regular physical exercise at least 30 minutes
iii) Get sufficient sleep in a well-ventilated room iv) When facing problems seek help from parents, counselors and teachers v) Allow time for leisure
vi) Take medical drugs only when prescribed by a registered health practitioner
3marks 1@mark

8. (a)

i) Poor nutrition
ii) Lack of vaccination
iii) Genetic disorders iv) Incomplete treatment
v) Attacks by pathogens
vi) Extreme stress
vii) Age
viii) Damage to the skin
4 Marks @1mark

(b)

i) An epidemic and pandemic (2marks)

An epidemic is a communicable disease outbreak that affects a large number of people in a short period of time at a given locality. Example are cholera, meningitis, tuberculosis and plague While, Pandemic is a communicable disease outbreak that becomes widespread in a large

geographical area such as a continent or the whole world, for example COVID-19, and AIDS

ii)Endemic and sporadic (2marks)

Endemic is a diseases outbreak occurs in a given area constantly. For example malarial and bilharzias While, Sporadic is a diseases outbreak occurs occasionally and at random intervals, for example Ebola and rift valley fever

(c) Because they cannot be transmitted from one person to another. (2marks)

9. (a)

i) PLWHA ii) HIV
iii) AIDS iv) STI's
v) STD (2.5marks @0.5mark)

(b) i) Drinking alcohol this is whereby person has drunk lead to has/her improper choice and engaged unprotected sex due to drunk.

ii) Sharing razor blades, when you share blades with a person who has/her affected with HIV, you will get HIV too due to sharing of that tool.

iii) Having immoral friend, having improper friend may lead to convince you to engage in unprotected sex and lead to get HIV

iv) Drug abuse, the use of drug may lead to get HIV through many ways, example when sharing syringe with affected person, there is a high possibility to get HIV (2marks 1@ 0.5)

(c)

	Plant cell	**Animal cell**
i)	Has a cell wall	No cell wall
ii)	Has chloroplast	Lack chloroplast
iii)	Has a large permanent centralized vacuole	Has small and temporary vacuoles
iv)	It is irregular in shape	It is irregular in shape
v)	Nucleus in placed at the periphery	Nucleus is centrally positioned

5marks @1mark

10. It is important due to the following reasons;-

Introduction (2marks)

Main body (12 marks)

i) It make easier to study and identify organism

ii) It makes communication among biologist in the world easier

iii) It enables scientists to predict characteristics of an organism based on characteristics

iv) It helps to understand how organisms are related in terms of their evolutionary history

Conclusion (1 mark)
